- (1) Represents the difference between the weighted average yield on average interest-earning assets and the weighted average cost on average interest-bearing liabilities.
- (2) Represents net interest income as a percent of average interest-earning assets.
- (3) Represents other non-interest expenses divided by the sum of net interest income and non-interest income.
- (4) Ratios are for Beneficial Bank.
- (5) Non-performing loans and assets include accruing government guaranteed student loans past due 90 days or more.
- (6) During 2012, the Company acquired five branches and consolidated three branches as a result of the merger with SE Financial.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Overview

The history of the Bank dates back to 1853. The Bank's principal business is to acquire deposits from individuals and businesses in the communities surrounding our offices and to use those deposits to fund loans. We also seek to broaden relationships with our customers by offering insurance and investment advisory services.

The Bank was established to serve the financing needs of the public and has expanded its services over time to offer personal and business checking accounts, home equity loans and lines of credit, commercial real estate loans and other types of commercial and consumer loans. We also provide insurance services through our wholly owned subsidiary, Beneficial Insurance Services, LLC, and investment and non-deposit services through our wholly owned subsidiary, Beneficial Advisors, LLC. We focus on providing our products and services to individuals, businesses and non-profit organizations located in our primary market area. Our retail market focus includes primarily all of the areas surrounding our 60 banking offices located in Bucks, Chester, Delaware, Montgomery and Philadelphia Counties in Pennsylvania and Burlington, Camden and Gloucester Counties in New Jersey, while our lending market also includes other counties in central and southern New Jersey as well as Delaware. In addition, Beneficial Insurance Services, LLC operates two offices in Pennsylvania, one in Philadelphia County and one in Delaware County. We will occasionally consolidate branches based on proximity to other Bank locations, customer activity, financial performance, future market potential and our growth plans.

Over the years, we have expanded through organic growth and acquisitions, reaching \$4.58 billion in assets at December 31, 2013. In 2004, the Bank reorganized into the mutual holding company structure, forming Beneficial Mutual Bancorp, Inc. (the "Company" or "Beneficial"), a federally chartered stock holding company, as its holding company and Beneficial Savings Bank MHC (the "MHC"), a federally chartered mutual holding company, as the sole stockholder of the Company. In July 2007, the Company completed its minority stock offering, raising approximately \$236.1 million in proceeds, and simultaneously acquired FMS Financial Corporation, the parent company of Farmers & Mechanics Bank (together, "FMS Financial"), which had total assets of over \$1.2 billion. In October 2007, Beneficial Insurance Services, LLC acquired the business of CLA Agency, Inc. ("CLA"), a full-service property and casualty and professional liability insurance brokerage company headquartered in Newtown Square, Pennsylvania.

In April 2012, the Company acquired SE Financial Corp. ("SE Financial") and St. Edmond's Federal Savings Bank, a federally chartered stock savings bank, and a wholly-owned subsidiary of SE Corp ("St. Edmond's"), pursuant to which SE Financial merged with a newly formed subsidiary of the Company and thereby became a wholly owned subsidiary of the Company for \$29.4 million in cash. The results of SE Financial's operations are included in the Company's unaudited condensed Consolidated Statements of Operations for the period beginning on April 3, 2012, the date of the acquisition, and all subsequent periods thereafter. The acquisition of SE Financial and St. Edmond's increased the Company's market share in southeastern Pennsylvania, specifically Philadelphia and Delaware Counties. Additionally, the acquisition provided Beneficial with new branches in Roxborough, Pennsylvania and Deptford, New Jersey.

Our primary source of pre-tax income is net interest income. Net interest income is the difference between the income we earn on our loans and investments and the interest we pay on our deposits and borrowings. Changes in levels of interest rates affect our net interest income.

A secondary source of income is non-interest income, which is revenue we receive from providing products and services. Traditionally, the majority of our non-interest income has come from service charges (mostly on deposit accounts).

The non-interest expenses we incur in operating our business consist of salaries and employee benefits expenses, equity plans, occupancy expenses, depreciation, amortization and maintenance expenses and other miscellaneous expenses, such as loan and owned real estate expenses, advertising, insurance, professional services and printing and supplies expenses. Our largest non-interest expense is salaries and employee benefits, which consist primarily of salaries and wages paid to our employees, payroll taxes, and expenses for health insurance, retirement plans and other employee benefits.

Executive Summary for 2013

We recorded net income for the year ended December 31, 2013 of \$12.6 million, or \$0.17 per diluted share, compared to net income of \$14.2 million, or \$0.18 per diluted share, for the year ended December 31, 2012. Both the low interest rate environment and lower loan balances caused net interest income to decrease \$15.7 million to \$123.7 million for 2013 compared to \$139.4 million in 2012.

The Federal Reserve Board continues to hold short term interest rates at historic lows and expects rates to remain low throughout 2015. The low rate environment has impacted the yield on our investment portfolio as maturing investments and liquidity generated by prepayments and pay-offs of our loan portfolio were re-invested at lower interest rates. Elevated unemployment, slow economic growth, and continued economic uncertainty has resulted in a slow recovery and limited consumer consumption. Additionally, capital spending and investing by businesses has remained sluggish given the slow and uneven economic recovery. This resulted in low loan demand throughout 2013 and was a driver of our loan portfolio decreasing \$105.5 million, or 4.3%, to \$2.3 billion at December 31, 2013 from \$2.4 billion at December 31, 2012.

During 2013, our asset quality metrics showed continued signs of improvement. Our non-performing loans, including loans 90 days past due and still accruing, decreased to \$76.2 million at December 31, 2013, compared to \$92.4 million at December 31, 2012. Net charge-offs during the year ended December 31, 2013 were \$15.0 million compared to \$24.6 million for the year ended December 31, 2012. As a result of the improvement our asset quality metrics, we were able to reduce our provision for loan losses during 2013 compared to the prior year. At December 31, 2013, the Bank's allowance for loan losses totaled \$55.6 million, or 2.38% of total loans, compared to \$57.6 million, or 2.36% of total loans, at December 31, 2012.

During 2013, our Board of Directors approved a new stock repurchase program that enabled us to acquire up to 4,000,000 shares, or 12.0%, of the Company's publicly held common stock outstanding. The shares may be purchased in the open market or in privately negotiated transactions from time to time depending upon market conditions. We repurchased 2,193,652 shares of our outstanding common during the year ended December 31, 2013, which increased total treasury shares to 5,175,681.

We continue to maintain strong levels of capital and our capital ratios are well in excess of the levels required to be considered well-capitalized under applicable federal regulations. The Bank's tier 1 leverage ratio increased to 10.22% at December 31, 2013 compared to 9.53% at December 31, 2012 and the Bank's total risk based capital ratio increased to 21.83% at December 31, 2013 compared to 20.50% at December 31, 2012.

We believe that our strong capital profile positions us to advance our growth strategy by working with our customers to help them save and use credit wisely. It also allows us to continue to dedicate financial and human capital to support organizations that share our sense of responsibility to do what's right for the communities we serve. We remain committed to the financial responsibility we have practiced throughout our 160 year history, and we are dedicated to providing financial education opportunities to our customers by providing the tools necessary to make wise financial decisions.

In order to further improve our operating returns, we continue to leverage our position as one of the largest and oldest banks headquartered in the Philadelphia metropolitan area. We are focused on acquiring and retaining customers, and then educating them by aligning our products and services to their financial needs. We also intend to deploy some of our excess capital to grow the Bank in our markets.

Department of Justice Investigation

In the first quarter of 2013, we received notice that we were being investigated by the Department of Justice ("DOJ") for potential violations of the Equal Credit Opportunity Act and Fair Housing Act relating to our home-mortgage lending practices from January 1, 2008 to the present. Specifically, the DOJ indicated to us that it was looking for statistical and other indicators of a pattern and practice of persistent disparities with regard to our home-mortgage lending practices.

In December 2012, the Federal Deposit Insurance Corporation (FDIC) referred us to the DOJ as a result of a regularly scheduled fair housing examination that included a statistical analysis of our denial rates of both minority and non-minority loan applicants for a five year period. That statistical analysis showed a higher rejection rate for minority applicants, but only considered limited information related to our credit standards that we apply to all applicants in our decision making process. It was on the basis of this statistical analysis that the DOJ announced its investigation.

In response to the DOJ's investigation, we hired outside counsel and economists to conduct an internal investigation. At this time, and to the best of our knowledge, we are not aware of any wrongdoing.

In late January 2014, we received correspondence from the DOJ indicating that the DOJ had completed its review and determined that the matter did not require enforcement action by the DOJ and was being referred back to the FDIC. We are not able to determine whether further action will be taken at this point with respect to the ultimate resolution of this matter and we are in discussions with the FDIC Staff. Until this matter is resolved, it is unlikely that we will be filing any regulatory applications related to strategic expansion or regarding a second step conversion.

Our non-interest expense for the year ended December 31, 2013 includes \$711 thousand of costs associated with a second step transaction that we were evaluating directly before the DOJ fair lending investigation.

We remain focused on improving profitability and we are making a number of investments in brand, technology and our compliance and business control teams to drive future growth. Although these investments may result in lower profitability in the short-term, we believe that ultimately they will drive future profitability and value for our shareholders.

Business Strategy

Our business strategy is to continue to operate and grow a profitable community-oriented financial institution. We plan to achieve this by executing our strategy of:

- Differentiating Beneficial Bank as a community bank that educates its customers to "do the right thing" financially by providing them with the tools necessary to make wise financial decisions;

- Promoting the “Beneficial Conversation” with our customers, in which we endeavor to learn more about their life stage, needs and goals and educate them on our products and services that can allow them to achieve their financial needs and goals;
- Expanding our franchise by selectively pursuing acquisition opportunities in or adjacent to our market area;
- Pursuing opportunities to grow our commercial banking and small business lending by offering an enhanced product set through integrated delivery channels;
- Using what we believe are consistent, disciplined underwriting practices to maintain the quality of our loan portfolio; and
- Investing in talent, brand and technology to drive future growth.

Differentiating Beneficial Bank as a community bank that educates its customers to “do the right thing” financially by providing them with the tools necessary to make wise financial decisions

We are committed to educating our customers to “do the right thing” financially by providing them with the tools necessary to make wise financial decisions. During 2013, we launched a new marketing campaign and brand refresh designed to highlight the Bank’s commitment to financial education. Along with the introduction of a new “Your Knowledge Bank” tagline, the campaign was part of an ambitious communications initiative rooted in what has always been the core mission of Beneficial Bank – to provide customers with the tools, knowledge and guidance to help them do what’s right and make wise financial decisions. We continue to build conversations and financial plans around customers’ needs, life stages and priorities. We also successfully introduced the New BenMobile application, which brings the features of online banking to our mobile banking customers, making it easier to access account information and perform transactions including balance transfers and remote deposit capture. This new channel is being adopted rapidly by our customer base.

Promoting the “Beneficial Conversation” with our customers, which enables us to learn more about their life stage, needs and goals and educate them on our products and services that can allow them to achieve their goals

We seek to understand our customers’ financial needs and goals through a conversational approach known as the “Beneficial Conversation.” We have developed a sophisticated training program centered around the Beneficial Conversation in an effort to familiarize our employees with our broad array of financial products, including the cash management, insurance and other related retail services we provide. We require that all of our employees become fluent and certified in this conversational approach to customer interaction, and we have implemented the “Beneficial Conversation” in our branch offices as well as through digital social media outlets. The Beneficial Conversation is a continuous, multi-step process that enables us to better understand a customer’s current financial state, future financial goals and the best path towards achieving those goals. Once we develop such an understanding, we then educate the customer on the products and services we offer that best help them attain their financial goals. We believe that this approach to understanding our customers’ financial needs will distinguish us from other regional and local community banks and that we can increase services to our existing customers and acquire new customers through the implementation of the Beneficial Conversation by our employees.

Expanding our franchise by selectively pursuing acquisition opportunities in or adjacent to our market area

In recent years, we have executed our growth strategy by acquiring other financial institutions and financial service corporations primarily in or adjacent to our existing market areas. In July 2007, in connection with the consummation of its initial public offering, Beneficial Mutual Bancorp acquired FMS Financial Corporation and its wholly owned subsidiary, Farmers & Mechanics Bank. In April 2012, Beneficial Mutual Bancorp acquired SE Financial Corp. and its wholly owned subsidiary, St. Edmond’s Federal Savings Bank. These acquisitions increased our market share and solidified our position as the largest Philadelphia-based bank operating solely in the greater Philadelphia metropolitan area. In 2005, Beneficial Insurance Services LLC, a wholly owned subsidiary of Beneficial Bank, acquired the assets of a Philadelphia-based insurance brokerage firm, Paul Hertel & Co., Inc., which provided property, casualty, life, health and benefits insurance services to individuals and businesses. In 2007, Beneficial Insurance Services acquired the business of CLA Agency, Inc., a full-service property and casualty and professional liability insurance brokerage company headquartered in Newtown Square, Pennsylvania. We believe that changes in the regulatory environment as well as continued economic challenges for the banking industry have created and will create acquisition opportunities for us. We also believe that we are well positioned to execute on our growth strategies and to continue to pursue selective acquisitions of other financial institutions and financial services companies primarily in and adjacent to our existing market area due to our strong capital position.

Pursuing opportunities to grow our commercial banking and small business lending by offering an enhanced product set through integrated delivery channels

We have a diversified loan portfolio which includes commercial real estate and commercial and industrial loans made to middle market and small business customers. We are focused on improving the mix of our loan portfolio by increasing the amount of our commercial loans. Commercial loan customers provide us with an opportunity to offer a full range of our products and services including cash management, insurance, loans, and deposits. We have added resources with

significant experience in our marketplace to our commercial lending group over the past year and are committed to growing our commercial banking businesses. We are also focused on small business lending. At December 31, 2013, we had \$108.3 million in small business loans, which represented approximately 4.6% of total loans. Small business loans provide diversification to our loan portfolio and, because these loans are based upon rate indices that are higher than those used for one-to four-family loans, they improve the interest sensitivity of our assets. We currently offer a wide array of lending and deposit products that we can effectively market to our small business customers to increase our small business market share. To better capitalize on these opportunities, in recent years, we restructured our lending department and created a dedicated team of small business lenders who work with our branches and focus solely on small business lending. We intend to expand our team of small business lenders in order to increase our small business loan portfolio in future years.

Using what we believe are consistent, disciplined underwriting practices to maintain the quality of our loan portfolio

We believe that maintaining high asset quality is a key to long-term financial success. In recent years, weaknesses in the local commercial real estate market have had a significant impact on our financial results. Over the past several years, in an effort to improve asset quality, we have strengthened and added additional resources to our lending and credit teams and, have continued to apply underwriting standards that are prudent and disciplined and have continued to diligently monitor collection efforts. As a result of these efforts, we have improved our asset quality over the past three years. Accordingly, a provision for loan losses of \$13.0 million was recorded for the year ended December 31, 2013 compared to provisions of \$28.0 million and \$37.5 million for the years ended December 31, 2012 and 2011, respectively. Non-performing assets have decreased from a high of \$162.9 million at December 31, 2009 to \$82.0 million at December 31, 2013. We maintain our philosophy of managing large loan exposures through our consistent, disciplined approach to lending, and our proactive approach to managing existing credits.

Investing in talent, brand and technology to drive future growth

We are committed to investing in highly qualified employees in key areas of the Bank such as the build out of our lending team to focus on the growth of our loan portfolio as well as compliance and business control teams to ensure compliance with current and future regulations. We continue to invest in the Beneficial brand to position ourselves as the “Knowledge Bank.” We will also invest in advances in technology and systems to position us for future growth and opportunities.

Recent Industry Consolidation

The banking industry has experienced consolidation in recent years, which is likely to continue in future periods. Consolidation may affect the markets in which we operate as competitors integrate newly acquired businesses, adopt new business and risk management practices or change products and pricing as they attempt to maintain or grow market share and maximize profitability. Merger activity involving national, regional and community banks and specialty finance companies in the Philadelphia metropolitan area, has and will continue to impact the competitive landscape in the markets we serve. We believe that there are opportunities to continue to grow via acquisition in our markets and expect that acquisitions will continue to be a key part of our future growth strategy. Management continually monitors our primary market areas and assesses the impact of industry consolidation, as well as the practices and strategies of our competitors, including loan and deposit pricing and customer behavior.

Current Regulatory Environment

The current risk-based capital guidelines that apply to the Bank are based on the 1988 capital accord of the International Basel Committee on Banking Supervision (“Basel Committee”), a committee of central banks and bank supervisors, as implemented by the Federal Reserve Board. In 2004, the Basel Committee published a new capital accord, which is referred to as “Basel II,” to replace Basel I. Basel II provides two approaches for setting capital standards for credit risk: an internal ratings-based approach tailored to individual institutions’ circumstances and a standardized approach that bases risk weightings on external credit assessments to a much greater extent than permitted in existing risk-based capital guidelines, which became effective in 2008 for large international banks (total assets of \$250 billion or more or consolidated foreign exposure of \$10 billion or more). Other U.S. banking organizations can elect to adopt the requirements of this rule (if they meet applicable qualification requirements), but they are not required to apply them. Basel II emphasizes internal assessment of credit, market and operational risk, as well as supervisory assessment and market discipline in determining minimum capital requirements.

In December 2010 and January 2011, the International Basel Committee on Banking Supervision, a committee of central banks and bank supervisors, published the final texts of reforms on capital and liquidity, which is referred to as “Basel III.” On July 2, 2013, the Federal Reserve Board approved the final Basel III capital rules, establishing unique standards for all depository institutions, top-tier bank holding companies with total consolidated assets of \$500 million or more, and top-tier savings and loan holding companies (such as the Company). The effective date of the implementation of Basel III is January 1, 2015 for the Bank. When fully phased-in on January 1, 2019, Basel III will require banks to maintain: (i) 4.5% Common Equity Tier 1 to risk-weighted assets; (ii) 6.0% Tier 1 capital to risk-weighted assets; and (iii) 8.0% Total capital to risk-weighted assets. Each of these ratios will also require an additional 2.5% of common equity Tier 1 capital to risk-weighted assets “capital conservation buffer” on top of the minimum requirements.

As of December 31, 2013, our current capital levels exceed the required capital amounts to be considered “well capitalized” and we believe they also meet the fully-phased in minimum capital requirements, including the related capital conservation buffers, as required by the Basel III capital rules.

On July 21, 2010, President Obama signed the Dodd–Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”). In addition to eliminating the Office of Thrift Supervision and creating the Consumer Financial Protection Bureau, the Dodd-Frank Act, among other things, repealed non-payment of interest on commercial demand deposits, requires changes in the way that institutions are assessed for deposit insurance, mandates the imposition of consolidated capital requirements on savings and loan holding companies, forces originators of securitized loans to retain a percentage of the risk for the transferred loans, requires regulatory rate-setting for certain debit card interchange fees and contains a number of reforms related to mortgage origination. Many of the provisions of the Dodd-Frank Act are subject to delayed effective dates and require the issuance of implementing regulations. Their impact on operations cannot yet be fully assessed by management. However, there is a significant possibility that the Dodd-Frank Act will, at a minimum, result in increased regulatory burden, compliance costs and interest expense as well as potential reduced fee income for the Bank, the Company and the MHC.

Effective July 21, 2011, we began offering interest on certain commercial checking accounts as permitted by the Dodd-Frank Act. We have been actively marketing full service commercial checking accounts that include interest earned on these funds. Interest paid on commercial checking accounts will increase our interest expense in the future.

Current Interest Rate Environment

Net interest income represents a significant portion of our revenues. Both the low interest rate environment, which has reduced the yields on our investment and loan portfolios, and lower loan balances, as a result of high commercial loan repayments and continued weak loan demand, caused net interest income to decrease. During the year ended December 31, 2013, we reported net interest income of \$123.7 million, a decrease of \$15.7 million, or 11.3%, from the year ended December 31, 2012. The decrease in net interest income during the year ended December 31, 2013 compared to the same period last year was primarily the result of a decline in the average rate on interest earning assets, partially offset by a reduction in the average cost of our liabilities, particularly municipal deposits. Net interest margin decreased 32 basis points, totaling 2.81% for the year ended December 31, 2013 as compared to 3.13% for the year ended December 31, 2012. We have been able to lower the average cost of our liabilities to 0.69% for the year ended December 31, 2013 compared to 0.82% for the year ended December 31, 2012 by re-pricing higher cost deposits. The reduction in deposit costs has been primarily due to decreasing rates on our municipal deposits and money market accounts. We expect that the persistently low interest rate environment will continue to lower yields on our investment and loan portfolios to a greater extent than we can reduce rates on deposits and other interest bearing liabilities, which will put pressure on net interest margin in future periods. Net interest margin in future periods will be impacted by several factors such as, but not limited to, our ability to grow and retain low cost core deposits, the future interest rate environment, loan and investment prepayment rates, loan growth and changes in non-accrual loans.

Critical Accounting Policies

In the preparation of our consolidated financial statements, we have adopted various accounting policies that govern the application of accounting principles generally accepted in the United States. Our significant accounting policies are described in Note 2 to the Consolidated Financial Statements included in this Annual Report.

Certain accounting policies involve significant judgments and assumptions by us that have a material impact on the carrying value of certain assets and liabilities. We consider these accounting policies to be critical accounting policies. The judgments and assumptions we use are based on historical experience and other factors, which we believe to be reasonable under the circumstances. Actual results could differ from these judgments and estimates under different conditions, resulting in a change that could have a material impact on the carrying values of our assets and liabilities and our results of operations.

Allowance for Loan Losses. We consider the allowance for loan losses to be a critical accounting policy. The allowance for loan losses is determined by management based upon portfolio segment, past experience, evaluation of estimated loss and impairment in the loan portfolio, current economic conditions and other pertinent factors. Management also considers risk characteristics by portfolio segments including, but not limited to, renewals and real estate valuations. The allowance for loan losses is maintained at a level that management considers appropriate to provide for estimated losses and impairment based upon an evaluation of known and inherent risk in the loan portfolio. Loan impairment is evaluated based on the fair value of collateral or estimated net realizable value. While management uses the best information available to make such evaluations, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluations.

The allowance for loan losses is established through a provision for loan losses charged to expense which is based upon past loan loss experience and an evaluation of estimated losses in the current loan portfolio, including the evaluation of impaired loans. Determining the amount of the allowance for loan losses necessarily involves a high degree of judgment. Among the material estimates or judgments required to establish the allowance are: overall economic conditions; value of collateral; strength of guarantors; loss exposure at default; the amount and timing of future cash flows on impaired loans; and determination of loss factors to be applied to the various elements of the portfolio. All of these estimates are susceptible to significant change. Management regularly reviews the level of loss experience, current economic

conditions and other factors related to the collectability of the loan portfolio. Although we believe that we use the best information available to establish the allowance for loan losses, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluation. In addition, the FDIC and the Pennsylvania Department of Banking and Securities ("the Department"), as an integral part of their examination process, periodically review our allowance for loan losses. Such agencies may require us to recognize adjustments to the allowance based on judgments about information available to them at the time of their examination.

Our financial results are affected by the changes in and the absolute level of the allowance for loan losses. The establishment of the allowance for loan losses involves our analysis of complex internal and external variables, and it requires that we exercise judgment to estimate an appropriate allowance for loan losses. As a result of the uncertainty associated with this subjectivity, we cannot assure the precision of the amount reserved, should we experience sizeable loan losses in any particular period. For example, changes in the financial condition of individual borrowers, economic conditions, or the condition of various markets in which collateral may be sold could require us to significantly increase the level of the allowance for loan losses. Such an adjustment could materially affect net income as a result of the change in provision for credit losses. For example, a change in the estimate resulting in a 10% to 20% difference in the allowance would have resulted in an additional provision for credit losses of \$1.3 million to \$2.6 million for the year ended December 31, 2013. We also have approximately \$82.0 million in non-performing assets consisting of non-performing loans and other real estate owned. Most of these assets are collateral dependent loans where we have incurred significant credit losses to write the assets down to their current appraised value less selling costs. We continue to assess the realizability of these loans and update our appraisals on these loans each year. To the extent the property values continue to decline, there could be additional losses on these non-performing assets which may be material. For example, a 10% decrease in the collateral value supporting the non-performing assets could result in additional credit losses of \$8.2 million. During the year ended December 31, 2013, we began to experience a decline in levels of delinquencies, net charge-offs and non-performing assets. Management considered these market conditions in deriving the estimated allowance for loan losses; however, the ultimate amount of loss could vary from that estimate.

Goodwill and Intangible Assets. The acquisition method of accounting for business combinations requires us to record assets acquired, liabilities assumed and consideration paid at their estimated fair values as of the acquisition date. The excess of consideration paid over the fair value of net assets acquired represents goodwill. Goodwill totaled \$122.0 at December 31, 2013 and December 31, 2012.

Goodwill and other indefinite lived intangible assets are not amortized on a recurring basis, but rather are subject to periodic impairment testing. During the quarter ended December 31, 2011, we adopted the amendments included in Accounting Standards Update ("ASU") 2011-08, which allow an entity to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test.

During 2013, management reviewed qualitative factors for the Bank, which represents \$112.7 million of our goodwill balance, including financial performance, market changes and general economic conditions and noted there was not a significant change in any of these factors as compared to 2012. Accordingly, it was determined that it was more likely than not that the fair value of the Banking unit continued to be in excess of its carrying amount as of December 31, 2013. Additionally during 2013, we assessed the qualitative factors related to Beneficial Insurance Services, LLC, which represents \$9.3 million of our goodwill balance and determined that the two-step quantitative goodwill impairment test was warranted. Beneficial Insurance Services, LLC has experienced declining revenues and profitability over the past few years. We performed a two-step quantitative goodwill impairment for Beneficial Insurance Services, LLC based on estimates of the fair value of equity using discounted cash flow analyses as well as guideline company and guideline transaction information. The inputs and assumptions are incorporated in the valuations including projections of future cash flows, discount rates, the fair value of tangible and intangible assets and liabilities, and applicable valuation multiples based on the guideline information. Based on our latest annual impairment assessment of Beneficial Insurance Services, LLC and their current and projected financial results, we believe that the fair value is in excess of the carrying amount. As a result, management concluded that there was no impairment of goodwill as of December 31, 2013. Although, we concluded that no impairment of goodwill existed for Beneficial Insurance Services, LLC, any further declines in financial performance for Beneficial Insurance Services, LLC could result in potential goodwill impairment in future periods.

Other intangible assets subject to amortization are evaluated for impairment in accordance with authoritative guidance. An impairment loss will be recognized if the carrying amount of the intangible asset is not recoverable and exceeds fair value. The carrying amount of the intangible is not considered recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use of the asset. During 2013, management reviewed qualitative factors for its intangible assets and determined that it was more likely than not that the fair value of the intangible assets was greater than their carrying amount. During 2012, management recorded an impairment charge of \$773 thousand related to the customer list intangible due to the fact that the expected cash flows from the customer list intangible were less than the carrying amount of the customer list intangible. The impairment charge was determined by the difference between the fair value of the customer list intangible and the carrying amount of the customer list intangible.

Income Taxes. We are subject to the income tax laws of the various jurisdictions where we conduct business and estimate income tax expense based on amounts expected to be owed to these various tax jurisdictions. The estimated income tax expense (benefit) is reported in the Consolidated Statements of Income. The evaluation pertaining to the tax expense and related tax asset and liability balances involves a high degree of judgment and subjectivity around the ultimate measurement and resolution of these matters.

Accrued taxes represent the net estimated amount due to or to be received from tax jurisdictions either currently or in the future and are reported in other assets on the Company's consolidated statements of financial condition. We assess the appropriate tax treatment of transactions and filing positions after considering statutes, regulations, judicial precedent and other pertinent information and maintain tax accruals consistent with our evaluation. Changes in the estimate of accrued taxes occur periodically due to changes in tax rates, interpretations of tax laws, the status of examinations by the tax authorities and newly enacted statutory, judicial and regulatory guidance that could impact the relative merits of tax positions. These changes, when they occur, impact accrued taxes and can materially affect our operating results. We regularly evaluate our uncertain tax positions and estimate the appropriate level of reserves related to each of these positions.

As of December 31, 2013, the Bank had net deferred tax assets totaling \$48.6 million. These deferred tax assets can only be realized if the Bank generates taxable income in the future. The Bank regularly evaluates the realizability of deferred tax asset positions. In determining whether a valuation allowance is necessary, the Bank considers the level of taxable income in prior years to the extent that carrybacks are permitted under current tax laws, as well as estimates of future pre-tax and taxable income and tax planning strategies that would, if necessary, be implemented. The Bank currently maintains a valuation allowance for certain state net operating losses, other-than-temporary impairments, and a charitable contribution carryover that, if not fully utilized, will expire in 2015, that management believes it is more likely than not that such deferred tax assets will not be realized. The Bank expects to realize the remaining deferred tax assets over the allowable carryback and/or carryforward periods. Therefore, no valuation allowance is deemed necessary against its remaining federal or state deferred tax assets as of December 31, 2013. However, if an unanticipated event occurred that materially changed pre-tax book income and taxable income in future periods, an increase in the valuation allowance may become necessary and it could be material to the Bank's financial statements.

Postretirement Benefits. Several variables affect the annual cost for our defined benefit retirement programs. The main variables are: (1) size and characteristics of the employee population, (2) discount rate, (3) expected long-term rate of return on plan assets, (4) recognition of actual asset returns, and (5) other actuarial assumptions. Below is a brief description of these variables and the effect they have on our pension costs.

Size and Characteristics of the Employee Population. Pension cost is directly related to the number of employees covered by the plans, and other factors including salary, age, years of employment, and benefit terms. Effective June 30, 2008, plan participants ceased to accrue additional benefits under the existing pension benefit formula and their accrued benefits were frozen.

Discount Rate. The discount rate is used to determine the present value of future benefit obligations. The discount rate for each plan is determined by matching the expected cash flows of each plan to a yield curve based on long-term, high quality fixed income debt instruments available as of the measurement date, December 31, 2013. The discount rate for each plan is reset annually or upon occurrence of a triggering event on the measurement date to reflect current market conditions.

If we were to assume a 0.25% increase/decrease in the discount rate for all retirement and other postretirement plans, and keep all other assumptions constant, the benefit cost would decrease/increase by approximately \$164 thousand.

Expected Long-term Rate of Return on Plan Assets. Based on historical experience, market projections, and the target asset allocation set forth in the investment policy for the retirement plans, the pre-tax expected rate of return on plan assets was 7.45% for 2013 compared to 8.0% for 2012. This expected rate of return is dependent upon the asset allocation decisions made with respect to plan assets. Annual differences, if any, between expected and actual returns are included in the unrecognized net actuarial gain or loss amount. We generally amortize any unrecognized net actuarial gain or loss in excess of 10% in net periodic pension expense over the average future service of active employees, which is approximately seven years, or average future lifetime for plans with no active participants that are frozen. For details on changes in the pension benefit obligation and the fair value of plan assets, see Note 17 to the Company's consolidated financial statements included in this Annual Report.

If we were to assume a 0.25% increase/decrease in the expected long-term rate of return for the retirement and other postretirement plans, and all other actuarial assumptions remained constant, the benefit cost would decrease/increase by approximately \$209 thousand.

Recognition of Actual Asset Returns. Accounting guidance allows for the use of an asset value that smoothes investment gains and losses over a period up to five years. However, we have elected to use a preferable method in determining pension cost. This method uses the actual market value of the plan assets. Therefore, we will experience more variability in the annual pension cost, as the asset values will be more volatile than companies who elected to "smooth" their investment experience.

Other Actuarial Assumptions. To estimate the projected benefit obligation, actuarial assumptions are required with respect to factors such as mortality rate, turnover rate, retirement rate and disability rate. These factors do not tend to change significantly over time, so the range of assumptions, and their impact on pension cost, is generally limited. We annually review the assumptions used based on historical and expected future experience.

In addition to our defined benefit programs, we offer a defined contribution plan ("401(k) Plan") covering substantially all of our employees. During 2008, in conjunction with freezing benefit accruals under the defined benefit program, we enhanced our 401(k) Plan and combined it with a recently formed Employee Stock Ownership Plan ("ESOP") to form the Beneficial Mutual Savings Bank Employee Savings and Stock Ownership Plan ("KSOP"). While the KSOP is one plan, the

two separate components of the 401(k) Plan and ESOP remain. Under the KSOP, we make basic and matching contributions as well as additional contributions for certain employees based on age and years of service. We may also make discretionary contributions. Each participant's account is credited with shares of the Company's stock or cash based on compensation earned during the year. For additional information, refer to Note 18 to the Company's Consolidated Financial Statements included in this Annual Report.

Balance Sheet Analysis

Securities

At December 31, 2013, our investment portfolio, excluding Federal Home Loan Bank ("FHLB") stock, was \$1.56 billion, or 34.1% of total assets. At December 31, 2013, 93.4% of the investment portfolio was comprised of mortgage-backed securities issued by Freddie Mac and Fannie Mae and the Government National Mortgage Association ("GNMA"), including collateralized mortgage obligations ("CMO") securities issued by Freddie Mac and Fannie Mae. At December 31, 2013, our investment portfolio also included 4.5% of municipal bonds and 0.8% of government-sponsored enterprise ("GSE") and government agency notes. The remaining 1.3% of our investment portfolio consisted primarily of foreign bonds, mutual funds and money market funds. During 2013, we invested primarily into other mortgage-backed securities (GSEs) issued by Freddie Mac and Fannie Mae. The GSE mortgage-backed securities amortize over their estimated life and therefore provide a constant source of liquidity.

In order to mitigate the credit risk related to the Company's held-to-maturity and available-for-sale portfolios, the Company monitors the ratings of its securities. As of December 31, 2013, approximately 94.2% of the Company's portfolio consisted of direct government obligations, government sponsored enterprise obligations or securities rated AAA by Moody's and/or S&P. In addition, at December 31, 2013, approximately 4.3% of the investment portfolio was rated below AAA but rated investment grade by Moody's and/or S&P and approximately 1.5% of the investment portfolio was not rated. Securities not rated consist primarily of short-term municipal anticipation notes, private placement municipal bonds, equity securities, mutual funds and bank certificates of deposit.

The following table sets forth the cost and fair value of investment securities at December 31, 2013, 2012 and 2011.

December 31, (Dollars in thousands)	2013		2012		2011

Mortgage-backed securities are a type of asset-backed security that is secured by a mortgage, or a collection of mortgages. These securities usually pay periodic payments that are similar to coupon payments. Furthermore, the mortgage must have originated from regulated and authorized financial institutions. The contractual cash flows of investments in government sponsored enterprises' mortgage-backed securities are debt obligations of Freddie Mac and Fannie Mae, both of which are currently under the conservatorship of the Federal Housing Finance Agency ("FHFA"). The cash flows related to GNMA securities are direct obligations of the U.S. Government. Mortgage-backed securities are also

known as mortgage pass-throughs. CMOs are a type of mortgage-backed security that create separate pools of pass-through rates for different classes of bondholders with varying cash flow structures, called tranches. The repayments from the pool of pass-through securities are used to retire the bonds in the order specified by the bonds' prospectuses. At December 31, 2013, we had no investments in a single company or entity (other than United States government sponsored enterprise securities) that had an aggregate book value in excess of 10% of our equity.

At December 31, 2013 and 2012, securities totaling \$1.2 billion and \$101.5 million, respectively, were in an unrealized loss position and the unrealized losses on these securities totaled \$34.7 million and \$2.2 million, respectively. The increase in unrealized losses on securities was primarily due to an increase in intermediate and long-term interest rates in the second half of 2013. When evaluating for impairment, we consider the duration and extent to which fair value is less than cost, the credit worthiness and near-term prospects of the issuer, the likelihood of recovering our investment, whether we have the intent to sell the investment, or whether it is more likely than not that we will be required to sell the investment before recovery, and other available information to determine the nature of the decline in market value of the securities.

At December 31, 2013, the unrealized losses in the portfolio were mainly attributed to its GSEs mortgage-backed securities and its GSE CMOs. The unrealized losses are due to current interest rate levels relative to our cost and not credit quality. As we do not intend to sell the investments, and it is not likely we will be required to sell the investments prior to recovery, we do not consider the investments to be other than temporarily impaired at December 31, 2013. During 2013 and 2012, we did not record any impairment charges for securities.

During 2013, we sold \$6.2 million of pooled trust securities that resulted in a \$1.2 million loss due to the uncertainty regarding banking institutions being allowed to hold pooled trust preferred securities under the Volcker Rule that was issued in December 2013. These securities were in a \$740 thousand unrealized loss position at the time of the sale.

The following table sets forth the stated maturities and weighted average yields of investment securities at December 31, 2013. Certain securities have adjustable interest rates and may reprice monthly, quarterly, semi-annually or annually within the various maturity ranges. Mutual funds and money market funds are not included in the table based on lack of a maturity date. The investment portfolio consists of \$1.5 billion of fixed rate securities and \$26.5 million in adjustable rate securities at December 31, 2013.

Loans

At December 31, 2013, total loans were \$2.29 billion, or 51.1% of total assets, compared to \$2.39 billion, or 48.9% of total assets, at December 31, 2012. Total loans decreased \$105.5 million, or 4.3%, during the year ended December 31, 2013. Despite total loan originations of \$560.4 million during the year ended December 31, 2013, our loan portfolio decreased as a result of high commercial loan repayments and continued weak loan demand. The increase in intermediate and long term interest rates during the year also resulted in lower mortgage loan originations. Throughout 2013, we held in portfolio the majority of our agency eligible mortgage production as the yields on these mortgages were attractive compared to the rates available on investment securities.

The following table shows the loan portfolio at the dates indicated:

December 31, (Dollars in thousands)	2013		2012		2011		2010		2009

Loan Maturity

The following table sets forth certain information at December 31, 2013 regarding the dollar amount of loan principal repayments becoming due during the periods indicated. The tables do not include any estimate of prepayments which significantly shorten the average life of all loans and may cause our actual repayment experience to differ from that shown below. Demand loans having no stated schedule of repayments and no stated maturity are reported as due in one year or less. Our adjustable-rate mortgage loans generally do not provide for downward adjustments below the initial discounted contract rate. When market interest rates rise, the interest rates on these loans may increase based on the contract rate (the index plus the margin) exceeding the initial interest rate floor.

Deposits

Our deposit base is comprised of demand deposits, money market and passbook accounts and time deposits. Deposits decreased \$267.5 million, or 6.8%, to \$3.66 billion at December 31, 2013 from \$3.92 billion at December 31, 2012. The decrease in deposits during the year ended December 31, 2013 was primarily the result of a \$228.6 million decrease in municipal deposits which was consistent with the planned run-off associated with our re-pricing of higher-cost, non-relationship-based municipal accounts as well as decreases in non-interest bearing deposits and money market accounts. Municipal checking accounts consisted of approximately 758 accounts with an average balance of \$505 thousand at December 31, 2013 compared to 1,346 accounts with an average balance of \$473 thousand at December 31, 2012.

The following table sets forth the deposits as a percentage of total deposits for the periods indicated:

At December 31, (Dollars in thousands)	2013		2012		2011	
	Amount	Percent of Total Deposits	Amount	Percent of Total Deposits	Amount	Percent of Total Deposits
Non-interest bearing deposits	\$ 291,109	7.9%	\$328,892	8.4%	\$ 278,968	7.8%
Interest-earning checking accounts	686,582	18.8	663,737	16.9	485,160	13.5
Municipal checking accounts	383,043	10.5	611,599	15.6	679,055	18.9
Money market accounts	441,881	12.1	496,508	12.6	529,877	14.7
Savings accounts	1,127,339	30.8	1,037,424	26.4	783,388	21.8
Certificates of deposit	730,062	19.9	789,353	20.1	838,354	23.3
Total	\$3,660,016	100.0%	\$3,927,513	100.0%	\$3,594,802	100.0%

We are required to pledge securities to secure municipal deposits. At December 31, 2013 and 2012, we had pledged \$296.8 million and \$438.4 million, respectively, of securities to secure these deposits.

The following table sets forth the time remaining until maturity for certificate of deposits of \$100,000 or more at December 31, 2013.

December 31, 2013 (Dollars in thousands)	Certificates of Deposit
Maturity Period:	
Three months or less	\$ 23,742
Over three through six months	20,898
Over six through twelve months	34,951
Over twelve months	55,652
Total	\$135,243

The following table sets forth the deposit activity for the periods indicated:

Year Ended December 31, (Dollars in thousands)	2013	2012	2011
Beginning balance	\$3,927,513	\$3,594,802	\$3,942,304
(Decrease) Increase before interest credited	(285,251)	34,714	(377,426)

Deposits acquired from SE Financial	-	275,293	-
Net (decrease) increase in deposits	(267,497)	332,711	(347,502)
Ending balance	\$3,660,016	\$3,927,513	\$3,594,802

Borrowings

We have the ability to utilize advances from the FHLB of Pittsburgh to supplement our liquidity. As a member, we are required to own capital stock in the FHLB and are authorized to apply for advances on the security of such stock and certain mortgage loans and other assets, provided certain standards related to creditworthiness have been met. Advances are made under several different programs, each having its own interest rate and range of maturities. We also utilize securities sold under agreements to repurchase and overnight repurchase agreements, along with the Federal Reserve Bank's discount window and Federal Funds lines with correspondent banks to supplement our supply of investable funds and to meet deposit withdrawal requirements. To secure our borrowings, we generally pledge securities and/or loans. The types of securities pledged for borrowings include, but are not limited to, agency GSE notes and agency mortgage-backed securities.

The following table sets forth the outstanding borrowings and weighted averages at the dates indicated:

Year Ended December 31,

Results of Operations for the Years Ended December 31, 2013, 2012, and 2011

Financial Highlights

We recorded net income of \$12.6 million for the year ended December 31, 2013 compared to net income of \$14.2 million for the year ended December 31, 2012 and net income of \$11.0 million for the year ended December 31, 2011. Net income for the year ended December 31, 2012 included \$2.2 million of merger charges related to the acquisition of SE Financial Corp. Net income for the year ended December 31, 2011 included \$5.1 million of restructuring charges related to the implementation of our expense management reduction program.

For the year ended December 31, 2013, we reported net interest income of \$123.7 million, a decrease of \$15.7 million, or 11.3%, from the year ended December 31, 2012. Net interest income was \$142.1 million for the year ended December 31, 2011. The decrease in net interest income during the year ended December 31, 2013 was primarily the result of reduced yields on the investment and loan portfolio and lower loan balances, as a result of prepayments and continued weak loan demand. We expect that the continued low interest rate environment will put pressure on net interest margin in future periods until we can begin to grow our loan portfolio and reduce the percentage of our balance sheet assets that are held in lower yielding cash and investments.

Credit costs have decreased during the year ended December 31, 2013 from the same period in 2012 and 2011 as a result of a decrease in levels of delinquencies, net charge-offs and non-performing assets. During the year ended December 31, 2013, we recorded a provision for loan losses of \$13.0 million compared to \$28.0 million for the year ended December 31, 2012 and \$37.5 million for the year ended December 31, 2011.

Summary Income Statements

The following table sets forth the income summary for the periods indicated:

Year Ended December 31, (Dollars in thousands)	2013	2012	2011	Change 2013/2012		Change 2012/2011	
				\$	%	\$	%
Net interest income	\$123,736	\$139,457	\$142,097	(\$15,721)	(11.27)%	(\$2,640)	(1.86)%
Provision for loan losses	13,000	28,000	37,500	(15,000)	(53.57)%	(9,500)	(25.33)%

Net Interest Income

Average Balance Table

The following table presents information regarding average balances of assets and liabilities, the total dollar amounts of interest income and dividends from average interest-earning assets, the total dollar amounts of interest expense on average interest-bearing liabilities, and the resulting annualized average yields and costs. The yields and costs for the periods indicated are derived by dividing income or expense by the average daily balances of assets or liabilities, respectively, for the periods presented. Loan fees are included in interest income on loans and are not material. Non-accrual loans are included in the average balances. In addition, yields are not presented on a tax-equivalent basis. Any adjustments necessary to present yields on a tax-equivalent basis are insignificant.

Rate/Volume Analysis. The following table sets forth the effects of changing rates and volumes on our net interest income. The rate column shows the effects attributable to changes in rate (changes in rate multiplied by prior volume). The volume column shows the effects attributable to changes in volume (changes in volume multiplied by prior rate). The net column represents the sum of the prior columns. Changes attributable to changes in both rate and volume that cannot be segregated have been allocated proportionally based on the changes due to rate and the changes due to volume.

Net change in net interest income	(\$5,215)	(\$10,506)	(\$15,721)	(\$4,840)	\$2,200	(\$2,640)

2013 vs. 2012. For the year ended December 31, 2013, net interest income decreased \$15.7 million, or 11.3%, to \$123.7 million from \$139.4 million for the year ended December 31, 2012. For the year ended December 31, 2013, total interest income decreased \$21.0 million, or 12.4%, to \$149.4 million from \$170.4 million for the year ended December 31, 2012. The low interest rate environment has resulted in a high number of prepayments in our investment and loan portfolios as borrowers have refinanced their existing loans to take advantage of low interest rates. The decrease in interest income during the year ended December 31, 2013 compared to the same period last year was primarily the result of a decline in the average rate earned on our investment and loan portfolios due to the low rate environment and a decline in the average balance of our loan portfolio driven by high commercial loan prepayments and weak loan demand. We have been able to reduce the cost of our interest bearing liabilities in 2013 with average rates decreasing to 0.69% for the year ended December 31, 2013 from 0.82% for the year ended December 31, 2012, by re-pricing higher cost deposits, particularly municipal deposits. For the year ended December 31, 2013, total interest expense decreased \$5.4 million, or 17.2%, to \$25.6 million from \$31.0 million for the year ended December 31, 2012 due to a decline in interest rates. During 2013, the average balance of our municipal deposits decreased \$160.5 million and the cost on municipal deposits decreased 21 basis points consistent with the planned run-off associated with our re-pricing of higher-cost, non-relationship-based municipal accounts. Also during 2013, the average balance of our certificates of deposit decreased \$60.6 million and the cost on certificates of deposit decreased 10 basis points. We believe that the low interest rate environment will continue to lower yields on our investment and loan portfolios to a greater extent than we can reduce rates on deposits which will put pressure on net interest margin in future periods.

2012 vs. 2011. For the year ended December 31, 2012, net interest income decreased \$2.7 million, or 1.9%, to \$139.4 million from \$142.1 million for the year ended December 31, 2011. For the year ended December 31, 2012, total interest income decreased \$9.7 million, or 5.4%, to \$170.4 million from \$180.1 million for the year ended December 31, 2011. The decrease in interest income was driven by excess levels of cash as a result of higher than normal commercial loan prepayments, weak overall loan demand and prepayments of higher yielding investments. We have been able to reduce the cost of our interest bearing liabilities in 2012 with average rates decreasing to 0.82% for the year ended December 31, 2012 from 1.01% for the year ended December 31, 2011, by reducing borrowings and re-pricing higher cost deposits, particularly municipal deposits. For the year ended December 31, 2012, total interest expense decreased \$7.0 million, or 18.6%, to \$31.0 million from \$38.0 million for the year ended December 31, 2011 due to a decline in interest rates. During 2012, the average balance of our certificates of deposit decreased \$59.4 million and the cost on certificates of deposit decreased 24 basis points. The rate on municipal deposits decreased 30 basis points to 0.48% at December 31, 2012 compared to 0.78% at December 31, 2011. We believe that the low interest rate environment will continue to lower yields on our investment and loan portfolios to a greater extent than we can reduce rates on deposits which will put pressure on net interest margin in future periods.

Provision for Loan Losses

A provision for loan losses of \$13.0 million was recorded for the year ended December 31, 2013 compared to provisions of \$28.0 million and \$37.5 million for the years ended December 31, 2012 and 2011, respectively. Credit costs have decreased for the year end December 31, 2013 compared to the same period in 2012. The decline in the provision for loan losses is consistent with the decline in delinquencies, net charge-offs and non-performing assets. Net charge-offs for the year ended December 31, 2013 were \$15.0 million, compared to \$24.6 million and \$28.7 million for the years ended December 31, 2012 and 2011, respectively. We charge-off any collateral or cash flow deficiency on all classified loans once they are 90 days delinquent. Government guaranteed student loans greater than 90 days delinquent continue to accrue interest as these loans are guaranteed by the government and have little risk of credit loss. The provision for loan losses was determined by management to be an amount necessary to maintain a balance of allowance for loan losses at a level that considers all known and current losses in the loan portfolio as well as potential losses due to unknown factors such as the economic environment. Changes in the provision were based on management's analysis of various factors such as: estimated fair value of underlying collateral, recent loss experience in particular segments of the portfolio, levels and trends in delinquent loans, and changes in general economic and business conditions.

At December 31, 2013, the allowance for loan losses totaled \$55.6 million, or 2.38% of total loans outstanding, compared to \$57.6 million, or 2.36% of total loans outstanding, as of December 31, 2012 and \$54.2 million, or 2.10% of total loans outstanding, as of December 31, 2011. An analysis of the changes in the allowance for loan losses is presented under "Risk Management—Analysis and Determination of the Allowance for Loan Losses" below.

Non-interest Income

The following table sets forth a summary of non-interest income for the periods indicated:

Year Ended December 31,	2013	2012	2011	Change 2013/2012		Change 2012/2011	
				\$	%	\$	%
(Dollars in thousands)							
Insurance commission income	\$7,170	\$7,389	\$ 7,720	(\$219)	(3.0)%	\$(331)	(4.3)%
Other services charges	11,458	10,182	9,763	1,276	12.5%	419	4.3
Mortgage banking income	1,017	2,731	916	(1,714)	(62.8)%	1,815	198.2
Gains on sale of investment securities available-for-sale	1,377	2,882	652	(1,505)	(52.2)%	2,230	342.0
Trading securities profits	-	-	81	-	-	(81)	100.0
Limited partnership losses and amortizations	(2,464)	(2,683)	(1,159)	219	8.2%	(1,524)	(131.5)
Bank owned life insurance	1,618	1,479	1,458	139	9.4%	21	1.4
Returned check charges	4,949	5,626	5,805	(677)	(12.0)%	(179)	(3.1)
Total	\$25,125	\$27,606	\$25,236	(\$2,481)	(9.0)%	\$2,370	9.4%

2013 vs. 2012. For the year ended December 31, 2013, non-interest income decreased \$2.5 million, or 9.0%, to \$25.1 million from \$27.6 million for the year ended December 31, 2012. The decrease was primarily due to a \$1.5 million decrease in the net gain on the sale of investment securities as a result of the loss recorded in connection with the sale of the pooled trust preferred securities, a \$1.7 million decrease in mortgage banking income given the decision to hold in portfolio the majority of our mortgage production and a \$677 thousand decline in returned check charges, partially offset by a \$639 thousand increase in debit card interchange fees and a \$550 thousand increase in account analysis charges.

2012 vs. 2011. For the year ended December 31, 2012, non-interest income increased \$2.4 million, or 9.4%, to \$27.6 million from \$25.2 million for the year ended December 31, 2011. The increase in non-interest income was primarily due to a \$2.2 million increase in gain on the sale of securities and a \$1.8 million increase in mortgage banking income, partially offset by \$1.5 million of additional amortization or impairment of limited partnership losses as we align the low income housing investments to the remaining tax credits.

Non-interest Expense

The following table sets forth an analysis of non-interest expense for the periods indicated:

(Dollars in thousands)				Change 2013/2012		Change 2012/2011	
	2013	2012	2011	\$	%	\$	%
Salaries and employee benefits	\$57,154	\$57,529	\$ 55,812	(\$375)	(0.7)%	\$1,717	3.1%
Occupancy expense	9,826	9,887	11,040	(61)	(0.6)	(1,153)	(10.4)
Depreciation, amortization and maintenance	9,026	8,919	8,683	107	1.2	236	2.7
Marketing expense	5,234	2,811	3,189	2,423	86.2	(378)	(11.9)
Amortization of intangibles	1,872	4,163	3,584	(2,291)	(55.0)	579	16.2
FDIC insurance	3,589	4,221	5,332	(632)	(15.0)	(1,111)	(20.8)
Merger and restructuring charges	(189)	2,233	5,058	(2,422)	(108.5)	(2,825)	(55.9)
Professional fees	5,058	5,396	4,380	(338)	(6.3)	1,016	23.2
Insurance expense	1,869	1,842	1,875	27	1.5	(33)	(1.8)
Printing and supplies	1,488	1,791	1,691	(303)	(16.9)	100	5.9
Correspondent bank charges	2,966	2,301	2,112	665	28.9	189	8.9
Postage expense	1,259	1,419	1,227	(160)	(11.3)	192	15.6
Internet banking	2,146	2,077	2,208	69	3.3	(131)	(5.9)
Debit card rewards	1,351	1,161	1,199	190	16.4	(38)	(3.2)
Real estate owned expenses	876	1,724	1,632	(848)	(49.2)	92	5.6
Real estate owned losses	1,306	3,077	781	(1,771)	(7.6)	2,296	294.0
Loan expenses	5,509	4,143	3,705	1,366	33.0	438	11.8
Other	10,348	8,431	7,202	1,917	22.7	1,229	17.1
Total	\$120,688	\$123,125	\$120,710	(\$2,437)	(2.0)%	\$2,415	2.0%

2013 vs. 2012. For the year ended December 31, 2013, non-interest expense decreased \$2.4 million, or 2.0%, to \$120.7 million from \$123.1 million for the year ended December 31, 2012. The decrease in non-interest expense was primarily due to a \$2.4 million decrease in merger and restructuring charges relating to our acquisition of SE Financial in 2012, a \$1.9 million decrease in classified loan and other real estate owned expenses due to improving asset quality metrics, a \$2.3 million decrease in intangible amortization expense as a result of intangibles assets that were fully amortized and a \$773 thousand intangible asset impairment charge recorded in the fourth quarter of 2012, and a \$632 thousand decrease in FDIC insurance expense as a result of a decline in average tangible assets during 2013. These decreases to non-interest expense were partially offset by a \$2.4 million increase in marketing expense associated with our 2013 brand refresh advertising campaign, a \$665 thousand increase in correspondent bank charges, and a net increase in salaries and other expenses of approximately \$900 thousand associated with the outsourcing of certain information technology costs. Professional fees for the year ended December 31, 2013 include \$711 thousand of costs associated with a second step transaction that we were evaluating directly before the Department of Justice fair lending investigation. For the year ended December 31, 2013, our efficiency ratio was 81.07% compared to 73.70% for the year ended December 31, 2012.

2012 vs. 2011. For the year ended December 31, 2012, non-interest expense increased \$2.4 million, or 2.0%, to \$123.1 million from \$120.7 million for the year ended December 31, 2011. The increase in non-interest expense was driven by to a \$1.7 million increase in salaries and benefits primarily as a result of the acquisition of SE Financial and the expansion of our credit risk management and lending staff, a \$2.3 million increase in real estate owned losses which consists of property write downs from updated appraisals as well as the loss on the sale of properties. During the fourth quarter, we settled an outstanding lawsuit for \$1.0 million which was included in professional fees. These increases were partially offset by a \$2.8 million decrease in merger and restructuring charges, a \$1.2 million decrease in occupancy expense due to management cost savings initiatives implemented during 2011, and a \$1.1 million decrease in FDIC insurance as a result of the assessment base change. For the year ended December 31, 2012, our efficiency ratio was 73.70% compared to 72.10% for the year ended December 31, 2011.

Income Tax Expense

2013 vs. 2012. We recorded a provision for income taxes of \$2.6 million for 2013, reflecting an effective rate of 17.10%, compared to a provision for income taxes of \$1.8 million for 2012, reflecting an effective tax rate benefit of 11.04%. The change from 2012 to 2013 was primarily due to recording a full valuation allowance of \$269 thousand on a 2010 charitable contribution carryforward that will expire in 2015, for which management believes it is more likely than not that such deferred tax assets will not be realized. The tax rates differ from the statutory rate of 35% principally because of tax-exempt investments, non-taxable income related to bank-owned life insurance and tax credits received on affordable housing partnerships. These tax credits relate to investments maintained by the Company as a limited partner in partnerships that sponsor affordable housing projects utilizing low-income housing credits pursuant to Section 42 of the Internal Revenue Code.

As of December 31, 2013, the Bank had net deferred tax assets totaling \$48.6 million. These deferred tax assets can only be realized if the Bank generates taxable income in the future. The Bank regularly evaluates the realizability of deferred tax asset positions. In determining whether a valuation allowance is necessary, the Bank considers the level of taxable income in prior years to the extent that carrybacks are permitted under current tax laws, as well as estimates of future pre-tax and taxable income and tax planning strategies that would, if necessary, be implemented. The Bank currently maintains a valuation allowance for certain state net operating losses, other-than-temporary impairments, and a charitable contribution carryover that, if not fully utilized, will expire in 2015, that management believes it is more likely than not that such deferred tax assets will not be realized. The Bank expects to realize the remaining deferred tax assets over the allowable carryback and/or carryforward periods. Therefore, no valuation allowance is deemed necessary against its remaining federal or state deferred tax assets as of December 31, 2013. However, if an unanticipated event occurred that materially changed pre-tax book income and taxable income in future periods, an increase in the valuation allowance may become necessary and it could be material to the Bank's financial statements.

2012 vs. 2011. We recorded an income tax expense of \$1.8 million for 2012, reflecting an effective rate of 11.04%, compared to a benefit for income taxes of \$1.9 million for 2011, reflecting an effective tax rate benefit of 20.97%. The change from 2011 to 2012 is primarily due to the reversal of a charitable contribution valuation allowance during the year ended December 31, 2011 as well as an increase in income before income taxes of \$6.8 million, to \$15.9 million for the year ended December 31, 2012 from net income before taxes of \$9.1 million for the year ended December 31, 2011 as well as provision to return adjustments and merger expense associated with the acquisition of SE Financial. The tax rates differ from the statutory rate of 35% principally because of tax-exempt investments, non-taxable income related to bank-owned life insurance and tax credits received on affordable housing partnerships. These tax credits relate to investments maintained by the Company as a limited partner in partnerships that sponsor affordable housing projects utilizing low-income housing credits pursuant to Section 42 of the Internal Revenue Code. For the year ended December 31, 2011, the rate also differed from the statutory rate of 35% due to the previously mentioned reversal of a charitable valuation allowance recorded in previous periods.

As of December 31, 2012, we had net deferred tax assets totaling \$47.1 million as compared to \$38.0 million as of December 31, 2011. These deferred tax assets can only be realized if we generate taxable income in the future. We regularly evaluate the realizability of deferred tax asset positions. In determining whether a valuation allowance is necessary, we consider the level of taxable income in prior years to the extent that carrybacks are permitted under current tax laws, as well as estimates of future pre-tax and taxable income and tax planning strategies that would, if necessary, be implemented. We currently maintain a valuation allowance for certain state net operating losses and other-than-temporary impairments that management believes it is more likely than not that such deferred tax assets will not be realized. We expect to realize our remaining deferred tax assets over the allowable carryback and/or carryforward periods. Therefore, no valuation allowance is deemed necessary against our remaining federal or remaining state deferred tax assets as of December 31, 2012. However, if an unanticipated event occurred that materially changed pre-tax and taxable income in future periods, an increase in the valuation allowance may become necessary and it could be material to our financial statements.

Risk Management

Overview. Managing risk is an essential part of successfully managing a financial institution. Our most prominent risk exposures are credit risk, interest rate risk and market risk. Credit risk is the risk of not collecting the interest and/or the principal balance of a loan or investment when it is due. Interest rate risk is the potential reduction of interest income as a result of changes in interest rates. Market risk arises from fluctuations in interest rates that may result in changes in the values of financial instruments, such as available-for-sale securities that are accounted for at fair value. Other risks that we face are operational risk, liquidity risk and reputation risk. Operational risk includes risks related to fraud, regulatory compliance, processing errors, technology, and disaster recovery. Liquidity risk is the possible inability to fund obligations to depositors, lenders or borrowers. Reputation risk is the risk that negative publicity or press, whether true or not, could cause a decline in our customer base or revenue.

Credit Risk Management. The objective of our credit risk management strategy is to quantify and manage credit risk on a segmented portfolio basis, as well as to limit the risk of loss resulting from an individual customer default. Our credit risk management strategy focuses on conservatism, diversification and monitoring. Our lending practices include conservative exposure limits, underwriting, documentation, and collection standards. Our credit risk management strategy also emphasizes diversification on an industry and customer level as well as regular credit examinations and monthly management reviews of large credit exposures and credits experiencing deterioration of credit quality. The Board of Directors has granted loan approval authority to certain officers or groups of officers up to prescribed limits, based on an officer's experience and tenure. Generally, all individual commercial loans and lending relationships less than \$15.0 million must be approved by a Loan Committee, which is comprised of personnel from the Credit, Finance and Lending departments. Individual loans or lending relationships with aggregate exposure in excess of \$15.0 million must be approved by the Directors' Loan Committee of the Company's Board, which is comprised of senior Bank officers and five non-employee directors. Underwriting activities are centralized. Our credit risk review function provides objective assessments of the quality of underwriting and documentation, the accuracy of risk grades and the charge-off, non-accrual and reserve analysis process. Our credit review process and overall assessment of required allowances is based on quarterly assessments of the probable estimated losses inherent in the loan portfolio. We use these assessments to identify potential problem loans within the portfolio, maintain an adequate reserve and take any necessary charge-offs. We charge off the collateral or cash flow deficiency on all loans once they become 90 days delinquent. Generally, all consumer loans are charged-off once they become 90 days delinquent except for education loans as they are guaranteed by the government and there is little risk of loss. In addition to the individual review of larger commercial loans that exhibit

probable or observed credit weaknesses, the commercial credit review process includes the use of an enhanced risk grading system. This risk grading system is consistent with Basel II expectations and allows for precision in the analysis of commercial credit risk. Historical portfolio performance metrics, current economic conditions and delinquency monitoring are factors used to assess the credit risk in our homogenous commercial, residential and consumer loan portfolio.

Analysis of Non-performing, Classified Assets and Troubled Debt Restructured. We consider repossessed assets and loans that are 90 days or more past due, except guaranteed student loans, to be non-performing assets. Generally, all loans, except government guaranteed student loans, are placed on non-accrual status when they become 90 days delinquent at which time the accrual of interest ceases and any collateral or cash flow deficiency is charged-off. Typically, payments received on a non-accrual loan are applied to the outstanding principal balance of the loan.

Real estate that we acquire as a result of foreclosure or by deed-in-lieu of foreclosure is classified as real estate owned until it is sold. We carry acquired property at the lower of its cost or fair market value ("FMV") less estimated costs to sell. Holding costs and declines in fair value after acquisition of the property result in charges against income.

We consider a loan a troubled debt restructuring ("TDR") when the borrower is experiencing financial difficulty and we grant a concession that we would not otherwise consider but for the borrower's financial difficulties. A TDR includes a modification of debt terms or assets received in satisfaction of the debt (which may include foreclosure or deed in lieu of foreclosure) or a combination of types. We evaluate selective criteria to determine if a borrower is experiencing financial difficulty including the ability of the borrower to obtain funds from sources other than the Bank at market rates. We consider all TDR loans that are on non-accrual status to be impaired loans. We will not consider the loan a TDR if the loan modification was made to retain a customer in response to competition in the marketplace.

Once a loan has been classified as a TDR and has been put on non-accrual status, it will only be put back on accruing status when certain criteria are met. Our policy for returning a loan to accruing status requires the preparation of a well documented credit evaluation, which includes the following:

- A review of the borrower's current financial condition in which the borrower must demonstrate sufficient cash flow to support the repayment of all principal and interest including any amounts previously charged-off;
- An updated appraisal or home valuation which must demonstrates sufficient collateral value to support the debt;
- Sustained performance based on the restructured terms for at least six consecutive months;
- Approval by the Special Assets Committee which consists of senior management including the Chief Credit Officer and the Chief Financial Officer.

The following table sets forth information with respect to our non-performing assets at the dates indicated. We had 31 TDRs on non-accrual status at December 31, 2013 totaling \$18.3 million, 29 TDRs on non-accrual status at December 31, 2012 totaling \$15.3 million, 36 TDRs at December 31, 2011 totaling \$23.7 million, 36 TDRs at December 31, 2010 totaling \$26.7 million, and 18 TDRs at December 31, 2009 totaling \$33.3 million. We had 4 TDRs totaling \$10.1 million and 2 TDRs totaling \$5.5 million that were on accrual status and in compliance with their modified terms as of December 31, 2013 and 2012, respectively. Management monitors the activity and performance of non-performing assets on a weekly basis.

December 31, (Dollars in thousands)	2013	2012	2011	2010	2009
Non-accrual loans:					
Real estate loans:					
Residential	\$11,393	\$13,515	\$ 12,477	\$ 13,414	\$ 1,226

Automobile loans	-	-	-	-	176
Total consumer loans	<u>24,410</u>	<u>24,013</u>	<u>28,423</u>	<u>27,888</u>	<u>37,100</u>
Total accruing loans past due 90 days or more	<u>24,410</u>	<u>24,013</u>	<u>28,423</u>	<u>27,932</u>	<u>48,175</u>
Total non-performing loans	<u>76,175</u>	<u>92,430</u>	<u>136,330</u>	<u>123,735</u>	<u>120,482</u>
Real estate owned	5,861	11,752	17,775	16,694	9,061
Troubled debt restructurings	-	-	-	-	33,337
Total non-performing assets	<u>\$82,036</u>	<u>\$104,182</u>	<u>\$154,105</u>	<u>\$140,429</u>	<u>\$162,880</u>
Total non-performing loans to total loans	3.25%	3.78%	5.29%	4.42%	4.32%
Total non-performing assets to total assets	1.79%	2.08%	3.35%	2.85%	3.49%

(1) Includes \$18.3 million, \$15.3 million, \$22.2 million and \$26.7 million of TDRs on non-accrual status as of December 31, 2013, 2012, 2011 and 2010, respectively.

(2) Education loans are 98% government guaranteed.

Non-performing assets, including loans 90 days past due and still accruing, decreased \$22.2 million to \$82.0 million, or 1.79% of total assets, at December 31, 2013 from \$104.2 million, or 2.08% of total assets, at December 31, 2012. This decrease was primarily in our commercial loan portfolio and was the result of principal pay downs and \$7.4 million of non-performing loans returned to accruing status. Generally, the Company will return a non-accrual loan to accruing status following (i) a review of the borrower's current financial condition in which the borrower must demonstrate sufficient cash flow to support the repayment of all principal and interest including any amounts previously charged-off, (ii) receipt of an updated appraisal or home valuation which must demonstrate sufficient collateral value to support the debt, (iii) sustained performance based on the restructured terms for at least six consecutive months, and (iv) approval by the Special Assets Committee which consists of senior management including the Chief Credit Officer and the Chief Financial Officer. Net charge-offs for the year ended December 31, 2013 were \$15.0 million compared to \$24.6 million for the year ended December 31, 2012. We charge-off the collateral or cash flow deficiency on all classified loans once they are 90 days delinquent. Non-performing assets at December 31, 2013 and 2012 included \$24.4 million, or 29.8%, and \$24.0 million, or 23.1%, respectively, of government guaranteed student loans where we have little risk of credit loss. We continue to rigorously review our loan portfolio to ensure that the collateral values remain sufficient to support the outstanding balances.

Interest income that would have been recorded for the year ended December 31, 2013, had non-accrual loans been current according to their original terms, amounted to approximately \$3.5 million.

The tables below include impaired loans and the average balance of impaired loans as of December 31, 2013 and 2012:

Impaired Loans
For the Period Ended December 31, 2013
(Dollars in thousands)

	Unpaid Principal Balance	Life-to-Date Charge-offs	Carrying Amount of Impaired Loans	Charge-off % of UPB	Number of Loans	Average Impaired Loan Balance
Impaired loans with no related specific allowance recorded:						
Commercial Real Estate	\$28,116	\$ 7,503	\$20,613	26.7%	43	\$ 479
Commercial Business	30,264	4,242	26,022	14.0%	27	964
Commercial Construction	6,214	3,696	2,518	59.5%	4	630
Residential Real Estate	11,955	562	11,393	4.7%	133	86
Residential Construction	338	208	130	61.5%	1	130
Home Equity and Lines of Credit	971	18	953	1.9%	19	50
Personal	107	-	107	0.0%	9	12
Education	-	-	-	-	-	-
Auto	151	-	151	0.0%	17	9
Total Impaired Loans	\$78,116	\$16,229	\$61,887	20.8%	253	\$2,539

The table above includes non-accrual loans in addition to \$10.1 million of TDRs on accrual status that are performing in agreement with their modified terms.

Impaired Loans
For the Period Ended December 31, 2013
(Dollars in thousands)

	Unpaid Principal Balance	Life-to-Date Charge-offs	Carrying Amount of Impaired Loans	Charge-off % of UPB	Number of Loans	Average Impaired Loan Balance
Impaired loans with no related specific allowance recorded:						
Commercial Real Estate	\$36,691	\$11,055	\$25,636	30.1%	75	\$342
Commercial Business	25,128	6,381	18,747	25.4%	39	481
Commercial Construction	24,016	10,609	13,407	44.2%	11	1,219
Residential Real Estate	14,374	859	13,515	6.0%	146	93
Residential Construction	783	-	783	-	2	392
Home Equity and Lines of Credit	1,127	17	1,110	1.5%	17	65
Personal	743	151	592	20.3%	12	49
Education	-	-	-	-	-	-
Auto	126	7	119	5.6%	14	9
Total Impaired Loans	\$102,988	\$29,079	\$73,909	28.2%	316	\$234

The table above includes non-accrual loans in addition to \$5.5 million of TDRs on accrual status that are performing in agreement with their modified terms.

Federal regulations require us to review and classify our assets on a regular basis. In addition, the FDIC has the authority to identify problem assets and, if appropriate, require them to be classified. Our credit review process includes a risk classification of all commercial and residential loans that includes pass, special mention, substandard and doubtful. A loan is classified as pass when payments are current and it is performing under the original contractual terms. A loan is classified as special mention when the borrower exhibits potential credit weakness or a downward trend which, if not checked or corrected, will weaken the asset or inadequately protect the Bank's position. While potentially weak, the borrower is currently marginally acceptable; no loss of principal or interest is envisioned. A loan is classified as substandard when the borrower has a well defined weakness or weaknesses that jeopardize the orderly liquidation of the debt. A substandard loan is inadequately protected by the current net worth and paying capacity of the obligor, normal repayment from this borrower is in jeopardy, and there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. A loan is classified as doubtful when a borrower has all weaknesses inherent in a substandard loan with the added provision that: (1) the weaknesses make collection of debt in full on the basis of currently existing facts, conditions and values highly questionable and improbable; (2) serious problems exist to the point where a partial loss of principal is likely; and (3) the possibility of loss is extremely high, but because of certain important, reasonably specific pending factors which may work to the advantage and strengthening of the assets, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens and additional refinancing plans. We charge-off the collateral or cash flow deficiency on all loans on non-accrual status. In all cases, loans are placed on non-accrual when 90 days past due or earlier if collection of principal or interest is considered doubtful.

The following table summarizes classified assets of all portfolio types at the dates indicated:

At December 31,					
(Dollars in thousands)	2013	2012	2011	2010	2009
Special mention assets	\$49,526	\$70,635	\$ 56,156	\$ 42,643	\$ 40,809
Substandard assets	98,275	99,989	104,895	81,354	65,617
Doubtful assets	-	3,503	20,802	29,003	51,482
Total classified assets	\$147,801	\$174,127	\$181,853	\$153,000	\$157,908

For all loans classified as substandard and doubtful, we have charged-off the collateral or cash flow deficiency on all classified loans that are 90 days past due.

Analysis and Determination of the Allowance for Loan Losses. The allowance for loan losses is a valuation allowance for probable losses inherent in the loan portfolio. We evaluate the need to establish allowances against losses on loans on a quarterly basis. When additional allowances are necessary, a provision for loan losses is charged to earnings.

The allowance for loan losses consists of two elements: (1) an allocated allowance, which is comprised of allowances established on specific loans, and allowances for each loan category based on historical loan loss experience adjusted for current trends and adjusted for both general economic conditions and other risk factors in our loan portfolios, and (2) an unallocated allowance to account for a level of imprecision in management's estimation process.

Management regularly monitors the condition of borrowers and assesses both internal and external factors in determining whether any relationships have deteriorated considering factors such as historical loss experience, trends in delinquency and non-performing loans, changes in risk composition and underwriting standards, the experience and ability of staff and regional and national economic conditions and trends.

The Chief Credit Officer supervises the workout department and identifies, manages and works through non-performing assets. Our credit officers and workout group identify and manage potential problem loans for our commercial loan portfolios. Changes in management factors, financial and operating performance, Company behavior, industry factors and external events and circumstances are evaluated on an ongoing basis to determine whether potential impairment is evident and additional analysis is needed. For our commercial loan portfolios, risk ratings are assigned to each individual loan to differentiate risk within the portfolio and are reviewed on an ongoing basis by credit risk management and revised, if needed, to reflect the borrowers' current risk profiles and the related collateral positions. The risk ratings consider factors such as financial condition, debt capacity and coverage ratios, market presence and quality of management. When a credit's risk rating is downgraded to a certain level, the relationship must be reviewed and detailed reports completed that document risk management strategies for the credit going forward, and the appropriate accounting actions to take in accordance with generally accepted accounting principles in the United States. When credits are downgraded beyond a certain level, our workout department becomes responsible for managing the credit risk.

Risk rating actions are generally reviewed formally by one or more Credit Committees depending on the size of the loan and the type of risk rating action being taken. Our commercial, consumer and residential loans are monitored for credit risk and deterioration considering factors such as delinquency, loan to value ratios, and credit scores. We evaluate all of our loans throughout their life cycle on a portfolio basis.

When problem loans are identified that are secured with collateral, management examines the loan files to evaluate the nature and type of collateral supporting the loans. Management documents the collateral type, date of the most recent valuation, and whether any liens exist, to determine the value to compare against the committed loan amount. If a loan is identified as impaired and is collateral dependent, an updated appraisal is obtained to provide a baseline in determining the property's fair market value. We also consider costs to sell the property and use the appraisal less selling costs to determine if a charge-off is required for the collateral dependent problem loan. If the collateral value is subject to significant volatility (due to location of asset, obsolescence, etc.) an appraisal is obtained more frequently. In-house revaluations are typically performed on a quarterly basis and updated appraisals are obtained annually, if determined necessary.

When we determine that the value of an impaired loan is less than its carrying amount, we recognize impairment through a charge-off to the allowance. We perform these assessments on at least a quarterly basis. For commercial loans, a charge-off is recorded when management determines we will not collect 100% of a loan based on the fair value of the collateral, less costs to sell the property, or the net present value of expected future cash flows. Charge-offs are recorded on a monthly basis and partially charged-off loans continue to be evaluated on a monthly basis. The collateral deficiency on consumer loans and residential loans are generally charged-off when deemed to be uncollectible or delinquent 90 days or more, whichever comes first, unless it can be clearly demonstrated that repayment will occur regardless of the delinquency status. Examples that would demonstrate repayment include a loan that is secured by adequate collateral and is in the process of collection, a loan supported by a valid guarantee or insurance, or a loan supported by a valid claim against a solvent estate. Consumer loan delinquency includes \$24.4 million in government guaranteed student loans at December 31, 2013.

Additionally, we reserve for certain inherent, but undetected, losses that are probable within the loan portfolio. This is due to several factors, such as, but not limited to, inherent delays in obtaining information regarding a customer's financial condition or changes in their unique business conditions and the interpretation of economic trends. While this analysis is conducted at least quarterly, we have the ability to revise the allowance factors whenever necessary in order to address improving or deteriorating credit quality trends or specific risks associated with a given loan pool classification.

Regardless of the extent of our analysis of customer performance, portfolio evaluations, trends or risk management processes established, a level of imprecision will always exist due to the subjective nature of loan portfolio and/or individual loan evaluations. Management established an unallocated reserve to cover uncertainties that the Company believes have resulted in losses that have not yet been allocated to specific elements of the general component. Such factors include uncertainties in economic conditions and in identifying triggering events that directly correlate to subsequent loss rates, changes in the appraised value of underlying collateral, risk factors that have not yet manifested themselves in loss allocation factors and historical loss experience data that may not precisely correspond to the current portfolio or economic conditions. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodology for estimating general losses in the portfolio.

A comprehensive analysis of the allowance for loan losses is performed on a quarterly basis. In addition, a review of allowance levels based on nationally published statistics is conducted quarterly. The factors supporting the allowance for loan losses do not diminish the fact that the entire allowance for loan losses is available to absorb losses in the loan portfolio and related commitment portfolio, respectively. Our principal focus, therefore, is on the adequacy of the total allowance for loan losses.

The allowance for loan losses is subject to review by banking regulators. Our primary bank regulators regularly conduct examinations of the allowance for loan losses and make assessments regarding their adequacy and the methodology employed in their determination.

For the year ended December 31, 2013, a provision for loan losses of \$13.0 million was recorded, and the allowance for loan losses at December 31, 2013 was \$55.6 million, or 2.38% of total loans outstanding, compared to \$57.6 million, or 2.36% of total loans outstanding, at December 31, 2012. This allowance represents management's estimate of the amount necessary to cover known and inherent losses in the loan portfolio.

The following table sets forth the breakdown of the allowance for loan losses by loan category at the dates indicated:

(Dollars in thousands)	2013		2012		2011		2010		2009	
	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans	Allowance Allocated to Loan Portfolio	Loan Category as a % of Total Loans
Commercial:										
Commercial real estate	\$22,089	24.9%	\$21,994	26.1%	\$16,254	21.2%	\$14,793	21.5%	\$ 9,842	21.5%
Commercial business loans	19,301	16.2	18,088	13.6	15,376	16.7	14,407	15.8	20,515	15.7
Commercial construction	3,188	1.6	8,242	4.3	14,791	9.1	9,296	9.6	4,344	9.5
Total Commercial	44,578	42.7	48,324	44.0	46,421	47.0	38,496	46.9	34,701	46.7
Residential:										
Residential real estate	2,200	29.2	2,293	27.2	1,620	24.2	1,854	24.6	5,460	23.3
Residential construction	-	0.0	142	0.1	65	0.2	30	0.4	97	0.4
Total real estate loans	2,200	29.2	2,435	27.3	1,685	24.4	1,884	25.0	5,557	23.7
Consumer:										
Home equity & lines of credit	3,133	10.0	2,397	10.5	2,020	10.5	2,136	10.3	2,169	11.3
Personal	2,687	1.8	2,062	2.3	1,855	2.8	977	3.4	1,041	4.0
Education	306	8.8	303	8.9	279	9.1	297	8.9	903	9.2
Automobile	2,195	7.5	1,578	7.0	1,403	6.2	1,026	5.5	1,484	5.1
Total consumer	8,321	28.1	6,340	28.7	5,557	28.6	4,436	28.1	5,597	29.6
Unallocated	550		550		550		550		-	
Total allowance for loan losses	\$55,649	100.0%	\$57,649	100.0%	\$54,213	100.0%	\$45,366	100.0%	\$45,855	100.0%

Commercial Portfolio. The portion of the allowance for loan losses related to the commercial loan portfolio was \$44.6 million at December 31, 2013 (4.5% of commercial loans) compared to \$48.3 million at December 31, 2012 (4.5% of commercial loans). The decrease in the reserve balance was related to the decrease in commercial loans during 2013 as the reserves as a percentage of commercial loans is relatively consistent between years. We saw improvement in asset quality metrics for commercial loans with a decline in the levels of net charge-offs, delinquencies, and loans classified as special mention during 2013. The Company recorded commercial loan net charge-offs in the amount of \$11.9 million during the year ended December 31, 2013 compared to \$21.5 million during the year ended December 31, 2012. We continue to charge-off any collateral or cash flow deficiency for non-performing loans once a loan is 90 days past due. As a result, the entire reserve balance at December 31, 2013 consists of reserves against the pass rated, special mention, and accruing substandard commercial loan portfolio. Despite improvement in our asset quality metrics, classified assets still remain high and as a result we continue to hold reserves as a percentage of loans of 4.5% consistent with 2012.

Residential Loans. The portion of the allowance for loan losses related to the residential loan portfolio remained relatively consistent in 2013 compared to 2012 at \$2.2 million (0.3% of residential loans) at December 31, 2013 compared to \$2.4 million (0.4% of residential loans) at December 31, 2012. The decrease in the reserve balance was primarily driven by a decline in the levels of net charge-offs and delinquencies during 2013. The Company recorded residential loan net charge-offs in the amount of \$563 thousand during the year ended December 31, 2013 compared to \$1.2 million during the year ended December 31, 2012. The housing market has stabilized over the past few years and we believe future loss rates should be in line with our recent experience provided that the economy continues to slowly grow.

Consumer Loans. The portion of the allowance for loan losses related to the consumer loan portfolio increased to \$8.3 million (1.3% of consumer loans) at December 31, 2013 from \$6.3 million (0.9% of consumer loans) at December 31, 2012. The increase in the reserve balance was primarily driven by continued elevated levels of net charge-offs and delinquencies during 2013 and our continued concern with the risk profile of the consumer portfolio. The Company recorded consumer loan net charge-offs in the amount of \$1.1 million during the year ended December 31, 2013 compared to \$1.9 million during the year ended December 31, 2012.

Unallocated Allowance. The unallocated allowance for loan losses was \$550 thousand at December 31, 2013 and 2012. The unallocated component is maintained to cover uncertainties that the Company believes have resulted in losses that have not yet been allocated to specific elements of the general component. Such factors include uncertainties in economic conditions and in identifying triggering events that directly correlate to subsequent loss rates, changes in appraised value of underlying collateral, risk factors that have not yet manifested themselves in loss allocation factors and historical loss experience data that may not precisely correspond to the current portfolio or economic conditions. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodology for estimating general losses in the portfolio. The appropriate allowance level is estimated based upon factors and trends identified by the Company at the time the consolidated financial statements are prepared. Management

continuously evaluates its allowance methodology; however, the unallocated allowance is subject to changes each reporting period.

The allowance for loan losses is maintained at levels that management considers appropriate to provide for losses based upon an evaluation of known and inherent risks in the loan portfolio. Management's evaluation takes into consideration the risks inherent in the loan portfolio, past loan loss experience, specific loans with loss potential, geographic and industry concentrations, delinquency trends, economic conditions, the level of originations and other relevant factors. While management uses the best information available to make such evaluations, future adjustments to the allowance for credit losses may be necessary if conditions differ substantially from the assumptions used in making the evaluations. In addition, because future events affecting borrowers and collateral cannot be predicted with certainty, the existing allowance for loan losses may not be sufficient should the quality of loans deteriorate as a result of the factors described above. Any material increase in the allowance for loan losses may adversely affect our financial condition and results of operations.

The following table sets forth an analysis of the activity in the allowance for loan losses for the periods indicated:

Year Ended December 31, (Dollars in thousands)	2013	2012	2011	2010	2009
Allowance at beginning of period	\$57,649	\$54,213	\$45,366	\$45,855	\$36,905
Provision for loan losses	13,000	28,000	37,500	70,200	15,697
Charge-offs:					
Real estate loans:					
Residential	1,051	1,215	1,004	918	6
Commercial real estate	11,334	13,393	24,571	51,841	2,851
Total real estate loans	12,385	14,608	25,575	52,759	2,857
Commercial business loans	5,340	9,867	5,897	14,505	1,870
Consumer:					
Home equity lines of credit	740	979	587	2,106	544
Automobile loans	1,113	1,070	1,185	1,090	1,340
Other consumer loans	759	816	1,790	1,182	1,092
Total consumer loans	2,612	2,865	3,562	4,378	2,976
Total charge-offs	20,337	27,340	35,034	71,642	7,703
Recoveries:					
Real estate loans:					
One- to four-family	430	36	28	2	4
Commercial real estate	2,843	893	3,984	162	-
Total real estate loans	3,273	929	4,012	164	4
Commercial business	902	905	1,027	171	212
Consumer:					
Home equity lines of credit	255	253	461	71	137
Automobile loans	725	488	571	339	355
Other consumer loans	182	201	310	208	248
Total consumer loans	1,162	942	1,342	618	740
Total recoveries	5,337	2,776	6,381	953	956
Net charge-offs	15,000	24,564	28,653	70,689	6,747
Allowance at end of period	\$55,649	\$57,649	\$54,213	\$45,366	\$45,855
Allowance to non-performing loans	73.05%	62.37%	39.77%	36.66%	38.06%
Allowance to total loans	2.38%	2.36%	2.10%	1.62%	1.64%
Net charge-offs to average loans	0.63%	0.96%	1.05%	2.53%	0.25%

Interest Rate Risk Management. Interest rate risk is defined as the exposure to current and future earnings, and capital that arises from adverse movements in interest rates. Depending on a bank's asset/liability structure, adverse movements in interest rates could be either rising or falling interest rates. For example, a bank with predominantly long-term fixed-rate loans, and short-term deposits could have an adverse earnings exposure to a rising rate environment. Conversely, a short-term or variable-rate asset base funded by longer-term liabilities could be negatively affected by falling rates. This is referred to as re-pricing or maturity mismatch risk.

Interest rate risk also arises from changes in the slope of the yield curve (yield curve risk), from imperfect correlations in the adjustment of rates earned and paid on different instruments with otherwise similar re-pricing characteristics (basis risk), and from interest rate related options embedded in our assets and liabilities (option risk).

Our goal is to manage our interest rate risk by determining whether a given movement in interest rates affects our net income and the market value of our portfolio equity in a positive or negative way, and to execute strategies to maintain interest rate risk within established limits. Over the past few years, we took advantage of the decrease in interest rates to reposition the balance sheet through the sale of lower-rate longer-term securities and the run-off higher-cost non-relationship-based municipal deposits to improve our profitability, interest rate risk and capital position. The results at December 31, 2013 and 2012 indicate an acceptable level of risk. The 2013 and 2012 results indicate a profile which reflects interest rate risk exposures in both rising and declining rate environments for both net interest income and economic value.

Model Simulation Analysis. We view interest rate risk from two different perspectives. The traditional accounting perspective, which defines and measures interest rate risk as the change in net interest income and earnings caused by a change in interest rates, provides the best view of short-term interest rate risk exposure. We also view interest rate risk from an economic perspective, which defines and measures interest rate risk as the change in the market value of portfolio equity caused by changes in the values of assets and liabilities, which fluctuate due to changes in interest rates. The market value of portfolio equity, also referred to as the economic value of equity, is defined as the present value of future cash flows from existing assets, minus the present value of future cash flows from existing liabilities.

These two perspectives give rise to income simulation and economic value simulation, each of which presents a unique picture of our risk of any movement in interest rates. Income simulation identifies the timing and magnitude of changes in income resulting from changes in prevailing interest rates over a short-term time horizon (usually one year). Economic value simulation reflects the interest rate sensitivity of assets and liabilities in a more comprehensive fashion, reflecting all future time periods. It can identify the quantity of interest rate risk as a function of the changes in the economic values of assets and liabilities, and the equity of the Company. Both types of simulation assist in identifying, measuring, monitoring and controlling interest rate risk and are employed by management to ensure that variations in interest rate risk exposure will be maintained within policy guidelines.

Our Asset/Liability Management Committee (“ALCO”) produces reports on a quarterly basis, which compare baseline (no interest rate change) current positions showing forecasted net income, the economic value of equity and the duration of individual asset and liability classes, and of equity. Duration is defined as the weighted average time to the receipt of the present value of future cash flows. These baseline forecasts are subjected to a series of interest rate changes, in order to demonstrate or model the specific impact of the interest rate scenario tested on income, equity and duration. The model, which incorporates all asset and liability rate information, simulates the effect of various interest rate movements on income and equity value. The reports identify and measure our interest rate risk exposure present in our current asset/liability structure. If the results produce quantifiable interest rate risk exposure beyond our limits, then the testing will have served as a monitoring mechanism to allow us to initiate asset/liability strategies designed to reduce and therefore control interest rate risk.

The tables below set forth an approximation of our interest rate risk exposure. The simulation uses projected repricing of assets and liabilities at December 31, 2013 and December 31, 2012. The primary interest rate exposure measurement applied to the entire balance sheet is the effect on net interest income of a change in market interest rates of plus or minus 200 basis points over a one year time horizon, and the effect on economic value of equity of a change in market interest rates of plus or minus 200 basis points for all projected future cash flows. Various assumptions are made regarding the prepayment speed and optionality of loans, investments and deposits, which are based on analysis and market information. The assumptions regarding optionality, such as prepayments of loans and the effective maturity of non-maturity deposit products, are documented periodically through evaluation under varying interest rate scenarios.

Because prospective effects of hypothetical interest rate changes are based on a number of assumptions, these computations should not be relied upon as indicative of actual results. While we believe such assumptions to be reasonable, assumed prepayment rates may not approximate actual future prepayment activity on mortgage-backed securities, collateralized mortgage obligations and loans. Further, the computation does not reflect any actions that management may undertake in response to changes in interest rates. Management periodically reviews the rate assumptions based on existing and projected economic conditions.

As of December 31, 2013 (Dollars in thousands):

Basis point change in rates	-200	Base Forecast	+200
Net Interest Income at Risk:			
Net Interest Income	\$99,735	\$116,649	\$113,779
% change	(14.50)%		(2.46)%
Economic Value at Risk:			
Equity	\$760,959	\$813,712	\$742,257
% change	(6.48)%		(8.78)%

As of December 31, 2012 (Dollars in thousands):

Basis point change in rates	-200	Base Forecast	+200
Net Interest Income at Risk:			
Net Interest Income	\$106,676	\$121,721	\$122,950
% change	(12.36)%		1.01%
Economic Value at Risk:			
Equity	\$634,548	\$761,612	\$743,113
% change	(16.68)%		(2.43)%

As of December 31, 2013, based on the scenarios above, net interest income and economic value of equity would be negatively impacted by a 200 basis point increase or decrease in interest rates. As of December 31, 2012, based on the scenarios above, net interest income and economic value of equity would be negatively impacted by a 200 basis point decrease in interest rates, while a 200 basis point increase would positively impact net interest income and negatively impact economic value at risk. The current historically low interest rate environment reduces the reliability of the measurement of a 200 basis point decline in interest rates, as such a decline would result in negative interest rates. We have established an interest rate floor of zero percent for purposes of measuring interest rate risk. Such a floor in our income simulation results in a reduction in our net interest margin as more of our liabilities than our assets are impacted by the zero percent floor. In addition, economic value of equity is also reduced in a declining rate environment due to the negative impact to deposit premium values.

Overall, our 2013 results indicate that we are adequately positioned with limited net interest income and economic value at risk and that all interest rate risk results continue to be within our policy guidelines.

Liquidity Risk

Liquidity risk is the risk of being unable to meet obligations as they come due at a reasonable funding cost. We mitigate this risk by attempting to structure our balance sheet prudently and by maintaining diverse borrowing resources to fund potential cash needs. For example, we structure our balance sheet so that we fund less liquid assets, such as loans, with stable funding sources, such as retail deposits, long-term debt, wholesale deposits, and capital. We assess liquidity needs arising from asset growth, maturing obligations, and deposit withdrawals, considering operations in both the normal course of business and times of unusual events. In addition, we consider our off-balance sheet arrangements and commitments that may impact liquidity in certain business environments.

Our ALCO measures liquidity risks, sets policies to manage these risks, and reviews adherence to those policies at its quarterly meetings. For example, we manage the use of short-term unsecured borrowings as well as total wholesale funding through policies established and reviewed by our ALCO. In addition, the Director Risk Committee of our Board of Directors sets liquidity limits and reviews current and forecasted liquidity positions at each of its regularly scheduled meetings.

We have contingency funding plans that assess liquidity needs that may arise from certain stress events such as rapid asset growth and financial market disruptions. Our contingency plans also provide for continuous monitoring of net borrowed funds dependence and available sources of contingent liquidity. These sources of contingent liquidity include cash and cash equivalents, capacity to borrow at the Federal Reserve discount window and the FHLB system, fed funds purchased from other banks and the ability to sell, pledge or borrow against unencumbered securities in our investment portfolio. As of December 31, 2013, the potential liquidity from these sources totaled \$2.8 billion, which is an amount we believe currently exceeds any contingent liquidity needs.

Uses of Funds. Our primary uses of funds include the extension of loans and credit, the purchase of investment securities, working capital, and debt and capital service. In addition, contingent uses of funds may arise from events such as financial market disruptions.

Sources of Funds. Our primary sources of funds include a large, stable deposit base. Core deposits, primarily gathered from our retail branch network, are our largest and most cost-effective source of funding. Core deposits totaled \$2.9 billion as of December 31, 2013, down from \$3.1 billion as of December 31, 2012. The decrease in core deposits was driven by a \$228.6 million decrease in municipal deposits, which was consistent with the planned run-off of higher cost non-relationship-based municipal deposits. We also maintain access to a diversified base of wholesale funding sources. These uncommitted sources include fed funds purchased from other banks, securities sold under agreements to repurchase, brokered certificates of deposit, and FHLB advances. Aggregate wholesale funding totaled \$374.8 million as of December 31, 2013 and December 31, 2012. In addition, at December 31, 2013, we had arrangements to borrow up to \$1.3 billion from the FHLB of Pittsburgh and the Federal Reserve Bank of Philadelphia. On December 31, 2013, we had \$195.0 million of FHLB advances outstanding and \$800 thousand of FHLB letters of credit outstanding.

A significant use of our liquidity is the funding of loan originations. At December 31, 2013, we had \$216.3 million in loan commitments outstanding, which consisted of \$32.7 million and \$5.4 million in commercial and consumer commitments to fund loans, respectively, \$166.2 million in commercial and consumer unused lines of credit, and \$12.0 million in standby letters of credit. Historically, many of the commitments expire without being fully drawn; therefore, the total commitment amounts do not necessarily represent future cash requirements. Another significant use of our liquidity is the funding of deposit withdrawals. Certificates of deposit due within one year of December 31, 2013 totaled \$376.1 million, or 51.5% of

certificates of deposit. The large percentage of certificates of deposit that mature within one year reflects customers' hesitancy to invest their funds for long periods in the current low interest rate environment. If these maturing deposits do not remain with us, we will be required to seek other sources of funds, including other certificates of deposit and borrowings. Depending on market conditions, we may be required to pay higher rates on such deposits or other borrowings than we currently pay on the certificates of deposit due on or before December 31, 2013. We have the ability to attract and retain deposits by adjusting the interest rates offered.

The following table presents certain of our contractual obligations at December 31, 2013:

(Dollars in thousands)	Total	Payments due by period			
		Less than One Year	One to Three Years	Three to Five Years	More Than Five Years
Borrowed funds	\$250,370	\$60,000	\$70,000	\$95,000	\$25,370
Commitments to fund loans	38,159	38,159	-	-	-
Unused lines of credit	166,162	75,608	63,890	2,984	23,680
Standby letters of credit	11,996	2,042	8,954	-	1,000
Operating lease obligations	61,285	5,675	9,972	8,405	37,233
Total	\$527,972	\$181,484	\$152,816	\$106,389	\$87,283

Our primary investing activities are the origination of loans and the purchase of securities. Our primary financing activities consist of activity in deposit accounts and borrowings. Deposit flows are affected by the overall level of interest rates, the interest rates and products offered by us and our local competitors and other factors. We generally manage the pricing of our deposits to be competitive. Occasionally, we offer promotional rates on certain deposit products to attract deposits.

The Company is a separate legal entity from the Bank and must provide for its own liquidity in addition to its operating expenses. The Company's primary source of income is dividends received from the Bank. The amount of dividends that the Bank may declare and pay to the Company is generally restricted under Pennsylvania law to the retained earnings of the Bank. During the year ended December 31, 2013, the Bank paid the Company a \$20.0 million dividend to fund the 4,000,000 stock repurchase program adopted during the year. At December 31, 2013, the Company (stand-alone) had liquid assets of \$36.6 million.

Capital Management. We are subject to various regulatory capital requirements administered by the FDIC, including a risk-based capital measure. The risk-based capital guidelines include both a definition of capital and a framework for calculating risk-weighted assets by assigning balance sheet assets and off-balance sheet items to broad risk categories. At December 31, 2013, we exceeded all of our regulatory capital requirements. We are considered "well capitalized" under regulatory guidelines. See Note 15 to the Company's Consolidated Financial Statements included in this Annual Report.

At December 31, 2013, the Bank's ratio of Tier 1 capital to risk-weighted assets equaled 20.57%, well above the ratio necessary to be considered well capitalized under applicable federal regulations. We strive to manage our capital for maximum stockholder benefit. While the significant increase in equity which resulted from our initial public stock offering in July 2007 adversely impacted our return on equity, our financial condition and results of operations were enhanced by the capital from the offering, resulting in increased net interest-earning assets and net income. Further, in the current economic environment, our strong capital position leaves the Company well-positioned to meet our customers' needs and to execute on our growth strategies. We may use capital management tools, such as cash dividends and common share repurchases, to improve our capital position. Beneficial's Board of Directors approved a second stock repurchase program that will enable Beneficial to acquire up to 4,000,000 shares, or 12.0%, of the Company's publicly held common stock outstanding. Repurchased shares are held in treasury. At December 31, 2013, 5,175,681 shares had been repurchased.

Off-Balance Sheet Arrangements. In the normal course of operations, we engage in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in our consolidated financial statements. These transactions involve, to varying degrees, elements of credit, interest rate and liquidity risk. Such transactions are used primarily to manage customers' requests for funding and take the form of loan commitments and lines of credit. For information about our loan commitments and unused lines of credit, see Note 20 to the Company's Consolidated Financial Statements included in this Annual Report. For the year ended December 31, 2013, we did not engage in any off-balance sheet transactions reasonably likely to have a material effect on our financial condition, results of operations or cash flows.

Recent Accounting Pronouncements.

See summary of significant accounting pronouncement in Note 2 to the Company's consolidated financial statements included in this Annual Report.

Consolidated Summary of Quarterly Earnings (Unaudited)

(Dollars in thousands, except per share amounts)

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Beneficial Mutual Bancorp, Inc. and Subsidiaries:

We have audited the accompanying consolidated statements of financial condition of Beneficial Mutual Bancorp, Inc. and Subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for the years ended December 31, 2013 and 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of their operations and their cash flows for the years ended December 31, 2013 and 2012, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 10, 2014 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

KPMG LLP

Philadelphia, Pennsylvania
March 10, 2014

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Beneficial Mutual Bancorp, Inc. and Subsidiaries:

We have audited Beneficial Mutual Bancorp, Inc. and Subsidiaries' (the Company) internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of the Company as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for the years ended December 31, 2013 and 2012, and our report dated March 10, 2014 expressed an unqualified opinion on those consolidated financial statements.

KPMG LLP

Philadelphia, Pennsylvania
March 10, 2014

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Beneficial Mutual Bancorp, Inc. and Subsidiaries
Philadelphia, Pennsylvania

We have audited the accompanying consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows of Beneficial Mutual Bancorp, Inc. and subsidiaries (the "Company") for the year ended December 31, 2011. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such 2011 consolidated financial statements present fairly, in all material respects, the results of operations and cash flows of Beneficial Mutual Bancorp, Inc. and subsidiaries for the year ended December 31, 2011, in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 2 to the consolidated financial statements, the accompanying 2011 financial statements have been retrospectively adjusted as a result of the adoption of Accounting Standards Update 2011-05.

The image shows a handwritten signature in black ink that reads "Deloitte + Touche LLP". The signature is written in a cursive, flowing style.

BENEFICIAL MUTUAL BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE YEARS ENDED DECEMBER 31, 2013, 2012 and 2011

(All dollar amounts are presented in thousands, except per share data)

1. NATURE OF OPERATIONS

The Company is a federally chartered stock holding company and owns 100% of the outstanding common stock of the Bank, a Pennsylvania chartered stock savings bank. The Bank offers a variety of consumer and commercial banking services to individuals, businesses, and nonprofit organizations through 60 offices throughout the Philadelphia and Southern New Jersey area. The Bank is supervised and regulated by the Pennsylvania Department of Banking and Securities ("the Department") and the Federal Deposit Insurance Corporation (the "FDIC"). The Company is regulated by the Board of Governors of the Federal Reserve System. The deposits of the Bank are insured up to the applicable legal limits by the Deposit Insurance Fund of the FDIC.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation and Basis of Presentation – The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. Specifically, the financial statements include the accounts of the Bank, the Company's wholly owned subsidiary, and the Bank's wholly owned subsidiaries. The Bank's wholly owned subsidiaries are: (i) Beneficial Advisors, LLC, which offers wealth management services and non-deposit investment products, (ii) Neumann Corporation, a Delaware corporation formed to manage certain investments, (iii) Beneficial Insurance Services, LLC, which provides insurance services to individual and business customers and (iv) BSB Union Corporation, a leasing company. Additionally, the Company has subsidiaries that hold other real estate acquired in foreclosure or transferred from the commercial real estate loan portfolio. All significant intercompany accounts and transactions have been eliminated. The various services and products support each other and are interrelated. Management makes significant operating decisions based upon the analysis of the entire Company and financial performance is evaluated on a company-wide basis. Accordingly, the various financial services and products offered are aggregated into one reportable operating segment: community banking as under guidance in the Financial Accounting Standards Board (the "FASB") Accounting Standards Codification ("ASC" or "codification") Topic 280 for Segment Reporting.

Use of Estimates in the Preparation of Financial Statements – These consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. The significant estimates include the allowance for loan losses, goodwill, other intangible assets and deferred income taxes. Actual results could differ from those estimates and assumptions.

Investment Securities - The Company classifies and accounts for debt and equity securities as follows:

Held-to-Maturity - Debt securities that management has the positive intent and ability to hold to maturity are classified as "held-to-maturity" and are recorded at amortized cost. Premiums are amortized and discounts are accreted using the interest method over the estimated remaining term of the underlying security.

Available-for-Sale - Debt securities that will be held for indefinite periods of time, including equity securities with readily determinable fair values, that may be sold in response to changes to market interest or prepayment rates, needs for liquidity, and changes in the availability of and the yield of alternative investments, are classified as "available-for-sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported net of tax in other comprehensive income. Realized gains and losses on the sale of investment securities are recorded as of trade date and reported in the consolidated statements of income and determined using the adjusted cost of the specific security sold.

The Company determines whether any unrealized losses are temporary in accordance with guidance under *FASB ASC Topic 320 for Investments - Debt and Equity Securities*. The evaluation is based upon factors such as the creditworthiness of the issuers/guarantors, the underlying collateral, if applicable, and the continuing performance of the securities. Management also evaluates other facts and circumstances that may be indicative of an other-than-temporary impairment ("OTTI") condition. This includes, but is not limited to, an evaluation of the type of security, length of time and extent to which the fair value has been less than cost, and near-term prospects of the issuer.

In accordance with accounting guidance for equity securities, the Company evaluates its securities portfolio for other-than-temporary impairment throughout the year. Each investment that has an estimated fair value less than the book value is reviewed on a quarterly basis by management. Management considers at a minimum the following factors that, both individually or in combination, could indicate that the decline is other-than-temporary: (1) the length of time and the extent to which the fair value has been less than book value, (2) the financial condition and the near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. Among other factors that are considered in determining the Company's intent and ability to maintain an investment is a review of the capital adequacy, interest rate risk profile and liquidity position of the Company. Declines in the fair value of held-to-maturity and available-for-sale securities below their cost that are deemed to be other-than-temporary are reflected in earnings as realized losses.

Accounting guidance for debt securities requires the Company to assess whether the loss existed by considering whether (1) the Company has the intent to sell the security, (2) it is more likely than not that it will be required to sell the security before recovery, or (3) it does not expect to recover the entire amortized cost basis of the security. The guidance requires the Company to bifurcate the impact on securities where impairment in value was deemed to be other than temporary between the component representing credit loss and the component representing loss related to other factors. The portion of the fair value decline attributable to credit loss must be recognized through a charge to earnings. The difference between the fair market value and the credit loss is recognized in other comprehensive income.

The Company invests in Federal Home Loan Bank of Pittsburgh (“FHLB”) stock as required to support borrowing activities, as detailed in Note 13 to these consolidated financial statements. Although FHLB stock is an equity interest in a FHLB, it does not have a readily determinable fair value because its ownership is restricted and it lacks a market. FHLB stock can be sold back only at its par value of \$100 per share and only to the FHLBs or to another member institution. The Company evaluates this investment for impairment on the ultimate recoverability of the par value rather than by recognizing temporary declines in value. The Company reports its investment in FHLB stock at cost in the consolidated statements of financial condition. The Company reviews FHLB stock for impairment based on guidance from *FASB ASC Topic 320 for Investments - Debt and Equity Securities* and *FASB ASC Topic 942 for Financial Services - Depository and Lending* and has concluded that its investment is not impaired.

Loans - The Company’s loan portfolio consists of commercial loans, residential loans and consumer loans. Commercial loans include commercial real estate, commercial construction and commercial business loans. Residential loans include residential mortgage and construction loans secured primarily by first liens on one-to four-family residential properties. Consumer loans consist primarily of home equity loans and lines of credit, personal loans, automobile loans and education loans. Loan balances are stated at their principal balances, net of unamortized fees and costs.

Interest on loans is calculated based upon the principal amount outstanding. Loan fees and certain direct loan origination costs are deferred and recognized as a yield adjustment over the life of the loans using the interest method.

Generally, loans are placed on non-accrual status when the loan becomes 90 days delinquent and any collateral or discounted cash flow deficiency is charged-off. Unsecured consumer loans are typically charged-off when they become 90 days past due. In all cases, loans are placed on non-accrual or charged-off at an earlier date if collection of principal or interest is considered doubtful. Government guaranteed student loans greater than 90 days continue to accrue interest as they are government guaranteed with little risk of credit loss.

When a loan is determined to be impaired, it is placed on non-accrual status and all interest that had been accrued and not collected is reversed against interest income. Payments received on non-accrual loans are applied to principal balances until paid in full and then to interest income. The Bank’s policy for returning a loan to accruing status requires the preparation of a well documented credit evaluation which includes the following:

- A review of the borrower’s current financial condition in which the borrower must demonstrate sufficient cash flow to support the repayment of all principal and interest including any amounts previously charged-off;
- An updated appraisal or home valuation which must demonstrates sufficient collateral value to support the debt;
- Sustained performance based on the restructured terms for at least six consecutive months;
- Approval by the Special Assets Committee which consists of the Chief Credit Officer, the Chief Financial Officer and other members of senior management.

Allowance for Loan Losses - The allowance for loan losses is determined by management based upon portfolio segment, past experience, evaluation of estimated loss and impairment in the loan portfolio, current economic conditions and other pertinent factors. Management also considers risk characteristics by portfolio segments including, but not limited to, renewals and real estate valuations. The allowance for loan losses is maintained at a level that management considers appropriate to provide for estimated losses and impairment based upon an evaluation of known and inherent risk in the loan portfolio. Loan impairment is evaluated based on the fair value of collateral or estimated net realizable value. While management uses the best information available to make such evaluations, future adjustments to the allowance may be necessary if economic conditions differ substantially from the assumptions used in making the evaluations. The allowance for loan losses is established through a provision for loan losses charged to expense which is based upon past loan and loss experience and an evaluation of estimated losses in the current loan portfolio, including the evaluation of impaired loans. In addition, the FDIC and the Department, as an integral part of their examination process, periodically review our allowance for loan losses.

Under the accounting guidance *FASB ASC Topic 310 for Receivables*, a loan is considered to be impaired when, based upon current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan. An insignificant delay or insignificant shortfall in amount of payments does not necessarily result in the loan being identified as impaired. When all or a portion of the loan is deemed uncollectible, the uncollectible portion is charged-off. The measurement is based either on the present value of expected future cash flows discounted at the loan’s effective interest rate, or the fair value of the collateral if the loan is collateral-dependent. Impairment losses are included in the provision for loan losses.

Troubled Debt Restructurings - The Company considers a loan a TDR when the borrower is experiencing financial difficulty and the Company has granted a concession that it would not otherwise consider but for the borrower's financial difficulties. A TDR includes a modification of debt terms or assets received in satisfaction of the debt (which may include foreclosure or deed in lieu of foreclosure) or a combination of types. The Company evaluates selective criteria to determine if a borrower is experiencing financial difficulty including the ability of the borrower to obtain funds from sources other than the Bank at market rates. The Company considers all TDR loans that are on non-accrual status to be impaired loans. The Company evaluates all TDR loans for impairment on an individual basis in accordance with ASC 310. We will not consider a loan a TDR if the loan modification was a result of a customer retention program.

Loans Acquired With Deteriorated Credit Quality - The Company accounts for loans acquired with deteriorated credit quality in accordance with the provisions included in *FASB ASC 310-30 Loans and Debt Securities Acquired with Deteriorated Credit Quality*. For these loans, the Company determined that there is evidence of deterioration in credit quality since the origination of the loan and that it was probable, at the acquisition date, that the Company will be unable to collect all contractually required payments receivable. These loans are recorded at fair value, at the acquisition date, reflecting the present value of the amounts expected to be collected. The Company evaluates loans acquired with deteriorated credit quality individually for further impairment.

Mortgage Banking Activities - The Company originates mortgage loans held for investment and for sale. At origination, mortgage loans are identified as either held for sale or held for investment. Mortgage loans held for sale are carried at the lower of cost or market, determined on a net aggregate basis.

The Company originates residential mortgage loans for sale primarily to institutional investors, such as Fannie Mae. The Company retains the mortgage servicing rights ("MSRs") for the loans sold. The Company elected the fair value measurement method to value its existing mortgage servicing assets at fair value in accordance with *ASC 860-50*. Under the fair value measurement method, the Company measures its MSRs at fair value at each reporting date and reports changes in the fair value of its MSRs in earnings in the period in which the changes occur. At December 31, 2013 and 2012, mortgage servicing rights totaled \$1.5 million and \$1.3 million, respectively, and were included in "other assets" in the Company's consolidated statements of financial condition.

At December 31, 2013 and 2012, loans serviced for others totaled \$158.0 million and \$169.2 million, respectively. Servicing loans for others consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors, and processing foreclosures. The Company had fiduciary responsibility for related escrow and custodial funds aggregating approximately \$2.0 million and \$2.1 million at December 31, 2013 and 2012, respectively.

Bank Premises and Equipment - Bank premises and equipment are stated at cost less accumulated depreciation. Depreciation is calculated using a straight-line method over the estimated useful lives of 10 to 40 years for buildings and three to 20 years for furniture, fixtures and equipment. Leasehold improvements are amortized using the straight-line method over the terms of the respective leases or the useful lives of the respective assets, whichever is less.

Real Estate Owned - Real estate owned includes properties acquired by foreclosure or deed in-lieu of foreclosure and premises no longer used in operations. These assets are initially recorded at the lower of carrying value of the loan or estimated fair value less selling costs at the time of foreclosure and at the lower of the new cost basis or fair value less selling costs thereafter. Losses arising from foreclosure transactions are charged against the allowance for loan losses. The amounts recoverable from real estate owned could differ materially from the amounts used in arriving at the net carrying value of the assets at the time of foreclosure because of future market factors beyond the control of the Company. Costs relating to the development and improvement of real estate owned properties are capitalized to the extent realizable and supported by the fair value of the property less selling costs and other costs relating to holding the property that are charged to expense. Real estate owned is periodically evaluated for impairment and reductions in carrying value are recognized in the Company's consolidated statements of operations as other expenses.

Income Taxes - Deferred income taxes are recognized for the tax consequences of "temporary differences" by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The effect on deferred taxes of a change in tax rates is recognized in income in the period that includes the enactment date. A deferred tax liability is recognized for temporary differences that will result in taxable amounts in future years. A deferred tax asset is recognized for temporary differences that will result in deductible amounts in future years and for carryforwards. A valuation allowance is recognized if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax asset will not be realized.

The Company accounts for uncertain tax positions in accordance with *FASB ASC Topic 740 for Income Taxes*. The guidance clarifies the accounting and reporting for income taxes where interpretation of the tax law may be uncertain. The FASB prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of income tax uncertainties with respect to positions taken or expected to be taken in income tax returns. The uncertain tax liability for uncertain tax positions was zero at December 31, 2013 and December 31, 2012.

Goodwill and Other Intangibles - Net assets of companies acquired in purchase transactions are recorded at fair value at the date of acquisition and, as such, the historical cost basis of individual assets and liabilities are adjusted to reflect their fair value. Finite lived intangibles are amortized on an accelerated or straight-line basis over the period benefited. In accordance with *FASB ASC Topic 350 for Intangibles - Goodwill and Other*, goodwill is not amortized but is reviewed for potential impairment on an annual basis, or if events or circumstances indicate a potential impairment, at the reporting

unit level. The Company's review for impairment includes an assessment of qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying value, including goodwill. If it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying value, including goodwill, the first step of the two-step quantitative goodwill impairment test is performed, which compares the fair value of the reporting unit with its carrying amount, including goodwill. If the fair value of the reporting unit exceeds its carrying amount, goodwill of the reporting unit is considered not impaired. However, if the carrying amount of the reporting unit exceeds its fair value, an additional procedure must be performed. That additional procedure compares the implied fair value of the reporting unit's goodwill with the carrying amount of that goodwill. An impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value.

Other intangible assets subject to amortization are evaluated for impairment in accordance with applicable accounting guidance. An impairment loss will be recognized if the carrying amount of the intangible asset is not recoverable and exceeds fair value. The carrying amount of the intangible is considered not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use of the asset. The other intangibles are amortizing intangibles, which primarily consist of core deposit intangibles which are amortized over an estimated useful life of ten years.

Cash Surrender Value of Life Insurance - The Company funds the purchase of insurance policies on the lives of certain officers and employees of the Company. The Company has recognized any change in cash surrender value of life insurance in non-interest income in the Company's consolidated statements of operations. The Company has recognized insurance costs in non-interest expense in the Company's consolidated statements of operations.

Comprehensive Income - The Company presents a separate financial statement of comprehensive income that includes amounts from transactions and other events excluded from the Company's consolidated statements of operations and recorded directly to retained earnings.

Pension and Other Postretirement Benefits - The Company currently provides certain postretirement benefits to qualified retired employees. These postretirement benefits principally pertain to health insurance coverage and life insurance. The cost of such benefits is accrued during the years the employee provides service. The Bank has noncontributory defined benefit pension plans covering many of its employees. Additionally, the Company sponsors nonqualified supplemental employee retirement plans for certain participants. The benefits associated with these arrangements and plans are earned over a service period, and the Company estimates the amount of expense applicable to each plan or contract. The estimated obligations for the plans and contracts are reflected as liabilities on the Company's consolidated statements of condition.

Employee Savings and Stock Ownership Plan ("KSOP") - The Company accounts for its KSOP based on guidance set forth in *FASB ASC Topic 715 for Compensation – Retirement Benefits*. Shares are released to participants proportionately as the loan is repaid. If the Company declares a dividend, the dividends on the allocated shares would be recorded as dividends and charged to retained earnings. Dividends declared on common stock held by the KSOP and not allocated to the account of a participant can be used to repay the loan. Allocation of shares to the KSOP participants is contingent upon the repayment of the loan to the Company.

Stock Based Compensation - The Company accounts for stock awards and stock options granted to employees and directors based on guidance set forth in *FASB ASC Topic 718 for Compensation – Stock Compensation*. The Company recognizes the related expense for the options and awards over the service period using the straight-line method.

Earnings Per share - The Company follows the guidance set forth in *FASB ASC Topic 260 for Earnings Per Share*. Basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding for the period. Diluted earnings per share are based on the weighted average number of shares and the dilutive impact if any of stock options and restricted stock awards.

Cash and Cash Equivalents - For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash and balances due from banks, interest bearing deposits and federal funds sold.

Recent Accounting Pronouncements

In January 2014, the FASB issued ASU 2014-04 – Troubled Debt Restructuring by Creditors (Subtopic 310-40): The amendments in this update apply to all creditors who obtain physical possession (resulting from an in substance repossession or foreclosure) of residential real estate property collateralizing a consumer mortgage loan in satisfaction of a receivable. The objective of the amendments in this update is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this update are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The Company will comply with this guidance and its effective date. The Company does not anticipate any material impact to the consolidated financial statements related to this guidance.

Also in January 2014, the FASB issued ASU 2014-01, Investments - Equity Method and Joint Ventures (Topic 323), Accounting for Investments in Qualified Affordable Housing Projects: The objective of this update is to provide guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. The amendments in this update permit reporting entities to make an accounting policy election to account for their investments in qualified affordable housing projects using the proportional amortization method if certain conditions are met. Under the proportional amortization method, an entity amortizes the initial cost of the investment in proportion to the tax credits and other tax benefits received and recognizes the net investment performance in the income statement as a component of income tax expense (benefit). For those investments in qualified affordable housing projects not accounted for using the proportional amortization method, the investment should be accounted for as an equity method investment or a cost method investment in accordance with Subtopic 970-323. The amendments in this update should be applied retrospectively to all periods presented. A reporting entity that uses the effective yield method to account for its investments in qualified affordable housing projects before the date of adoption may continue to apply the effective yield method for those preexisting investments. The amendments in this update are effective for public business entities for annual periods and interim reporting periods within those annual periods, beginning after December 15, 2014. The Company intends to adopt this guidance on its effective date. As result of the guidance certain items will be presented differently in the income statement but there will be no overall change to reported net income amounts.

In December 2013, the FASB issued ASU 2013-12, Definition of a Public Business Entity: This update will aim to minimize the inconsistency and complexity of having multiple definitions of, or a diversity in practice as to what constitutes, a nonpublic entity and public entity within U.S. generally accepted accounting principles on a going-forward basis. This update addresses those issues by defining public business entity. The FASB has not set an actual effective date for the amendments in this update. However, the term public business entity will be used in Accounting Standards Updates in the future. The Company does not anticipate an impact to the financial statements related to this guidance.

In July 2013, the FASB issued ASU 2013-11, Income Taxes, Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists (Topic 740): The amendments of this update state that an unrecognized tax benefit, or a portion of an unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. This ASU applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. The amendments in this ASU are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. The Company does not anticipate a material impact to the consolidated financial statements related to this guidance.

In July 2013, the FASB issued ASU 2013-10, Derivatives and Hedging, Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate "OIS") as a Benchmark Interest Rate for Hedge Accounting Purposes (Topic 815): The amendments of this update permit the Fed Funds Effective Swap Rate to be used as a U.S. benchmark interest rate for hedge accounting purposes under Topic 815, in addition to the interest rates on direct Treasury obligations of the U.S. government ("UST") and the London Interbank Offered Rate ("LIBOR") swap rate. The amendments also remove the restriction on using different benchmark rates for similar hedges. The amendments are effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. The Company has not elected to apply hedge accounting of the benchmark interest rate under Topic 815 to any of its derivative financial instruments. The Company complied with this guidance for the period ended September 30, 2013 and noted no significant impact to the condensed consolidated financial statements related to this guidance.

In February 2013, the FASB issued ASU 2013-04, Liabilities (Topic 405): The amendments in this update provide guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this update is fixed at the reporting date, except for obligations addressed within existing guidance in U.S. GAAP. This includes debt arrangements, other contractual obligations, and settled litigation and judicial rulings. The guidance in this update requires an entity to measure those obligations as the sum of the amount the reporting entity agreed to pay on the basis of its arrangement among its co-obligors and any additional amount the reporting entity expects to pay on behalf of its co-obligors. The guidance in this update also requires an entity to disclose the nature and amount of the obligation as well as other information about those obligations. The amendments in this update are effective for public entities for fiscal years, and interim periods within those years, beginning after December 15, 2013. Early adoption is permitted. The Company does not anticipate a significant impact to the consolidated financial statements related to this guidance.

In February 2013, the FASB issued ASU 2013-02, Comprehensive Income, Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income (Topic 220): The amendments in this update aim to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments in this update seek to attain that objective by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. GAAP to be

reclassified in its entirety to net income. For other amounts that are not required under U.S. GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under U.S. GAAP that provide additional detail about those amounts. This would be the case when a portion of the amount reclassified out of accumulated other comprehensive income is reclassified to a balance sheet account instead of directly to income or expense in the same reporting period. For public entities, the amendments are effective prospectively for reporting periods beginning after December 15, 2012. The Company has complied with the guidance for the period ended December 31, 2013.

In January 2013, the FASB issued ASU 2013-01, Balance Sheet, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities (Topic 210): The amendments in this update clarify that the scope of Update 2011-11 applies to derivatives accounted for in accordance with Topic 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. An entity is required to apply the amendments for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. An entity should provide the required disclosures retrospectively for all comparative periods presented. The Company has complied with the guidance for the period ended December 31, 2013.

In December 2011, the FASB issued ASU 2011-12, Comprehensive Income (Topic 220): The amendments in this update supersede certain pending paragraphs in ASU No. 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income, to effectively defer only those changes in ASU 2011-05 that relate to the presentation of reclassification adjustments out of accumulated other comprehensive income. The amendments will be temporary to allow the Board time to deliberate the presentation requirements for reclassifications out of accumulated other comprehensive income for annual and interim financial statements for public, private and non profit entities. The amendments in this update are effective for public entities for fiscal years, and interim annual periods within those years, beginning after December 15, 2011, consistent with ASU 2011-05. The Company has presented comprehensive income in two separate but consecutive statements for the years ended December 31, 2013, 2012 and 2011.

In December 2011, the FASB issued ASU 2011-11, Balance Sheet, Disclosure about Offsetting Assets and Liabilities (Topic 210): The objective of this update is to provide enhanced disclosures that will enable users of its financial statements to evaluate the effect or potential effect of netting arrangements on an entity's financial position. This includes the effect or potential effect of rights of setoff associated with an entity's recognized assets and recognized liabilities within the scope of this Update. The amendments require enhanced disclosures by requiring improved information about financial instruments and derivative instruments that are either (1) offset in accordance with either Section 210-20-45 or Section 815-10-45 or (2) subject to an enforceable master netting arrangement or similar agreement, irrespective of whether they offset in accordance with either Section 210-20-45 or Sections 815-10-45. These amendments are effective for annual periods beginning on or after January 3, 2013, and interim periods within those annual periods. An entity should provide the disclosures required by those amendments retrospectively for all comparative periods presented. The Company has complied with the guidance for the period ended December 31, 2013.

In December 2011, the FASB issued ASU 2011-10, Property, Plant and Equipment (Topic 360): The objective of this update is to resolve the diversity in practice about whether the guidance in the Subtopic 360-20, Property, Plant and Equipment – Real Estate Sales, applies to a parent that ceases to have a controlling financial interest (as described in Subtopic 810-10 Consolidation – Overall) in a subsidiary that is in substance real estate as a result of default on the subsidiary's nonrecourse debt. This update does not address whether the guidance in Subtopic 360-20 would apply to other circumstances when parent ceases to have a controlling financial interest in a subsidiary that is in substance real estate. An entity is required to apply the amendments for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The Company has complied with the guidance for the period ended December 31, 2013.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income. This ASU amends the FASB ASC (Codification) to allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. ASU 2011-05 eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholder's equity. The amendments to the Codification in the ASU do not change the items that must be reported in other comprehensive income or when an item of other comprehensive income must be reclassified to net income. ASU 2011-05 should be applied retrospectively. For public entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. The Company adopted this guidance on January 1, 2012.

3. CHANGES IN AND RECLASSIFICATIONS OUT OF ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

The following table presents the changes in the balances of each component of accumulated other comprehensive income ("AOCI") for the year ended December 31, 2013. All amounts are presented net of tax.

(Dollars in thousands)	Net unrealized holding gains (losses) on available-for-sale securities	Defined benefit pension plan items	Total
Beginning balance, January 1, 2013	\$18,703	(\$25,730)	(\$7,027)
Changes in other comprehensive loss before reclassifications	(22,993)	7,981	(15,012)
Amount reclassified from accumulated other comprehensive loss	(788)	1,473	685
Net current-period other comprehensive (loss) income	(23,781)	9,454	(14,327)
Ending balance, December 31, 2013	(\$5,078)	(\$16,276)	(\$21,354)

The following table presents reclassifications out of AOCI by component for the year ended December 31, 2013:

For the Year Ended December 31, 2013		
(Dollars in thousands)		
Details about accumulated other comprehensive loss components	Amount reclassified from accumulated other comprehensive loss	Affected line item in the consolidated statements of operations
Unrealized gains and losses on available-for-sale securities	(\$1,247)	Net gain on sale of investment securities
	459	Income tax expense
	(\$788)	Net of tax
Amortization of defined benefit pension items		
Transition obligation	\$ 164	Other non-interest expense
Prior service costs	(527)	Other non-interest expense
Net recognized actuarial losses	2,614	Other non-interest expense
	2,251	Total before tax
	(778)	Income tax benefit
	\$1,473	Net of tax

¹ These accumulated other comprehensive income (loss) components are included in the computation of net periodic pension cost. See Note 17 - Pension and Other Postretirement Benefits for additional details.

4. BUSINESS COMBINATIONS

On April 3, 2012, the Company consummated the transactions contemplated by an Agreement and Plan of Merger (the "Merger Agreement") by and among the Company, the Bank, SE Financial Corp. ("SE Financial") and St. Edmond's Federal Savings Bank, a federally chartered stock savings bank, and a wholly-owned subsidiary of SE Corp ("St. Edmond's"), pursuant to which SE Financial merged with a newly formed subsidiary of the Company and thereby became a wholly owned subsidiary of the Company (the "Merger"). Immediately thereafter, St. Edmond's merged with and into the Bank. Pursuant to the terms of the Merger Agreement, SE Financial shareholders received a cash payment of \$14.50 for each share of SE Financial common stock they owned as of the effective date of the acquisition. Additionally, all options to purchase SE Financial common stock which were outstanding and unexercised immediately prior to the completion of the acquisition were cancelled in exchange for a cash payment made by SE Financial equal to the positive difference between \$14.50 and the exercise price of such options. In accordance with the Merger Agreement, the aggregate consideration paid to SE Financial shareholders was approximately \$29.4 million. The results of SE Financial's operations are included in the Company's consolidated statements of operations for the period beginning on April 3, 2012, the date of the acquisition, through December 31, 2013.

Upon completion of the Merger, the Company paid cash for 100% of the outstanding voting shares of SE Financial. The acquisition of SE Financial and St. Edmond's increased the Company's market share in southeastern Pennsylvania, specifically Philadelphia and Delaware Counties. Additionally, the acquisition provided Beneficial with new branches in Roxborough, Pennsylvania and Deptford, New Jersey.

The acquisition of SE Financial was accounted for using the acquisition method of accounting and, accordingly, assets acquired, liabilities assumed and consideration paid were recorded at their estimated fair values as of the acquisition date. The excess of consideration paid over the fair value of net assets acquired was recorded as goodwill in the amount of approximately \$11.5 million, which is not amortizable and is not deductible for tax purposes. The Company allocated the total balance of goodwill to its banking segment.

In connection with the SE Financial merger, the consideration paid and the fair value of the identifiable assets acquired and liabilities assumed as of the date of acquisition are summarized in the following table:

(Dollars in thousands)

Consideration paid:

Cash paid to SE Financial shareholders	\$29,438
Change in control payments	<u>1,904</u>
Value of consideration	\$31,342

Assets acquired:

Cash and due from banks	\$33,807
Investment securities	39,793
FHLB stock	2,471
Loans	175,231
Premises and equipment	3,729
Bank owned life insurance	3,813
Core deposit intangible	708
Real estate owned	1,155
Accrued interest receivable	837
Deferred tax asset	6,392
Other assets	<u>28,324</u>
Total assets	296,260

Liabilities assumed:

Deposits	275,293
Advances by borrowers for taxes and insurance	482
Accrued interest payable	35
Other liabilities	<u>595</u>
Total liabilities	276,405

Net assets acquired

19,855

Goodwill resulting from acquisition of SE Financial

\$11,487

During the first quarter of 2013, the Company finalized its fair value estimates related to the Merger. There were no adjustments to goodwill during this period from the amount reported in the Company's Form 10-K for the year ended December 31, 2012.

In many cases, the fair values of assets acquired and liabilities assumed were determined by estimating the cash flows expected to result from those assets and liabilities and discounting them at appropriate market rates. The most significant category of assets for which this procedure was used was acquired loans. The excess of expected cash flows above the fair value of the majority of loans will be accreted to interest income over the remaining lives of the loans in accordance with FASB ASC 310-20.

Certain loans, for which specific credit-related deterioration was identified, are recorded at fair value, reflecting the present value of the amounts expected to be collected. Income recognition on these loans is based on a reasonable expectation of the timing and amount of cash flows to be collected. The timing of the sale of loan collateral was estimated for acquired loans deemed impaired and considered collateral dependent. For these collateral dependent impaired loans, the excess of the future expected cash flow over the present value of the future expected cash flow represents the accretable yield, which will be accreted into interest income over the estimated liquidation period using the effective interest method.

The following table details the loans that are accounted for in accordance with FASB ASC 310-30 as of April 3, 2012:

(Dollars in thousands)

Contractually required principal and interest at acquisition	\$9,807
Contractual cash flows not expected to be collected (nonaccretable difference)	<u>4,532</u>
Expected cash flows at acquisition	5,275
Interest component of expected cash flows (accretable discount)	<u>159</u>
Fair value of acquired loans accounted for under FASB ASC 310-30	<u>\$5,116</u>

Acquired loans not subject to the requirements of FASB ASC 310-30 are recorded at fair value. The fair value mark on each of these loans will be accreted into interest income over the remaining life of the loan. The following table details loans that are not accounted for in accordance with FASB ASC 310-30 as of April 3, 2012:

(Dollars in thousands)

Contractually required principal and interest at acquisition	\$175,694
Contractual cash flows not expected to be collected (credit mark)	<u>8,941</u>
Expected cash flows at acquisition	166,753
Interest rate premium mark	<u>3,362</u>
Fair value of acquired loans not accounted for under FASB ASC 310-30	<u>\$170,115</u>

In accordance with GAAP, there was no carryover of the allowance for loan losses that had been previously recorded by SE Financial.

In connection with the acquisition of SE Financial, the Company acquired an investment portfolio with a fair value of \$39.8 million. All investment securities were sold on April 3, 2012 at fair value.

In connection with the acquisition of SE Financial, the Company recorded a net deferred income tax asset of \$6.4 million related to SE Financial's net operating loss carryforward, as well as other tax attributes of the acquired company, along with the effects of fair value adjustments resulting from applying the acquisition method of accounting.

The fair value of savings and transaction deposit accounts acquired from SE Financial provide value to the Company as a source of below market rate funds. The fair value of the core deposit intangible ("CDI") was determined based on a discounted cash flow analysis using a discount rate based on the estimated cost of capital for a market participant. To calculate cash flows, deposit account servicing costs (net of deposit fee income) and interest expense on deposits were compared to the cost of alternative funding sources available to the Company. The life of the deposit base and projected deposit attrition rates were determined using Beneficial's historical deposit data. The CDI was valued at \$708 thousand or 0.32% of deposits. The intangible asset is being amortized on an accelerated basis over ten years. Amortization for the three and twelve months ended December 31, 2012 was \$32 thousand and \$96 thousand, respectively.

The fair value of certificates of deposit accounts was calculated based on the projected cash flows from maturing certificates considering their contractual rates as compared to prevailing market rates. The valuation adjustment is equal to the present value of the difference of these two cash flows, discounted at the prevailing market rates for a certificate with a corresponding maturity. This valuation adjustment was valued at \$1.2 million and is being amortized in line with the expected cash flows driven by maturities of these deposits over the next five years. Amortization for the three and twelve months ended December 31, 2012 was \$154 thousand and \$436 thousand, respectively.

Direct costs related to the Merger were expensed as incurred. During the year ended December 31, 2012, the Company incurred \$2.2 million in merger and acquisition integration expenses related to the Merger, including \$47 thousand of facility expenses, \$783 thousand of contract termination expenses, \$441 thousand of severance expense, and \$893 thousand of other merger expenses.

The Company recognized a \$407 thousand gain in 2012 related to the re-measurement to fair value equal to \$695 thousand of the Company's previously held 2.5% equity interest in SE Financial Corp that is included in net gain on sale of investment securities within the Company's financial statements. The fair value of the Company's previously held equity interest was based on the cash payment of \$14.50 for each share of SE Financial common stock.

The following table presents actual operating results attributable to SE Financial since the April 3, 2012 acquisition date through December 31, 2012. This information does not include purchase accounting adjustments or acquisition integration costs.

	SE Financial April 3, 2012 to December 31, 2012
<u>(Dollars in thousands)</u>	
Net interest income	\$6,149
Non-interest income	326
Non-interest expense and income taxes	<u>(2,780)</u>
Net income	<u>\$3,695</u>

The following table presents unaudited pro forma information as if the acquisition of SE Financial had occurred on both January 1, 2012 and January 1, 2011. This pro forma information gives effect to certain adjustments, including purchase accounting fair value adjustments, amortization of core deposit and other intangibles and related income tax effects.

The pro forma information does not necessarily reflect the results of operations that would have occurred had the acquisition of SE Financial occurred at the beginning of 2012 or 2011. In particular, merger and acquisition integration costs of \$2.2 million and \$848 thousand incurred by Beneficial and SE Financial, respectively, and expected cost savings are not reflected in the pro forma amounts.

	Pro forma For the Year Ended	
	<u>December 31, 2012</u>	<u>December 31, 2011</u>
<u>(Dollars in thousands)</u>		
Net interest income	\$142,055	\$153,686
Allowance for loan loss	(28,128)	(38,981)
Non-interest income	27,722	25,942
Non-interest expense and income taxes	<u>(124,871)</u>	<u>(125,986)</u>
Net income	<u>\$16,778</u>	<u>\$14,661</u>
Net earnings per share		
Basic	\$0.22	\$ 0.19
Diluted	\$0.22	\$ 0.19

5. EARNINGS PER SHARE

The following table presents a calculation of basic and diluted earnings per share for the years ended December 31, 2013, 2012, and 2011. Earnings per share is computed by dividing net income available to common shareholders by the weighted average number of shares of common stock outstanding. The difference between common shares issued and basic average common shares outstanding, for purposes of calculating basic earnings per share, is a result of subtracting unallocated employee stock ownership plan ("ESOP") shares and unvested restricted stock shares. See Note 19 to these consolidated financial statements for further discussion of stock grants.

	For the Year Ended December 31,		
	<u>2013</u>	<u>2012</u>	<u>2011</u>
<u>(Dollars in thousands, except share and per share amounts)</u>			
Basic and diluted earnings per share:			
Net income	\$12,578	\$14,179	\$11,036
Basic average common shares outstanding	75,841,392	76,657,265	77,075,726
Effect of dilutive securities	<u>244,006</u>	<u>170,607</u>	<u>155,577</u>
Dilutive average shares outstanding	76,085,398	76,827,872	77,231,303
Net earnings per share			
Basic	\$0.17	\$0.18	\$0.14
Diluted	\$0.17	\$0.18	\$0.14

For the year ended December 31, 2013, there were 2,726,800 outstanding options and no restricted stock grants that were anti-dilutive for the earnings per share calculation. For the year ended December 31, 2012, there were 2,178,400 outstanding options and no restricted stock grants that were anti-dilutive for the earnings per share calculation. For the year ended December 31, 2011, there were 2,086,100 outstanding options and 126,000 restricted stock grants that were anti-dilutive for the earnings per share calculation. Options in which the exercise price exceeds the average market price are considered anti-dilutive and are not included in the computation of diluted earnings per share.

6. CASH AND DUE FROM BANKS

The Bank is required to maintain average reserve balances in accordance with federal requirements. Cash and due from banks in the consolidated statements of financial condition include \$17.5 million and \$20.5 million at December 31, 2013 and 2012, respectively, relating to this requirement.

Cash and due from banks also includes fiduciary funds of \$767 thousand and \$920 thousand at December 31, 2013 and 2012, respectively, relating to insurance services.

7. INVESTMENT SECURITIES

The amortized cost and estimated fair value of investments in debt and equity securities at December 31, 2013 and 2012 are as follows:

(Dollars in thousands)

	December 31, 2013			
	Investment Securities Available-for-Sale			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
U.S. Government Sponsored

Total	\$1,237,876	\$31,825	\$2,210	\$1,267,491

December 31, 2012				
Investment Securities Held-to-Maturity				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
GNMA guaranteed mortgage certificates	\$ 536	\$ 1	\$-	\$ 537
GSE mortgage-backed securities	430,256	9,781	-	440,037
Collateralized mortgage obligations	38,909	135	-	39,044
Municipal bonds	5,497	182	-	5,679
Foreign bonds	2,000	10	-	2,010
Total	\$477,198	\$10,109	\$-	\$487,307

During the year ended December 31, 2013, the Bank received proceeds from the sale of mortgage-backed securities of \$38.3 million, non-agency collateralized mortgage obligation (CMOs) of \$11.3 million, pooled trust preferred collateralized debt obligations (CDOs) of \$4.7 million, and other securities of \$2.0 million that resulted in an aggregate net gain of \$1.4 million. The \$38.3 million of mortgage-backed securities sold during the year ended December 31, 2013 included four securities classified as held to maturity with an aggregate carrying value of approximately \$2.0 million. The sale of the securities classified as held to maturity resulted in a gain of \$130 thousand during the year ended December 31, 2013. Given that the Bank had collected more than 85% of the principal balance of each held to maturity security as of the date of sale, the Bank considers these sales to be maturities.

In December 2013, final rules implementing the Volcker Rule (Section 619 of the Dodd-Frank Wall Street Reform and Consumer Protection Act) were promulgated by the five federal financial regulatory agencies responsible for implementing and enforcing the rule. The Volcker Rule prohibits "banking entities" from proprietary trading and imposes substantial restrictions on their ownership or sponsorship of, and relationships with, certain "covered funds," largely hedge funds and private equity funds. Importantly, with respect to proprietary trading, the final rule tightens the requirements for the hedging exemption to require that the hedge demonstrably mitigates a "specific, identified exposure."

During the quarter ended December 31, 2013, the Company recorded a \$1.2 million loss on the sale of \$4.7 million of pooled trust preferred securities due to the uncertainty regarding banking institutions being allowed to hold pooled trust preferred securities under the Volcker Rule. These securities were in a \$740 thousand unrealized loss position at the time of the sale. Management reviewed the securities included in the Company's investment portfolio and determined that the remaining securities held in the Company's investment portfolio as of December 31, 2013 are not impacted by Volcker Rule. In addition, management determined that the Company has no hedges that would be impacted by the Volcker Rule.

The following tables provide information on the gross unrealized losses and fair market value of the Company's investments with unrealized losses that are not deemed to be other than temporarily impaired, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at December 31, 2013 and 2012:

(Dollars in thousands)

	At December 31, 2013					
	Less than 12 months		12 months or longer		Total	
	Unrealized		Unrealized		Unrealized

Management evaluates securities for other-than-temporary impairment ("OTTI") at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. The Company determines whether the unrealized losses are temporary in accordance with guidance under FASB ASC Topic 320 for Investments - Debt and Equity Securities. The evaluation is based upon factors such as the creditworthiness of the issuers/guarantors, the underlying collateral, if applicable, and the continuing performance of the securities. Management also evaluates other facts and circumstances that may be indicative of an OTTI condition. This includes, but is not limited to, an evaluation of the type of security, length of time and extent to which the fair value has been less than cost, and near-term prospects of the issuer, the likelihood of recovering the Company's investment, whether the Company has the intent to sell the investment or that it is more likely than not that the Company will be required to sell the investment before recovery, and other available information to determine the nature of the decline in market value of the securities.

The Company records the credit portion of OTTI through earnings based on the credit impairment estimates generally derived from cash flow analyses. The remaining unrealized loss, due to factors other than credit, is recorded in other comprehensive income ("OCI"). The Company had an unrealized loss of \$31.6 million related to its GSE mortgage-backed securities as of December 31, 2013. Additionally, the Company had an unrealized loss of \$3.0 million on GSE collateralized mortgage obligations and an unrealized loss of \$100 thousand on other debt securities and mutual funds as of December 31, 2013. The increase in the unrealized loss is due to an increase in intermediate and long-term interest rates during 2013.

GSE Mortgage-Backed Securities

The Company's investments that were in a loss position for less than 12 months included GSE mortgage-backed securities with an unrealized loss of 2.9%. The unrealized loss is due to current interest rate levels relative to the Company's cost. Because the unrealized losses are due to current interest rate levels relative to the Company's cost and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell these investments before recovery of its amortized cost, which may be at maturity, the Company did not consider these investments to be other-than temporarily impaired at December 31, 2013.

GSE Collateralized Mortgage Obligations (CMOs)

The Company's investments that were in a loss position for greater than 12 months included a GSE CMO with an unrealized loss of 5.5% as of December 31, 2013. The Company's investments that were in a loss position for less than 12 months included GSE CMOs with an unrealized loss of 1.2% as of December 31, 2013. The unrealized loss is due to current interest rate levels relative to the Company's cost. Because the unrealized losses are due to current interest rate levels relative to the Company's cost and not credit quality, and because the Company does not intend to sell the investments and it is not more likely than not that the Company will be required to sell these investments before recovery of its amortized cost, which may be at maturity, the Company does not consider these investments to be other-than temporarily impaired at December 31, 2013.

Other Securities

The Company reviewed its portfolio for the twelve months ended December 31, 2013, and with respect to the remaining debt securities in an unrealized loss position, the Company does not intend to sell, and it is not more likely than not that the Company will be required to sell, these securities in a loss position prior to their anticipated recovery.

The following table sets forth the stated maturities of the investment securities at December 31, 2013 and 2012. Maturities for mortgage-backed securities are dependent upon the rate environment and prepayments of the underlying loans. For purposes of this table they are presented separately.

	December 31, 2013		December 31, 2012

Total	<u>\$528,829</u>	<u>\$514,633</u>	<u>\$477,198</u>	<u>\$487,307</u>

At December 31, 2013 and December 31, 2012, \$296.8 million and \$438.4 million, respectively, of securities were pledged to secure municipal deposits. At December 31, 2013 and December 31, 2012, the Company had \$33.2 million and \$96.2 million, respectively, of securities pledged as collateral on secured borrowings. At December 31, 2013, the Company had no securities pledged as collateral on interest rate swaps while at December 31, 2012, the Company had \$503 thousand of securities pledged as collateral on interest rate swaps.

8. LOANS

Major classifications of loans at December 31, 2013 and 2012 are summarized as follows:

December 31, (Dollars in thousands)	2013	2012
Commercial:		
Commercial real estate	\$584,133	\$ 639,557
Commercial business loans	378,663	332,169
Commercial construction	38,067	105,047
Total commercial loans	<u>1,000,863</u>	<u>1,076,773</u>
Residential:		
Residential real estate	683,700	665,246
Residential construction	277	2,094
Total residential loans	<u>683,977</u>	<u>667,340</u>
Consumer loans:		
Home equity & lines of credit	234,154	258,499
Personal	40,892	55,850
Education	206,521	217,896
Automobile	175,400	170,946
Total consumer loans	<u>656,967</u>	<u>703,191</u>
Total loans	<u>2,341,807</u>	<u>2,447,304</u>
Allowance for losses	(55,649)	(57,649)
Loans, net	<u>\$2,286,158</u>	<u>\$2,389,655</u>

Included in the balance of residential loans are approximately \$780 thousand and \$2.7 million of loans held for sale at December 31, 2013 and December 31, 2012, respectively. These loans are carried at the lower of cost or estimated fair value, on an aggregate basis. Loans held for sale are loans originated by the Bank to be sold to a third party under contractual obligation to purchase the loans from the Bank. For the year ended December 31, 2013 and 2012, the Bank sold residential mortgage loans with an unpaid principal balance of approximately \$20.6 million and \$100.7 million, respectively, and recorded mortgage banking income of approximately \$1.0 million and \$2.7 million, respectively. The Bank retained the related servicing rights for the loans that were sold to Fannie Mae and receives a 25 basis point servicing fee from the purchaser of the loans.

In the ordinary course of business, the Company has granted loans to executive officers and directors and their affiliates amounting to \$463 thousand, \$386 thousand and \$202 thousand at December 31, 2013, 2012, and 2011, respectively. The amount of payoffs and repayments with respect to such loans during the years ended December 31, 2013, 2012 and 2011 totaled \$77 thousand, \$94 thousand and \$310 thousand, respectively. During the year ended December 31, 2013, there were \$150 thousand new related party loans granted compared to no new related party loans granted during the year ended December 31, 2012 and \$1 thousand granted during the year ended December 31, 2011.

Allowance for Loan Losses

The allowance for loan losses is a valuation allowance for probable losses inherent in the loan portfolio. The Company evaluates the appropriateness of the allowance for loan losses balance on loans on a quarterly basis. When additional allowances are necessary, a provision for loan losses is charged to earnings. The Company's methodology for assessing the appropriateness of the allowance for loan losses consists of: (1) a specific valuation allowance on identified problem loans; (2) a general valuation allowance on the remainder of the loan portfolio; and (3) an unallocated component. Management established an unallocated reserve to cover uncertainties that the Company believes have resulted in losses that have not yet been allocated to specific elements of the general component. Such factors include uncertainties in economic conditions and in identifying triggering events that directly correlate to subsequent loss rates, changes in appraised value of underlying collateral, risk factors that have not yet manifested themselves in loss allocation factors and historical loss experience data that may not precisely correspond to the current portfolio or economic conditions. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodology for estimating general losses in the portfolio. The appropriate allowance level is estimated based upon factors and trends identified by the Company at the time the consolidated financial statements are prepared. Management continuously evaluates its allowance methodology; however, the unallocated allowance is subject to changes each reporting period.

Although the Company determines the amount of each element of the allowance separately, the entire allowance for loan losses is available to absorb losses in the loan portfolio. The Company charges-off the collateral or discounted cash flow deficiency on all loans at 90 days past due, except government guaranteed student loans, and all loans rated substandard or worse that are 90 days past due. As a result, no specific valuation allowance was maintained at December 31, 2013, 2012 and 2011 for non-performing loans.

The following tables set forth the activity in the allowance for loan losses by portfolio for the years ended December 31, 2013, 2012 and 2011:

The provision for loan losses charged to expense is based upon past loan loss experience and an evaluation of estimated losses in the current loan portfolio, including the evaluation of impaired loans under FASB ASC Topic 310 for Loans and Debt Securities. Under the accounting guidance FASB ASC Topic 310 for Receivables, for all loan segments a loan is considered to be impaired when, based upon current information and events, it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the loan. An insignificant delay or insignificant shortfall in amount of payments does not necessarily result in the loan being identified as impaired. When all or a portion of the loan is deemed uncollectible, the uncollectible portion is charged-off. The measurement is based either on the present value of expected future cash flows discounted at the loan's interest rate, or the fair value of the collateral if the loan is collateral-dependent. Most of the Company's commercial loans are collateral dependent and therefore the Company uses the value of the collateral to measure the loss. Any collateral or discounted cash flow deficiency for loans that are 90 days past due are charged-off. Impairment losses are included in the provision for loan losses. Large groups of homogeneous loans are collectively evaluated for impairment, except for those loans restructured under a troubled debt restructuring.

Classified Loans

The Bank's credit review process includes a risk classification of all commercial and residential loans that includes pass, special mention, substandard and doubtful. The classification of a loan may change based on changes in the creditworthiness of the borrower. The description of the risk classifications are as follows:

A loan is classified as pass when payments are current and it is performing under the original contractual terms. A loan is classified as special mention when the borrower exhibits potential credit weakness or a downward trend which, if not checked or corrected, will weaken the asset or inadequately protect the Bank's position. While potentially weak, the borrower is currently marginally acceptable; no loss of principal or interest is envisioned. A loan is classified as substandard when the borrower has a well defined weakness or weaknesses that jeopardize the orderly liquidation of the debt. A substandard loan is inadequately protected by the current net worth and paying capacity of the obligor, normal repayment from this borrower is in jeopardy, and there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. A loan is classified as doubtful when a borrower has all weaknesses inherent in a loan classified as substandard with the added provision that: (1) the weaknesses make collection of debt in full on the basis of currently existing facts, conditions and values highly questionable and improbable; (2) serious problems exist to the point where a partial loss of principal is likely; and (3) the possibility of loss is extremely high, but because of certain important, reasonably specific pending factors which may work to the advantage and strengthening of the assets, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens and additional refinancing plans. The Company charges-off the collateral or discounted cash flow deficiency on all loans on non-accrual status. In all cases, loans (except for government-guaranteed education loans) are placed on non-accrual when 90 days past due or earlier if collection of principal or interest is considered doubtful.

The following tables set forth the amounts and percentage of the portfolio of classified asset categories for the commercial and residential loan portfolios at December 31, 2013 and 2012:

Loans Acquired with Deteriorated Credit Quality

The outstanding principal balance and related carrying amount of loans acquired with deteriorated credit quality, for which the Company applies the provisions of ASC 310-30, as of December 31, 2013 and 2012, are as follows:

(Dollars in thousands)	<u>December 31, 2013</u>	<u>December 31, 2012</u>
Oustanding principal balance	\$923	\$3,199
Carrying amount	499	2,348

The following table presents changes in the accretable discount on loans acquired with deteriorated credit quality, for which the Company applies the provisions of ASC 310-30, since the April 3, 2012 acquisition date through December 31, 2013:

(Dollars in thousands)	<u>Accretable Discount</u>
Balance, April 3, 2012	\$159
Accretion	<u>(87)</u>
Balance, December 31, 2012	\$72
Accretion	<u>(57)</u>
Balance, December 31, 2013	<u>\$15</u>

Loan Delinquencies and Non-accrual Loans

The Company monitors the past due and non-accrual status of loans in determining the loss classification, impairment status and in determining the allowance for loan losses. Generally, all loans past due 90 days are put on non-accrual status. Education loans greater than 90 days delinquent continue to accrue interest as they are U.S. government guaranteed with little risk of credit loss.

The following tables provide information about delinquent and non-accrual loans in the Company's portfolio at the dates indicated:

(1) Non-accruing loans do not include \$2.3 million of loans acquired with deteriorated credit quality, which have been recorded at their fair value at acquisition.

Troubled Debt Restructured Loans

The Bank determines whether a restructuring of debt constitutes a troubled debt restructuring (“TDR”) in accordance with guidance under FASB ASC Topic 310 Receivables. The Bank considers a loan a TDR when the borrower is experiencing financial difficulty and the Bank grants a concession that they would not otherwise consider but for the borrower’s financial difficulties. A TDR includes a modification of debt terms or assets received in satisfaction of the debt (including a foreclosure or a deed in lieu of foreclosure) or a combination of types. The Bank evaluates selective criteria to determine if a borrower is experiencing financial difficulty, including the ability of the borrower to obtain funds from sources other than the Bank at market rates. The Bank considers all TDR loans as impaired loans and, generally, they are put on non-accrual status. The Bank will not consider the loan a TDR if the loan modification was made for customer retention purposes. The Bank’s policy for returning a loan to accruing status requires the preparation of a well documented credit evaluation which includes the following:

- A review of the borrower’s current financial condition in which the borrower must demonstrate sufficient cash flow to support the repayment of all principal and interest including any amounts previously charged-off;
- An updated appraisal or home valuation which must demonstrate sufficient collateral value to support the debt;
- Sustained performance based on the restructured terms for at least six consecutive months; and
- Approval by the Special Assets Committee which consists of the Chief Credit Officer, the Chief Financial Officer and other members of senior management.

The Bank had 35 loans totaling \$28.4 million, 31 loans totaling \$20.8 million, and 36 loans totaling \$23.7 million whose terms were modified in a manner that met the criteria for a TDR as of December 31, 2013, 2012 and 2011, respectively. As of December 31, 2013, 10 of the TDRs were commercial real estate loans with an aggregate outstanding balance of \$8.6 million, 12 were commercial business loans with an aggregate outstanding balance of \$16.0 million, 4 were commercial construction with an aggregate outstanding balance of \$1.3 million, 4 were residential real estate loans with an aggregate outstanding balance of \$2.1 million, and the remaining 5 were consumer loans with an aggregate outstanding balance of \$394 thousand. The Company had four accruing TDRs in the amount of \$10.1 million as of December 31, 2013 that were modified during the year. As of December 31, 2012, 10 of the TDRs were commercial real estate loans with an aggregate outstanding balance of \$7.8 million, 7 were commercial business loans with an aggregate outstanding balance of \$9.2 million, 3 were commercial construction with an aggregate outstanding balance of \$2.7 million, 2 were residential real estate loans with an aggregate outstanding balance of \$145 thousand, and the remaining 9 were consumer loans with an aggregate outstanding balance of \$908 thousand. The Company had accruing TDRs in the amount of \$5.5 million as of December 31, 2012 that were modified during the year. As of December 31, 2011, 11 of the TDRs were commercial real estate loans with an aggregate outstanding balance of \$7.8 million, 10 were commercial business loans with an aggregate outstanding balance of \$9.9 million, one was a commercial construction loan with an outstanding balance of \$3.9 and the remaining 14 loans were residential real estate loans with an aggregate outstanding balance of \$2.1 million.

The following tables summarize information about TDRs as of and for the years ended December 31, 2013, 2012 and 2011:

(Dollars in thousands, except number of loans)	For the Year Ended December 31, 2013	
	No. of Loans	Balance
Loans modified during the period in a manner that met the definition of a TDR	11	\$14,437
Modifications granted:		
Reduction of outstanding principal due	1	-
Deferral of principal amounts due	3	2,132
Temporary reduction in interest rate	-	-
Deferral of interest due	-	-
Below market interest rate granted	3	2,183
Release of collateral	4	10,122
Outstanding principal balance immediately before modification	11	14,576
Outstanding principal balance immediately after modification	11	14,437
Aggregate principal charge-off recognized on TDRs outstanding at period end since origination	19	11,942
Outstanding principal balance at period end	35	28,445
TDRs that re-defaulted subsequent to being modified (in the past twelve months)	5	2,372

Outstanding principal balance at period end	36	23,709
TDRs that re-defaulted subsequent to being modified (in the past twelve months)	-	-

Impaired Loans

Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures the extent of the impairment in accordance with guidance under *FASB ASC Topic 310 for Receivables*. The fair value of impaired loans is estimated using one of several methods, including collateral value, liquidation value or discounted cash flows. However, collateral value is predominantly used to assess the fair value of an impaired loan. Those impaired loans not requiring an allowance represent loans for which the fair value of the collateral or expected repayments exceed the recorded investments in such loans.

Components of Impaired Loans

Impaired Loans For the Year Ended December 31, 2013

(Dollars in thousands)	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Recorded Investment	Interest Income Recognized	Interest Income Recognized Using Cash Basis
Impaired loans with no related specific allowance recorded:						
Commercial Real Estate	\$20,613	\$28,116	\$-	\$23,889	\$-	\$-
Commercial Business	26,022	30,264	-	12,521	-	-
Commercial Construction	2,518	6,214	-	8,745	-	-

Total	\$107,907	\$152,859	\$-	\$113,315	\$-	\$-

The Company charged-off the collateral or discounted cash flow deficiency on all impaired loans and as a result, no specific valuation allowance was required for any impaired loans at December 31, 2013. Interest income that would

have been recorded for the year ended December 31, 2013, had impaired loans been current according to their original terms, amounted to approximately \$3.5 million.

Non-performing loans (which includes non-accrual loans and loans past 90 days or more and still accruing) at December 31, 2013 and 2012 amounted to approximately \$76.2 million and \$92.4 million, respectively, and include \$24.4 million and \$24.0 million in guaranteed student loans, respectively.

9. ACCRUED INTEREST RECEIVABLE

The following table provides information on accrued interest receivable at December 31, 2013 and 2012.

(Dollars in thousands)	2013		2012	
	Amount	% of Total	Amount	% of Total
Interest-bearing deposits	\$ 13	0.09%	\$ 57	0.37%
Investment securities	3,788	27.06%	4,269	27.76%
Loans	10,198	72.85%	11,055	71.87%
Total accrued interest receivable	<u>\$13,999</u>	<u>100.00%</u>	<u>\$15,381</u>	<u>100.00%</u>

10. BANK PREMISES AND EQUIPMENT

Premises and equipment at December 31, 2013 and 2012 consist of the following:

(Dollars in thousands)	2013	2012
Land	\$20,532	\$18,129
Bank premises	41,599	38,917
Furniture, fixtures and equipment	23,031	24,440
Leasehold improvements	9,091	9,668
Construction in progress	12,418	6,184
Total	106,671	97,338
Accumulated depreciation and amortization	<u>(34,918)</u>	<u>(33,114)</u>
Total	<u>\$71,753</u>	<u>\$64,224</u>

The increases in land and Bank premises relate to the construction and opening of two new branches in 2013. The increase in construction in progress relates to our new headquarters and two new branches that will open in 2014. Depreciation and amortization expense amounted to \$6.2 million, \$5.8 million, and \$5.5 million for the years ended December 31, 2013, 2012, and 2011, respectively.

11. GOODWILL AND OTHER INTANGIBLES

Goodwill and other intangible assets arising from the Company's acquisitions of SE Financial, FMS Financial Corporation ("FMS"), CLA Agency, Inc. ("CLA"), and Paul Hertel & Company were accounted for in accordance with the accounting guidance in *FASB ASC Topic 350 for Intangibles - Goodwill and Other*. The other intangibles are amortizing intangibles, which primarily consist of a core deposit intangible which is amortized over an estimated useful life of ten years. As of December 31, 2013, the core deposit intangibles net of accumulated amortization totaled \$5.4 million. The remaining balance of other amortizing intangibles includes a customer list intangible amortized over a remaining estimated useful life of 7 years as of December 31, 2013.

Goodwill and other indefinite lived intangible assets are not amortized on a recurring basis, but rather are subject to periodic impairment testing. Management reviewed qualitative factors for the Bank in 2013 including financial performance, market changes and general economic conditions and noted there was not a significant change in any of these factors as compared to 2012. Accordingly, it was determined that it was more likely than not that the fair value of each reporting unit continued to be in excess of its carrying amount as of December 31, 2013.

During 2013, management reviewed qualitative factors for the Bank, which represents \$112.7 million of our goodwill balance, including financial performance, market changes and general economic conditions and noted there was not a significant change in any of these factors as compared to 2012. Accordingly, it was determined that it was more

likely than not that the fair value of the Banking unit continued to be in excess of its carrying amount as of December 31, 2013. Additionally during 2013, we assessed the qualitative factors related to Beneficial Insurance Services, LLC, which represents \$9.3 million of our goodwill balance and determined that the two-step quantitative goodwill impairment test was warranted. Beneficial Insurance Services, LLC has experienced declining revenues and profitability over the past few years. We performed a two-step quantitative goodwill impairment for Beneficial Insurance Services, LLC based on estimates of the fair value of equity using discounted cash flow analyses as well as guideline company and guideline transaction information. The inputs and assumptions were incorporated in the valuations including projections of future cash flows, discount rates, the fair value of tangible and intangible assets and liabilities, and applicable valuation multiples based on the guideline information. Based on our December 31, 2013 annual impairment assessment of Beneficial Insurance Services, LLC and their current and projected financial results, we believe that the fair value is in excess of the carrying amount. As a result, management concluded that there was no impairment of goodwill during the year ended December 31, 2013. Although, we concluded that no impairment of goodwill existed for Beneficial Insurance Services, LLC, any further declines in financial performance for Beneficial Insurance Services, LLC could result in potential goodwill impairment in future periods.

During 2012, management reviewed qualitative factors for the Bank including financial performance, market changes and general economic conditions and noted there was not a significant change in any of these factors as compared to 2011. Accordingly, it was determined that it was more likely than not that the fair value of the Banking unit continued to be in excess of its carrying amount as of December 31, 2012. Additionally during 2012, the Company assessed the qualitative factors related to Beneficial Insurance Services, LLC and determined that the two-step quantitative goodwill impairment test was warranted based on declining revenues. The Company performed this impairment test which estimates the fair value of equity using discounted cash flow analyses as well as guideline company and guideline transaction information. The inputs and assumptions are incorporated in the valuations including projections of future cash flows, discount rates, the fair value of tangible and intangible assets and liabilities, and applicable valuation multiples based on the guideline information. Based on the Company's December 31, 2013 annual impairment assessment of Beneficial Insurance Services, LLC, management believes that the fair value is in excess of the carrying amount. As a result, management concluded that there was no impairment of goodwill as of December 31, 2012.

Other intangible assets subject to amortization are evaluated for impairment in accordance with authoritative guidance. An impairment loss will be recognized if the carrying amount of the intangible asset is not recoverable and exceeds fair value. The carrying amount of the intangible is not considered recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use of the asset. During 2013, management reviewed qualitative factors that serve as indicators of impairment and concluded that there was no indication of impairment as of December 31, 2013.

During 2012, management recorded an impairment charge of \$773 thousand related to the insurance agency's customer list intangible due to the fact that the expected cash flows from the customer list intangible were less than the carrying amount of the customer list intangible. The impairment charge was determined by the difference between the fair value of the customer list intangible and the carrying amount of the customer list intangible.

Goodwill and other intangibles at December 31, 2013 and December 31, 2012 are summarized as follows:

(Dollars in thousands)	Goodwill	Core Deposit Intangible	Customer Relationships and other
Balance at January 1, 2013	\$121,973	\$6,927	\$2,952
Adjustments:			
Amortization	-	(1,503)	(369)
Balance at December 31, 2013	<u>\$121,973</u>	<u>\$5,424</u>	<u>\$2,583</u>

The following table summarizes amortizing intangible assets at December 31, 2013 and 2012:

(Dollars in thousands)	2013			2012		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Amortizing Intangibles:						
Core Deposits	\$23,923	(\$18,499)	\$5,424	\$23,923	(\$16,996)	\$6,927
Customer Relationships and Other	10,251	(7,668)	2,583	10,251	(7,299)	2,952
Total Amortizing Intangibles	<u>\$34,174</u>	<u>(\$26,167)</u>	<u>\$8,007</u>	<u>\$34,174</u>	<u>(\$24,295)</u>	<u>\$9,879</u>

Aggregate amortization expense was \$1.9 million, \$3.4 million and \$3.6 million for the years ended December 31, 2013, 2012, and 2011, respectively. Amortization expense for the next five years and thereafter is expected to be as follows:

(Dollars in thousands)	
Year	Expense
2014	\$1,870
2015	1,868
2016	1,867
2017	1,149
2018	424
2019 and thereafter	829

12. OTHER ASSETS

The following table provides selected information on other assets at December 31, 2013 and 2012:

(Dollars in thousands)	December 31,	December 31,
	2013	2012
Investments in affordable housing and other partnerships	\$ 12,541	\$ 14,507
Cash surrender value of life insurance	20,049	19,885
Prepaid assets	2,203	7,336
Net deferred tax assets	48,612	47,079
Other real estate	5,861	11,751
Fixed assets held for sale	-	441
Mortgage servicing rights	1,524	1,302
All other assets	13,210	11,441
Total other assets	<u>\$104,000</u>	<u>\$113,742</u>

During the years ended December 31, 2013, 2012 and 2011, the Company recorded \$1.3 million, \$3.1 million and \$781 thousand, respectively, of other real estate owned losses, which consists of property write downs from updated appraisals as well as the loss on the sale of properties. In addition, during the years ended December 31, 2013, 2012 and 2011, the Company recorded \$875 thousand, \$1.7 million and \$1.6 million, respectively, of other real estate owned expenses.

During the year ended December 31, 2012, the Company recorded \$1.5 million of additional amortization on low income housing partnership investments. There was no additional amortization recorded on low income housing partnership investments during the year ended December 31, 2013.

In connection with the SE Financial merger, the Company determined that one owned branch would be consolidated into an existing branch location and sold. During the year ended December 31, 2012, this branch location was sold and a gain of \$588 thousand was recorded in merger and restructuring charges in non-interest expense.

The Company follows the authoritative guidance under ASC 860-50 - *Servicing Assets and Liabilities* to account for its MSR's. The Company has elected the fair value measurement method to value its existing mortgage servicing assets at fair value in accordance with ASC 860-50. Under the fair value measurement method, the Company

measures its MSRs at fair value at each reporting date and reports changes in the fair value of its MSRs in earnings in the period in which the changes occur. See Note 24 to these consolidated financial statements.

13. DEPOSITS

Deposits consisted of the following major classifications at December 31, 2013 and 2012:

(Dollars in thousands)

	2013	% of Total Deposits	2012	% of Total Deposits
Non-interest bearing deposits	\$ 291,109	7.9%	\$ 328,892	8.4%
Interest-earning checking accounts	686,582	18.8%	663,737	16.9%
Municipal checking accounts	383,043	10.5%	611,599	15.6%
Money market accounts	441,881	12.1%	496,508	12.6%
Savings accounts	1,127,339	30.8%	1,037,424	26.4%
Certificates of deposit	730,062	19.9%	789,353	20.1%
Total deposits	<u>\$3,660,016</u>	<u>100.0%</u>	<u>\$3,927,513</u>	<u>100.0%</u>

The decrease in deposits of \$267.5 million was primarily the result of \$228.6 million decrease of municipal deposits which was consistent with the planned run-off associated with our re-pricing of higher cost, non-relationship based municipal accounts.

Time deposit accounts outstanding at December 31, 2013 mature as follows:

(Dollars in thousands)

<u>Year</u>	<u>Balance</u>
2014	\$376,057
2015	128,936
2016	123,842
2017	58,040
2018	42,919
2019 and thereafter	268

The aggregate amount of certificates of deposit accounts in denominations of \$100 thousand or more totaled \$135.2 million and \$137.9 million at December 31, 2013 and 2012, respectively. The FDIC has permanently raised deposit insurance per account owner to \$250 thousand for all types of accounts.

14. BORROWED FUNDS

A summary of borrowings is as follows:

(Dollars in thousands)

	December 31,	
	2013	2012
FHLB advances	\$195,000	\$140,000
Repurchase agreements	30,000	85,000
Statutory trust debenture	25,370	25,352
Total borrowings	<u>\$250,370</u>	<u>\$250,352</u>

Advances from the FHLB that bear fixed interest rates with remaining periods until maturity are summarized as follows:

(Dollars in thousands)	<u>December 31,</u>	
	<u>2013</u>	<u>2012</u>
Due in one year or less	\$ 30,000	\$ 20,000
Due after one year through five years	165,000	100,000
Due after five years through ten years	-	20,000
Total FHLB advances	<u>\$195,000</u>	<u>\$140,000</u>

Repurchase agreements that bear fixed interest rates with remaining periods until maturity are summarized as follows:

(Dollars in thousands)	<u>December 31,</u>	
	<u>2013</u>	<u>2012</u>
Due in one year or less	\$30,000	\$55,000
Due after one year through five years	-	30,000
Total	<u>\$30,000</u>	<u>\$85,000</u>

Included as "FHLB advances" at December 31, 2013 and 2012 in the above table are FHLB borrowings whereby the FHLB has the option at predetermined times to convert the fixed interest rate to an adjustable rate tied to the London Interbank Offered Rate ("LIBOR"). If the FHLB converts the interest rate, the Company would have the option to prepay these advances without penalty. These advances are included in the periods in which they mature. At December 31, 2013, \$50.0 million, or 25.6% of the FHLB advances, are convertible at the option of the FHLB. FHLB advances are collateralized under a blanket collateral lien agreement.

The Bank is a member of the FHLB system, which consists of 12 regional Federal Home Loan Banks. The FHLB provides a central credit facility primarily for member institutions. At December 31, 2013 the Bank had a maximum borrowing capacity from the FHLB Pittsburgh of \$1.1 billion of which we had \$195.0 million in outstanding borrowings and \$800 thousand in outstanding letters of credit. The balance remaining of \$904.4 million is our unused borrowing capacity with the FHLB at December 31, 2013. The Bank, as a member of the FHLB of Pittsburgh, is required to acquire and hold shares of capital stock in that FHLB. The Bank was in compliance with requirements for FHLB Pittsburgh with an investment of \$17.4 million at December 31, 2013.

The weighted average interest rates of the borrowings during the years ended December 31, 2013 and 2012 were as follows:

	<u>2013</u>	<u>2012</u>
Weighted average interest rate during period:		
Federal Home Loan Bank advances	2.87%	2.92%
Repurchase agreements	3.65	3.60
Federal Home Loan Bank overnight borrowings	0.26	0.15
Federal Reserve Bank of Philadelphia overnight borrowings	0.75	0.77
Statutory Trust Debenture	1.98	2.18
Other	0.58	0.62

The Company pledges loans to secure its borrowing capacity at the Federal Reserve Bank of Philadelphia. Loans totaling \$230.2 million and \$254.2 million were pledged to secure borrowings at December 31, 2013 and 2012, respectively. The Company enters into sales of securities under agreements to repurchase. These agreements are recorded as financing transactions, and the obligation to repurchase is reflected as a liability in the consolidated statements of financial condition. The dollar amount of securities underlying the agreements remains recorded as an asset and carried in the Company's securities portfolio.

At December 31, 2013 and 2012, outstanding repurchase agreements were \$30.0 million and \$85.0 million, respectively, with a weighted average maturity of 0.85 and 0.93 years, respectively, and a weighted average cost of 3.78% and 3.41%, respectively. The average balance of repurchase agreements during the years ended December 31, 2013 and 2012 were \$53.5 million and \$99.9 million, respectively. The maximum amount outstanding at any month end period during 2013 and 2012 was \$85.0 million and \$125.0 million, respectively.

At December 31, 2013 and 2012, outstanding repurchase agreements were secured by GSE Mortgage-Backed Securities. At December 31, 2013 and 2012, the market value of the securities held as collateral for repurchase agreements was \$33.2 million and \$96.2 million, respectively.

The Company assumed FMS Financial's obligation to the FMS Statutory Trust II (the "Trust") as part of the acquisition of FMS Financial on July 13, 2007. The Company's debentures to the Trust as of December 31, 2013 were \$25.8 million. The fair value of the debenture was recorded as of the acquisition date at \$25.3 million. The difference between market value and the Company's debenture is being amortized as interest expense over the expected life of the debt. The Trust issued \$25.8 million of floating rate capital securities and \$759 thousand of common securities to the Company. The Trust's capital securities are fully guaranteed by the Company's debenture to the Trust. The Company's investment in the capital securities is included in "all other assets" in other assets on the Company's consolidated statements of financial condition. As of December 31, 2013, the rate was 1.82% based on 3 Month LIBOR plus a 1.58% margin. The debentures are now redeemable at the Company's option. The redemption of the debentures would result in the mandatory redemption of the Trust's capital and common securities at par. The statutory trust debenture is wholly owned by the Company, however under accounting guidance, it is not a consolidated entity because the Company is not the primary beneficiary.

15. REGULATORY CAPITAL REQUIREMENTS

The Bank is subject to various regulatory capital requirements administered by state and federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk weighted assets (as defined), and of Tier 1 capital (as defined) to average assets (as defined). Management believes that, as of December 31, 2013 and 2012, the Bank met all capital adequacy requirements to which it was subject.

As of December 31, 2013, the most recent date for which information is available, the FDIC categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the table. There are no conditions or events that management believes have changed the Bank's categorization since the most recent notification from the FDIC.

The Bank's actual capital amounts and ratios (under rules established by the FDIC) are presented in the following table for the dates indicated:

	Actual		For Capital Adequacy Purposes		To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Capital Amount	Ratio	Capital Amount	Ratio	Capital Amount	Ratio
(Dollars in thousands)						
As of December 31, 2013:						
Tier 1 Capital (to average assets)	\$456,285	10.22%	\$134,000	3.00%	\$223,333	5.00%
Tier 1 Capital (to risk weighted assets)	456,285	20.57%	88,740	4.00%	133,109	6.00%
Total Capital (to risk weighted assets)	484,370	21.83%	177,479	8.00%	221,849	10.00%
As of December 31, 2012:						
Tier 1 Capital (to average assets)	\$454,505	9.53%	\$143,057	3.00%	\$238,428	5.00%
Tier 1 Capital (to risk weighted assets)	454,505	19.23%	94,517	4.00%	141,776	6.00%
Total Capital (to risk weighted assets)	484,462	20.50%	189,034	8.00%	236,293	10.00%

16. INCOME TAXES

The Company files a consolidated federal income tax return. The provision for income taxes for the years ended December 31, 2013, 2012, and 2011 includes the following:

	2013	2012	2011
(Dollars in thousands)			
Current federal taxes	(\$4,513)	\$1,290	\$ 3,938
Current state and local taxes	(219)	604	197
Deferred federal and state taxes benefit	7,327	(135)	(6,048)
Total	<u>\$2,595</u>	<u>\$1,759</u>	<u>(\$1,913)</u>

A reconciliation from the expected federal income tax expense (benefit) computed at the statutory federal income tax rate to the actual income tax expense (benefit) included in the consolidated statements of income is as follows:

	<u>2013</u>		<u>2012</u>		<u>2011</u>	
Tax at statutory rate	\$5,310	35.00%	\$5,578	35.00%	\$3,193	35.00%
Increase (reduction) in taxes resulting from:						
Tax-exempt income	(1,626)	(10.72)	(1,640)	(10.29)	(1,870)	(20.50)
State and local income taxes	679	4.48	643	4.03	923	10.11
Employee benefit programs	(409)	(2.70)	(205)	(1.29)	178	1.95
Federal income tax credits	(1,927)	(12.70)	(2,025)	(12.71)	(2,845)	(31.18)
Valuation allowances – charitable contributions	269	1.77	-	-	(593)	(6.50)
Valuation allowances – state and local income taxes/OTTI	191	1.25	(98)	(0.61)	(486)	(5.32)
Other	108	0.72	(494)	(3.09)	(413)	(4.53)
Total	<u>\$2,595</u>	<u>17.10%</u>	<u>\$1,759</u>	<u>11.04%</u>	<u>(\$1,913)</u>	<u>(20.97)%</u>

Items that give rise to significant portions of the deferred tax accounts at December 31, 2013 and 2012 are as follows:

(Dollars in thousands)	<u>2013</u>	<u>2012</u>
Deferred tax assets:		
Reserve for bad debts	\$20,450	\$21,225
Pension and postretirement liabilities (ASC 715)	9,676	14,678
Pension and postretirement benefits	-	4,031
Federal income tax credits	11,663	4,591
Deferred compensation	5,757	5,291
Non-accrual interest on loans	-	3,465
State net operating loss carryover / state credits	1,478	1,448
Purchase accounting adjustments	2,638	4,451
Charitable contribution carryforward	357	270
Lease accounting	675	603
OREO	1,249	1,957
Federal net operating loss carryover	33	33
Available-for-sale securities	2,950	-
Accrued expenses and other	2,542	2,144
	<u>59,468</u>	<u>64,187</u>
Less: Valuation Allowance	<u>(1,431)</u>	<u>(971)</u>
Total	<u>58,037</u>	<u>63,216</u>
Deferred tax liabilities:		
Available-for-sale securities	-	10,911
Pension and postretirement benefits	4,830	-
Intangibles	2,412	2,498
Premises and equipment	230	857
Prepaid expenses and deferred loan costs	1,393	1,376
Mortgage servicing rights and other	560	495
Total	<u>9,425</u>	<u>16,137</u>
Net deferred tax assets	<u>\$48,612</u>	<u>\$47,079</u>

As of December 31, 2013, the Company had net deferred tax assets totaling \$48.6 million. These deferred tax assets can only be realized if the Company generates taxable income in the future. The Company regularly evaluates the realizability of deferred tax asset positions. In determining whether a valuation allowance is necessary, the Company considers the level of taxable income in prior years to the extent that carrybacks are permitted under current tax laws, as well as estimates of future pre-tax and taxable income and tax planning strategies that would, if necessary, be implemented. The Company currently maintains a valuation allowance for certain state net operating losses, other-than-temporary impairments, and a charitable contribution carryover that, if not fully utilized, will expire in 2015, that management believes it is more likely than not that such deferred tax assets will not be realized. The Company expects to realize the remaining deferred tax assets over the allowable carryback and/or carryforward periods. Therefore, no valuation allowance is deemed necessary against its remaining federal or state deferred tax assets as of December 31, 2013. However, if an unanticipated event occurred that materially changed pre-tax book income and taxable income in future periods, an increase in the valuation allowance may become necessary and it could be material to the Company's financial statements.

As of December 31, 2013, the Company has state and local net operating loss carryovers of \$54.4 million and Pennsylvania tax credits of \$6 thousand, resulting in deferred tax assets of \$1.5 million. These state and local net operating loss carryovers will begin to expire after December 31, 2014 if not utilized. A valuation allowance of \$1.0 million for these deferred tax assets, other than the Bank's state net operating loss, has been recorded as of December

31, 2013, as management believes it is more likely than not that such deferred tax assets will not be realized. As of December 31, 2013 and 2012, management maintained a valuation allowance of \$154 thousand related to a deferred tax asset associated with the write down of certain equity securities, for which management believes that it is more likely than not that such deferred tax asset will not be realized. As of December 31, 2013, management recorded a valuation allowance of \$269 thousand related to a deferred tax asset associated with a \$770 thousand gross charitable contribution carryover from 2010 that, if not fully utilized, will expire at December 31, 2015, for which management believes that it is more likely than not that such deferred tax asset will not be realized.

During 2013 and 2012, \$8.9 million and \$2.8 million in net deferred tax assets and liabilities, respectively, were recorded as adjustments to other comprehensive income tax accounts. During the year ended December 31, 2012, the Company recorded \$6.4 million of net deferred tax assets related to the acquisition and merger of SE Financial.

The Company also has the following carryover items: (1) a gross federal net operating loss of \$96 thousand which is limited in usage under IRS rules to \$108 thousand per year and will expire at the end of 2022 if not utilized; (2) low income housing tax credits of \$9.4 million that will begin to expire in 2031 if not utilized; and (3) an alternative minimum tax credit of \$2.2 million which has an indefinite life.

The Company accounts for uncertain tax positions in accordance with FASB ASC Topic 740 for Income Taxes. The guidance clarifies the accounting and reporting for income taxes where interpretation of the tax law may be uncertain. The FASB prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of income tax uncertainties with respect to positions taken or expected to be taken in income tax returns. The uncertain tax liability for uncertain tax positions was zero at December 31, 2013 and December 31, 2012. The tax years 2010 through 2012 remain subject to examination by the IRS, Pennsylvania and Philadelphia taxing authorities. The 2012 tax year remains subject to examination by New Jersey taxing authorities. For 2013, the Bank's maximum federal income tax rate was 35%.

The Company recognizes, when applicable, interest and penalties related to unrecognized tax positions in the provision for income taxes in the consolidated statement of income. No interest or penalties were incurred during the years ended December 31, 2013 and 2012.

Pursuant to accounting guidance, the Company is not required to provide deferred taxes on its tax loan loss reserve as of December 31, 1987. As of December 31, 2013 and 2012, the Company had unrecognized deferred income taxes of approximately \$2.3 million with respect to this reserve. This reserve could be recognized as taxable income and create a current and/or deferred tax liability using the income tax rates then in effect if one of the following occur: (1) the Bank's retained earnings represented by this reserve are used for distributions in liquidation or for any other purpose other than to absorb losses from bad debts; (2) the Bank fails to qualify as a Bank, as provided by the Internal Revenue Code; or (3) there is a change in federal tax law.

17. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Bank has noncontributory defined benefit pension plans covering many of its employees. Additionally, the Company sponsors nonqualified supplemental employee retirement plans for certain participants. The Bank also provides certain postretirement benefits to qualified former employees. These postretirement benefits principally pertain to certain health and life insurance coverage. Information relating to these employee benefits program are included in the tables that follow.

Effective June 30, 2008, the defined pension benefits for Bank employees were frozen at the current levels. Additionally, the Bank enhanced its 401(k) Plan and combined it with its Employee Stock Ownership Plan to fund employer contributions. See Note 18 to these consolidated financial statements.

The following tables present a reconciliation of beginning and ending balances of benefit obligations and assets at December 31, 2013 and 2012:

(Dollars in thousands)	Pension		Other Postretirement	
	Benefits		Benefits	
Change in Benefit Obligation	2013	2012	2013	2012
Benefit obligation at beginning of year	\$91,746	\$82,667	\$27,154	\$25,296
Service cost	-	-	211	250
Interest cost	3,571	3,700	907	1,054
Participants' contributions	-	-	60	83
Actuarial (gain)/loss	(9,296)	8,863	(4,626)	2,272
Benefits paid	(3,467)	(3,484)	(1,554)	(1,801)
Benefit obligation at end of year	<u>\$82,554</u>	<u>\$91,746</u>	<u>\$22,152</u>	<u>\$27,154</u>
Change in Assets				
Fair value of assets at beginning of year	\$59,976	\$53,338	\$-	\$-
Actual return on assets	5,162	8,220	-	-
Employer contribution	24,351	2,396	1,494	1,718
Participants' contributions	-	-	60	83
Expense	(543)	(494)	-	-
Benefits paid	(3,467)	(3,484)	(1,554)	(1,801)
Fair value of assets at end of year	<u>\$85,479</u>	<u>\$59,976</u>	<u>\$-</u>	<u>\$-</u>

The following table presents a reconciliation of the funded status of the pension and postretirement benefits at December 31, 2013 and 2012.

(Dollars in thousands)	Pension		Other Postretirement Benefits	
	2013	2012	2013	2012
Projected benefit obligation	\$82,554	\$91,746	\$22,152	\$27,154
Fair value of plan assets	85,479	59,976	-	-
Accrued pension (benefit) cost	<u>(\$2,925)</u>	<u>\$31,770</u>	<u>\$22,152</u>	<u>\$27,154</u>

The Company's pension benefits funding policy is to contribute annually an amount, as determined by consulting actuaries and approved by the Retirement Plan Committee, which can be deducted for federal income tax purposes, if required. Based on the Bank's strong liquidity, in January 2013, the Company contributed \$24.0 million to the Consolidated Pension Plan which improved the projected benefit obligation funded status to approximately 95.7% at the time of the contribution. In 2013 and 2012, respectively, \$24.4 million and \$2.4 million was contributed to the pension plans under the Bank's funding policy.

The following table presents the amounts recognized in accumulated other comprehensive income of the pension and postretirement benefits at December 31, 2013 and 2012.

(Dollars in thousands)	Pension		Other Postretirement Benefits	
	2013	2012	2013	2012
Net loss	\$23,909	\$33,670	\$4,420	\$9,518
Prior service cost	-	-	(2,576)	(3,102)
Transition obligation	-	-	164	327

The Company's total accumulated pension benefit obligations at December 31, 2013 and December 31, 2012 were \$82.6 million and \$91.7 million, respectively. The accumulated pension obligation equals the projected benefit obligation as a result of the freeze in pension benefits effective June 30, 2008.

Significant assumptions used to calculate the net periodic pension cost and obligation as of December 31, 2013, 2012, and 2011 are as follows:

	Pension Benefits			Other Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
Consolidated Pension Plan						
Discount rate for periodic pension cost	3.95%	4.55%	5.55%			
Discount rate for benefit obligation	4.80%	3.95%	4.55%			
Expected long-term rate of return on plan assets	7.45%	8.00%	8.00%			
Beneficial Bank Plans						
Discount rate for periodic pension cost				3.85%	4.50%	5.55%
Discount rate for benefit obligation				4.80%	3.85%	4.50%
Expected long-term rate of return on plan assets				-	-	-
FMS Pension Plan						
Discount rate for periodic pension cost				3.85%	4.50%	5.55%
Discount rate for benefit obligation				4.80%	3.85%	4.50%
Expected long-term rate of return on plan assets				-	-	-

The components of net pension cost are as follows:

(Dollars in thousands)	Pension Benefits			Other Postretirement Benefits		
	2013	2012	2011	2013	2012	2011
Component of Net Periodic Benefit Cost						
Service cost	\$ -	\$ -	\$ -	\$ 211	\$ 250	\$ 204
Interest cost	3,571	3,700	3,816	907	1,054	1,301
Expected return on assets	(6,100)	(4,287)	(4,195)	-	-	-
Amortization of transition obligation	-	-	-	164	164	164
Amortization of prior service cost	-	-	-	(527)	(452)	146
Recognized net actuarial loss	2,142	1,893	945	472	390	173
Net periodic pension (benefit) cost	<u>(\$387)</u>	<u>\$1,306</u>	<u>\$566</u>	<u>\$1,227</u>	<u>\$1,406</u>	<u>\$1,988</u>

For benefit obligation measurement purposes, the annual rate of increase in the per capita cost of postretirement health care costs for the Beneficial Bank postretirement medical plan was as follows: (1) for participants under the age 65, rates were 6.0 percent at December 31, 2011 and 2012 and projected to remain level thereafter; (2) for participants over age 65, rates were 7.0 percent and 6.0 percent at December 31, 2011 and 2012, respectively, and projected to remain level thereafter. As of December 31, 2013, the Company revised the health care trend rate to an initial rate of 7.5 percent for all participants, which is projected to reach an ultimate trend rate of 5.0 percent as of December 31, 2018 and remain level thereafter. With respect to the FMS Financial postretirement medical plan, the annual rate decreased from 8.5 percent at December 31, 2011 to 7.5 percent at December 31, 2013 and is projected to reach an ultimate trend rate of 5.0 percent as of December 31, 2018 and remain level thereafter.

The impact of a 1.0 percent increase and decrease in assumed health care cost trend for each future year would be as follows:

(Dollars in thousands)	1.0% Increase	1.0% Decrease
Accumulated postretirement benefit obligation	\$604	(\$705)
Service and interest cost	25	(25)

The estimated net loss for the pension benefits that will be amortized from accumulated other comprehensive income into net periodic pension costs over the next fiscal year is \$1.4 million. The estimated transition, net loss and prior service cost for postretirement benefits that will be amortized from accumulated other comprehensive income into periodic pension cost over the next fiscal year are \$164 thousand, \$167 thousand and (\$527) thousand, respectively.

Future benefit payments for all pension and postretirement plans are estimated to be paid as follows:

(Dollars in thousands)

Pension Benefits		Other Postretirement Benefits	
2014	\$ 4,036	2014	\$1,514
2015	4,194	2015	1,495
2016	4,162	2016	1,476
2017	4,404	2017	1,503
2018	4,485	2018	1,469
2019-2023	24,737	2019-2023	6,859

The fair values of all pension and postretirement plan assets at December 31, 2013 and 2012 by asset category are as follows:

	Category Used for Fair Value Measurement							
	December 31, 2013				December 31, 2012			
	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3	Total
(Dollars in thousands)

As of December 31, 2013 and 2012, pension and postretirement plan assets were comprised of investments in equity and fixed income mutual funds. The Bank's consolidated pension plan investment policy provides that assets are to be managed over a long-term investment horizon to ensure that the chances and duration of investment losses are carefully weighed against the long term potential for asset appreciation. The primary objective of managing a plan's assets is to improve the plan's funded status. A secondary financial objective is, where possible, to minimize pension expense volatility. The Company's pension plan allocates assets based on the plan's funded status to risk management and return enhancement asset classes. The risk management class is comprised of a long duration fixed income fund while the return enhancement class consists of equity and other fixed income funds. Asset allocation ranges are generally 50% to 60% for risk management and 40% to 50% for return enhancement when the funded status is between 95% and 100%, and 80% to 100% in risk management and 0% to 20% for return enhancement when the funded status reaches 110%, subject to the discretion of the Bank's Retirement Plan Committee. Also, a small portion is maintained in cash reserves when appropriate. Weighted average asset allocations in plan assets at December 31, 2013 and December 31, 2012 were as follows:

	Pension	
	December 31,	
	2013	2012
Domestic equity securities	21.1%	36.5%
Fixed Income	62.7%	43.1%
International equity securities	16.0%	20.2%
Accrued income	0.2%	0.2%
Total	100.0%	100.0%

The Company provides life insurance benefits to eligible employees under an endorsement split-dollar life insurance program. At December 31, 2013 and 2012, \$19.5 million and \$19.0 million, respectively, in cash surrender value relating to this program were recognized in "other assets" in the Company's consolidated statements of financial

condition. The Company recognizes a liability for future benefits applicable to endorsement split-dollar life insurance arrangements that provide death benefits postretirement. These liabilities totaled \$6.2 million and \$8.1 million at December 31, 2013 and 2012, respectively, and are included in the postretirement tables above.

18. EMPLOYEE SAVINGS AND STOCK OWNERSHIP PLAN

In connection with its initial public offering, the Company implemented an Employee Stock Ownership Plan (“ESOP”), which provides retirement benefits for substantially all full-time employees who were employed at the date of the initial public offering and are at least 21 years of age. Other salaried employees will be eligible after they have completed one year of service and have attained the age of 21. The Company makes annual contributions to the ESOP equal to the ESOP’s debt service or equal to the debt service less the dividends received by the ESOP on unallocated shares. Shares purchased by the ESOP were acquired using funds provided by a loan from the Company and accordingly the cost of those shares is shown as a reduction of stockholders’ equity. As of July 1, 2008, the ESOP was merged with the Company’s 401(k) plans to form the Employee Savings and Stock Ownership Plan (“KSOP”). The Company accounts for the KSOP based on guidance from *FASB ASC Topic 718 for Compensation – Stock Compensation*. Shares are released as the loan is repaid.

The balance of the loan to the KSOP as of December 31, 2013 was \$20.2 million compared to \$21.7 million at December 31, 2012. All full time employees and certain part time employees are eligible to participate in the KSOP if they meet prescribed service criteria. Shares will be allocated and released based on the KSOP’s plan document. While the KSOP is one plan, the two separate components of the 401(k) Plan and ESOP remain. Under the KSOP, the Company makes basic contributions and matching contributions. The Bank makes additional contributions for certain employees based on age and years of service. The Company may also make discretionary contributions under the KSOP. Each participant’s account is credited with shares of the Company’s stock or cash based on compensation earned during the year in which the contribution was made.

If the Company declares a dividend, the dividends on the allocated shares would be recorded as dividends and charged to retained earnings. Dividends declared on common stock held by the ESOP which has not been allocated to the account of a participant can be used to repay the loan. Allocation of shares to the participants is contingent upon the repayment of a loan to the Company. The allocated shares in the KSOP were 1,614,572 and 1,434,964 as of December 31, 2013 and December 31, 2012, respectively. The suspense shares available were 1,610,200 as of December 31, 2013 and 1,789,808 as of December 31, 2012. The suspense shares are the shares that are unearned and are available to be allocated. The market value of the unearned shares was \$17.6 million as of December 31, 2013 and \$17.0 million as of December 31, 2012. The Company recorded a related expense of approximately \$2.4 million, \$2.2 million and \$2.5 million, respectively, for contributions to the KSOP for the years ended December 31, 2013, 2012 and 2011.

19. STOCK BASED COMPENSATION

Stock-based compensation is accounted for in accordance with *FASB ASC Topic 718 for Compensation – Stock Compensation*. The Company establishes fair value for its equity awards to determine their cost. The Company recognizes the related expense for employees over the appropriate vesting period, or when applicable, service period, using the straight-line method. However, consistent with the guidance, the amount of stock-based compensation recognized at any date must at least equal the portion of the grant date value of the award that is vested at that date. As a result, it may be necessary to recognize the expense using a ratable method.

The Company’s 2008 Equity Incentive Plan (“EIP”) authorizes the issuance of shares of common stock pursuant to awards that may be granted in the form of stock options to purchase common stock (“options”) and awards of shares of common stock (“stock awards”). The purpose of the Company’s stock-based incentive plans is to attract and retain personnel for positions of substantial responsibility and to provide additional incentive to certain officers, directors and employees. In order to fund grants of stock awards under the EIP, the Equity Incentive Plan Trust (the “EIP Trust”) purchased 1,612,386 shares of Company common stock in the open market for approximately \$19.0 million during the year ended December 31, 2008. The Company made sufficient contributions to the EIP Trust to fund the stock purchases. The acquisition of these shares by the EIP Trust reduced the Company’s outstanding additional paid in capital. The EIP shares will generally vest at a rate of 20% over five years. As of December 31, 2013, 644,775 shares were fully vested and 338,900 shares were forfeited. All grants that were issued contain a service condition in order for the shares to vest. Awards of common stock include awards to certain officers of the Company that will vest only if the Company achieves a return on average assets of 1% or if the Company achieves a return on average assets within the top 25% of the SNL index of nationwide thrifts with total assets between \$1.0 billion and \$10.0 billion nationwide in the fifth full year subsequent to the grant.

Compensation expense related to the stock awards is recognized ratably over the five-year vesting period in an amount which totals the market price of the Company's stock at the grant date. The expense recognized for the year ended December 31, 2013 was \$1.0 million compared to \$1.5 million for the year ended December 31, 2012 and \$1.6 million for the year ended December 31, 2011. The decrease in compensation expense for the year ended December 31, 2013 compared to the same period last year was due to the reversal of \$655 thousand of expense for performance based awards as management determined that it was no longer probable that the performance threshold would be met.

The following table summarizes the non-vested stock award activity for the year ended December 31, 2013:

Summary of Non-vested Stock Award Activity	Number of Shares	Weighted Average Grant Price
Non-vested Stock Awards outstanding, January 1, 2013	540,175	\$9.66
Issued	140,000	9.24
Vested	(160,575)	10.74
Forfeited	<u>(4,400)</u>	9.41
Non-vested Stock Awards outstanding, December 31, 2013	<u>515,200</u>	9.21

The following table summarizes the non-vested stock award activity for the year ended December 31, 2012:

Summary of Non-vested Stock Award Activity	Number of Shares	Weighted Average Grant Price
Non-vested Stock Awards outstanding, January 1, 2012	691,900	\$10.14
Issued	131,875	9.12
Vested	(149,600)	10.61
Forfeited	<u>(134,000)</u>	10.54
Non-vested Stock Awards outstanding, December 31, 2012	<u>540,175</u>	9.66

The fair value of the 160,575 shares that vested during the year ended December 31, 2013 was \$1.5 million. The fair value of the 149,600 shares vested during the year ended December 31, 2012 was \$1.3 million.

The EIP authorizes the grant of options to officers, employees, and directors of the Company to acquire shares of common stock with an exercise price equal to the fair value of the common stock at the grant date. Options expire ten years after the date of grant, unless terminated earlier under the option terms. Options are granted at the then fair market value of the Company's stock. The options were valued using the Black-Scholes option pricing model. During the year ended December 31, 2013, the Company granted 609,500 options compared to 586,000 options granted during the year ended December 31, 2012. All options issued contain conditions requiring the participant's continued service. The options generally vest and are exercisable over five years. Compensation expense for the options totaled \$1.6 million for the year ended December 31, 2013 compared \$1.4 million for the year ended December 31, 2012 and \$1.2 million for the year ended December 31, 2011.

A summary of option activity as of December 31, 2013 and changes during the twelve month period is presented below:

	Number of Options	Weighted Exercise Price per Shares
January 1, 2013	2,333,300	\$10.34
Granted	609,500	9.24
Exercised	(19,200)	8.74
Forfeited	(20,650)	9.42
Expired	(26,100)	11.03
December 31, 2013	<u>2,876,850</u>	10.12

A summary of option activity as of December 31, 2012 and changes during the twelve month period is presented below:

	Number of Options	Weighted Exercise Price per Shares
January 1, 2012	2,086,100	\$10.74
Granted	586,000	9.12
Exercised	(12,050)	8.36
Forfeited	(179,680)	10.22
Expired	(147,070)	11.39
December 31, 2012	<u>2,333,300</u>	10.34

The weighted average remaining contractual term was approximately 6.64 years and the aggregate intrinsic value was \$3.3 million for options outstanding as of December 31, 2013. As of December 31, 2013, exercisable options totaled 1,552,040 with an average weighted exercise price of \$11.00 per share, a weighted average remaining contractual term of approximately 5.22 years, and an aggregate intrinsic value of \$911 thousand. The weighted average remaining contractual term was approximately 7.00 years and the aggregate intrinsic value was \$730 thousand for options outstanding as of December 31, 2012. As of December 31, 2012, exercisable options totaled 1,132,860 with an average weighted exercise price of \$11.24 per share, a weighted average remaining contractual term of approximately 5.91 years, and an aggregate intrinsic value of \$175 thousand.

Significant weighted average assumptions used to calculate the fair value of the options for the years ended December 31, 2013, 2012, and 2011 are as follows:

	For the Year Ended December 31,		
	2013	2012	2011
Weighted average fair value of options granted	\$3.37	\$3.50	\$3.29
Weighted average risk-free rate of return	1.08%	1.41%	2.17%
Weighted average expected option life in months	78	78	78
Weighted average expected volatility	34.69%	36.08%	35.18%
Expected dividends	\$ -	\$ -	\$ -

As of December 31, 2013, there was \$3.6 million of total unrecognized compensation cost related to options and \$2.5 million in unrecognized compensation cost related to non-vested stock awards granted under the EIP. As of December 31, 2012, there was \$3.2 million of total unrecognized compensation cost related to options and \$3.3 million in unrecognized compensation cost related to non-vested stock awards granted under the EIP. The average weighted lives for the option expense were 3.40 and 3.25 years as of December 31, 2013 and December 31, 2012,

respectively. The average weighted lives for the stock award expense were 3.23 and 2.78 years at December 31, 2013 and December 31, 2012, respectively.

20. COMMITMENTS AND CONTINGENCIES

The Company leases a number of offices as part of its regular business operations. Rental expense under such leases aggregated \$5.3 million, \$5.3 million and \$5.2 million for the years ended December 31, 2013, 2012 and 2011, respectively. At December 31, 2013, the Company was committed under non-cancelable operating lease agreements for minimum rental payments to lessors as follows:

<u>(Dollars in thousands)</u>	
2014	\$ 5,675
2015	5,313
2016	4,659
2017	4,288
2018	4,117
Thereafter	<u>37,233</u>
	<u>\$61,285</u>

In the normal course of business, there are various outstanding commitments and contingent liabilities, such as commitments to extend credit, which are not reflected in the consolidated financial statements. The Company has established specific reserves related to loan commitments that are not material to the Company.

At December 31, 2013 and 2012, the Company had outstanding commitments to purchase or make loans aggregating approximately \$38.2 million and \$20.8 million, respectively, and commitments to customers on available lines of credit of \$166.2 million and \$140.0 million, respectively, at competitive rates. Commitments are issued in accordance with the same policies and underwriting procedures as settled loans. The Bank had a reserve for its commitments and contingencies of \$765 thousand and \$624 thousand at year end December 31, 2013 and 2012, respectively.

In the first quarter of 2013, the Company received notice that it was being investigated by the DOJ for potential violations of the Equal Credit Opportunity Act and Fair Housing Act relating to the Company's home-mortgage lending practices from January 1, 2008 to the present. Specifically, the DOJ indicated that it was looking for statistical and other indicators of a pattern and practice of persistent disparities with regard to home-mortgage lending practices.

In December 2012, the FDIC referred the Company to the DOJ as a result of a regularly scheduled fair housing examination that included a statistical analysis of the Company's denial rates of both minority and non-minority loan applicants for a five year period. That statistical analysis showed a higher rejection rate for minority applicants, but only considered limited information related to the Company's credit standards that are applied to all applicants in the decision making process. It was on the basis of this statistical analysis that the DOJ announced its investigation.

In response to the DOJ's investigation, the Company hired outside counsel and economists to conduct an internal investigation. At this time, and to the best of its knowledge, the Company is not aware of any wrongdoing.

In late January 2014, the Company received correspondence from the DOJ indicating that the DOJ had completed its review and determined that the matter did not require enforcement action by the DOJ and was being referred back to the FDIC. The Company was not able to determine whether further action will be taken at this point with respect to the ultimate resolution of this matter and the Company is in discussions with the FDIC Staff. Until this matter is resolved, it is unlikely that any regulatory applications will be filed related to strategic expansion or regarding a second step conversion.

Periodically, there have been various claims and lawsuits against the Bank, such as claims to enforce liens, condemnation proceedings on properties in which it holds security interests, claims involving the making and servicing of real property loans and other issues incident to its business. The Bank is not a party to any pending legal proceedings that it believes would have a material adverse effect on its financial condition, results of operations or cash flows.

21. FAIR VALUE OF FINANCIAL INSTRUMENTS

Effective January 1, 2008, the Company adopted authoritative guidance under *FASB ASC Topic 820 for Fair Value Measurements and Disclosures* which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The authoritative guidance does not require any new fair value measurements. The definition of fair value retains the exchange price notion in earlier definitions of fair value. The guidance clarifies that the exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability in the market in which the reporting entity would transact for the asset or liability. The definition focuses on the price that would be received to sell the asset or paid to transfer the liability (an exit price), not the price that would be paid to acquire the asset or received to assume the liability (an entry price). The guidance emphasizes that fair value is a market-based measurement, not an entity-specific measurement.

Fair value is based on quoted market prices, when available. If listed prices or quotes are not available, fair value is based on fair value models that use market participant or independently sourced market data which include: discount rate, interest rate yield curves, credit risk, default rates and expected cash flow assumptions. In addition, valuation adjustments may be made in the determination of fair value. These fair value adjustments may include amounts to reflect counter party credit quality, creditworthiness, liquidity and other unobservable inputs that are applied consistently over time. These adjustments are estimated and, therefore, subject to significant management judgment, and at times, may be necessary to mitigate the possibility of error or revision in the model-based estimate of the fair value provided by the model. The methods described above may produce fair value calculations that may not be indicative of the net realizable value. While the Company believes its valuation methods are consistent with other financial institutions, the use of different methods or assumptions to determine fair values could result in different estimates of fair value. *FASB ASC Topic 820 for Fair Value Measurements and Disclosures* describes three levels of inputs that may be used to measure fair value:

- Level 1 Quoted prices in active markets for identical assets or liabilities. Level 1 assets and liabilities include debt securities, equity securities and derivative contracts that are traded in an active exchange market as well as certain U.S. Treasury securities that are highly liquid and actively traded in over-the-counter markets.
- Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities. Level 2 assets and liabilities include debt securities with quoted market prices that are traded less frequently than exchange traded assets and liabilities. The values of these items are determined using pricing models with inputs observable in the market or can be corroborated from observable market data. This category generally includes U.S. Government and agency mortgage-backed debt securities, corporate debt securities and derivative contracts.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. Level 3 assets and liabilities include financial instruments whose value is determined using pricing models, discounted cash flow methodologies, or similar techniques, as well as instruments for which the determination of fair value requires significant management judgment or estimation.

Those assets which will continue to be measured at fair value on a recurring basis are as follows at December 31, 2013:

(Dollars in thousands)	Category Used for Fair Value Measurement			
	Level 1	Level 2	Level 3	Total
Assets:				
Mortgage servicing rights	\$ -	\$ -	\$1,524	\$ 1,524

Level 1 Valuation Techniques and Inputs

Included in this category are equity securities, money market funds, mutual funds and certificates of deposit. To estimate the fair value of these securities, the Company utilizes observable quotations for the indicated security.

Level 2 Valuation Techniques and Inputs

The majority of the Company's investment securities are reported at fair value utilizing Level 2 inputs. Prices of these securities are obtained through independent, third-party pricing services. Prices obtained through these sources include market derived quotations and matrix pricing and may include both observable and unobservable inputs. Fair market values take into consideration data such as dealer quotes, new issue pricing, trade prices for similar issues, prepayment estimates, cash flows, market credit spreads and other factors. The Company reviews the output from the third-party providers for reasonableness by the pricing consistency among securities with similar characteristics, where available, and comparing values with other pricing sources available to the Company. In general, the Level 2 valuation process uses the following significant inputs in determining the fair value of the different classes of investments:

U.S. Government Sponsored Enterprise (GSE) and Agency Notes. For pricing evaluations, an Option Adjusted Spread (OAS) model is incorporated to adjust spreads of issues that have early redemption features.

GNMA Guaranteed Mortgage Certificates. Pricing evaluations are based on issuer type, coupon, maturity, and original weighted average maturity. The pricing service's seasoned evaluation model runs a daily cash flow incorporating projected prepayment speed assumptions to generate an average life for each pool. The appropriate spread is applied to the point on the Treasury curve that is equal to the average life of any given pool. This is the yield by which the cash flows are discounted. Pool specific evaluation method enhances the information used in the seasoned model by incorporating the current weighted average maturity and taking into account additional pool level information supplied directly by the agency. Additionally, for adjustable rate mortgages, the model takes into account indices, margin, periodic and life caps, next coupon adjustment date and the convertibility of the bond.

GNMA Collateralized Mortgage Obligations. For pricing evaluations, the pricing service, in general, obtains and applies available direct market color (trades, covers, bids, offers and price talk) along with market color for similar bonds and agency CMOs in general (including market research), prepayment information and Benchmarks (U.S. Treasury curves, swap curves, etc.). For CMOs, depending upon the characteristics of a given tranche, a volatility-driven, multi-dimensional spread table based single cash flow stream model or an option-adjusted spread

(OAS) model is used. Alternatively, the evaluator may utilize market conventions if different from the model-generated assumptions.

GSE CMOs. For pricing evaluations, the pricing service, in general, obtains and applies available direct market color (trades, covers, bids, offers and price talk) along with market color for similar bonds and agency CMOs in general (including market research), prepayment information and Benchmarks (U.S. Treasury curves, swap curves, etc.). For CMOs, depending upon the characteristics of a given tranche, a volatility-driven, multi-dimensional spread table based, single cash flow stream model or an option-adjusted spread (OAS) model is used. Alternatively, the evaluator may utilize market conventions if different from the model-generated assumptions.

Non-Agency CMOs. For pricing evaluations, the pricing service, in general, obtains and applies available market color (including indices and market research), prepayment and default projections based on historical statistics of the underlying collateral and current market data, and Benchmarks (U.S. Treasury curves, swap curves, etc.). For Non-Agency CMOs, depending upon the characteristics of a given tranche, a volatility-driven, multi-dimensional single cash flow stream model or an option-adjusted spread (OAS) model is used. Alternatively, the evaluator may utilize market conventions if different from the model-generated assumptions.

GSE Mortgage-backed Securities. Included in this category are Fannie Mae and Freddie Mac fixed rate residential mortgage backed securities and Fannie Mae and Freddie Mac Adjustable Rate residential mortgage backed securities. Pricing evaluations are based on issuer type, coupon, maturity, and original weighted average maturity. The pricing service's seasoned evaluation model runs a daily cash flow incorporating projected prepayment speed assumptions to generate an average life for each pool. The appropriate spread is applied to the point on the Treasury curve that is equal to the average life of any given pool. This is the yield by which the cash flows are discounted. Pool specific evaluation method enhances the information used in the seasoned model by incorporating the current weighted average maturity and taking into account additional pool level information supplied directly by the government sponsored enterprise. Additionally, for adjustable rate mortgages, the model takes into account indices, margin, periodic and life caps, next coupon adjustment date and the convertibility of the bond.

Tax Exempt General Obligation and Revenue Municipal Bonds. For pricing, the pricing service's evaluators build internal yield curves, which are adjusted throughout the day based on trades and other pertinent market information. Evaluators apply this information to bond sectors, and individual bond evaluations are then extrapolated. Within a given sector, evaluators have the ability to make daily spread adjustments for various attributes that include, but are not limited to, discounts, premiums, credit, alternative minimum tax (AMT), use of proceeds, and callability.

Taxable General Obligation and Revenue Municipal Bonds. For pricing, the pricing service's evaluators build internal yield curves, which are adjusted throughout the day based on trades and other pertinent market information. Evaluators apply this information to bond sectors, and individual bond evaluations are then extrapolated. Within a given sector, evaluators have the ability to make daily spread adjustments for various attributes that include, but are not limited to, discounts, premiums, credit, alternative minimum tax (AMT), use of proceeds, and callability.

Interest Rate Swaps. The Bank obtains fair value measurements of the interest rate swaps from a third party. The fair value measurements are determined using a market standard methodology of netting discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). Variable cash payments (or receipts) are based on an expectation of future interest rates derived from observable market interest rate curves. Credit valuation adjustments are incorporated to appropriately reflect the nonperformance risk as well as the counterparty's nonperformance risk. The fair value of the interest rate swaps was estimated using primarily Level 2 inputs. However, Level 3 inputs were used to determine credit valuation adjustments, such as estimates of current credit spreads to evaluate the likelihood of default. The Bank has determined that the impact of these credit valuation adjustments is not significant to the overall valuation of the interest rate swaps. Therefore, the Bank has classified the entire fair value of the interest rate swaps in Level 2 of the fair value hierarchy.

Level 3 Valuation Techniques and Inputs

Pooled Trust Preferred Securities. The underlying value of pooled trust preferred securities consists of financial services debt. These investments are thinly traded and the Company determines the estimated fair values for these securities by using observable transactions of similar type securities to obtain an average discount margin which was applied to a cash flow analysis model in determining the fair value of the Bank's pooled trust preferred securities. The fair market value estimates the Bank assigns to these securities assume liquidation in an orderly fashion and not under distressed circumstances. Due to limited liquidity and credit risk of certain securities, the market value of these securities is highly sensitive to assumption changes and market volatility.

Mortgage Servicing Rights. The Bank determines the fair value of its MSRs by estimating the amount and timing of future cash flows associated with the servicing rights and discounting the cash flows using market discount rates. The valuation included the application of certain assumptions made by management of the Bank, including prepayment projections, and prevailing assumptions used in the marketplace at the time of the valuation.

The table below presents all assets measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the years ended December 31, 2013 and 2012.

Level 3 Investments Only (Dollars in thousands)	Year Ended December 31, 2013		Year Ended December 31, 2012	
	Trust Preferred Securities	Mortgage Servicing Rights	Trust Preferred Securities	Mortgage Servicing Rights
Balance, January 1,	\$ 8,722	\$ 1,302	\$ 11,153	\$ 647
Additions	-	150	-	948
Included in other comprehensive income	1,660	-	620	-
Payments	(4,621)	(198)	(3,181)	(78)
Net accretion	177	-	130	-
Increase (decrease) in fair value due to changes in valuation input or assumptions	-	270	-	(215)
Sales	(5,938)	-	-	-
Balance, December 31,	\$ -	\$ 1,524	\$ 8,722	\$ 1,302

The Company also has assets that, under certain conditions, are subject to measurement at fair value on a non-recurring basis. These include assets that are measured at the lower of cost or market value and had a fair value below cost at the end of the period as summarized below. A loan is impaired when, based on current information, the Company determines that it is probable that the Company will be unable to collect amounts due according to the terms of the loan agreement. The Company's impaired loans at December 31, 2013 are measured based on the estimated fair value of the collateral since the loans are collateral dependent. Assets measured at fair value on a nonrecurring basis are as follows:

(Dollars in thousands)	Balance Transferred YTD 12/31/13				Gain/(Losses)
	Level 1	Level 2	Level 3		
Impaired loans	\$33,148	\$-	\$-	\$33,148	(\$6,136)
Other real estate owned	1,833	-	-	1,833	(28)

(Dollars in thousands)	Balance Transferred YTD 12/31/12				Gain/(Losses)
	Level 1	Level 2	Level 3		
Impaired loans	\$25,133	\$-	\$-	\$25,133	(\$2,385)
Other real estate owned	4,508	-	-	4,508	(231)
Customer list intangible asset	2,952	-	-	2,952	(773)

In accordance with FASB ASC Topic 825 for Financial Instruments, Disclosures about Fair Value of Financial Instruments, the Company is required to disclose the fair value of financial instruments. The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a distressed sale. Fair value is best determined using observable market prices; however for many of the Company's financial instruments no quoted market prices are readily available. In instances where quoted market prices are not readily available, fair value is determined using present value or other techniques appropriate for the particular instrument. These techniques involve some degree of judgment, and as a result, are not necessarily indicative of the amounts the Company would realize in a current market exchange. Different assumptions or estimation techniques may have a material effect on the estimated fair value.

The following table sets forth the carrying and estimated fair value of the Company's financial assets and liabilities for the periods indicated:

Fair Value of Financial Instruments					
(Dollars in thousands)	Fair Value Hierarchy Level	At December 31, 2013		At December 31, 2012	
		Estimated		Estimated	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Assets:					
Cash and cash equivalents	Level 1	\$355,683	\$355,683	\$489,908	\$489,908
Securities available for sale	See previous table	1,034,180	1,034,180	1,267,491	1,267,491
Securities held to maturity	Level 2	528,829	514,633	477,198	487,307
FHLB stock	Level 3	17,417	17,417	16,384	16,384
Loans, net	Level 3	2,285,378	2,323,627	2,387,000	2,465,126
Loans held for sale	Level 2	780	806	2,655	2,773
Mortgage servicing rights	Level 3	1,524	1,524	1,302	1,302
Interest rate swaps	Level 2	294	294	395	395
Accrued interest receivable	Level 3	13,999	13,999	15,381	15,381
Liabilities:					
Deposits	Level 2	3,660,016	3,666,614	3,927,513	3,938,718
Borrowed funds	Level 2	250,370	249,845	250,352	264,619
Interest rate swaps	Level 2	270	270	418	418
Accrued interest payable	Level 2	2,206	2,206	2,236	2,236

Cash and Cash Equivalents - For cash and cash equivalents, the carrying amount is a reasonable estimate of fair value.

Securities Available for Sale and Held to Maturity - The fair value of investment securities, mortgage-backed securities and collateralized mortgage obligations is based on quoted market prices, dealer quotes, yield curve analysis, and prices obtained from independent pricing services. The fair value of CDOs is determined by using observable transactions of similar type securities to obtain an average discount margin which is applied to a cash flow analysis model.

FHLB Stock - The fair value of FHLB stock is estimated at its carrying value and redemption price of \$100 per share.

Loans, Net - The fair value of loans is estimated by discounting the future cash flows using the current rate at which similar loans would be made to borrowers with similar credit and for the same remaining maturities. Additionally, to be consistent with the requirements under FASB ASC Topic 820 for Fair Value Measurements and Disclosures, the loans were valued at a price that represents the Company's exit price or the price at which these instruments would be sold or transferred.

Loans Held for Sale - The fair value of loans held for sale is estimated using the current rate at which similar loans would be made to borrowers with similar credit risk and the same remaining maturities. Loans held for sale are carried at the lower of cost or estimated fair value.

Mortgage Servicing Rights - The Company determines the fair value of its MSR's by estimating the amount and timing of future cash flows associated with the servicing rights and discounting the cash flows using market discount rates. The valuation included the application of certain assumptions made by management of the Bank, including prepayment projections, and prevailing assumptions used in the marketplace at the time of the valuation.

Interest Rate Swaps - The Company determines the fair value measurements of interest rate swaps using a market standard methodology of netting discounted future fixed cash receipts (or payments) and the discounted expected variable cash payments (or receipts). Variable cash payments (or receipts) are based on an expectation of future interest rates derived from observable market interest rate curves. Credit valuation adjustments are incorporated to appropriately reflect the nonperformance risk as well as the counterparty's nonperformance risk.

Accrued Interest Receivable/ Payable - The carrying amounts of interest receivable/ payable approximate fair value.

Deposits - The fair value of checking and money market deposits and savings accounts is the amount reported in the consolidated financial statements. The carrying amount of checking, savings and money market accounts is the amount that is payable on demand at the reporting date. The fair value of time deposits is generally based on a present value estimate using rates currently offered for deposits of similar remaining maturity.

Borrowed Funds - The fair value of borrowed funds is based on a present value estimate using rates currently offered. Under FASB ACS Topic 820 for Fair Value Measurements and Disclosures, the subordinated debenture was valued based on management's estimate of similar trust preferred securities activity in the market.

Commitments to Extend Credit and Letters of Credit - The majority of the Company's commitments to extend credit and letters of credit carry current market interest rates if converted to loans. Because commitments to extend credit and letters of credit are generally unassignable by either the Company or the borrower, they only have value to the Company and the borrower. The estimated fair value approximates the recorded net deferred fee amounts, which are not significant.

The fair value estimates presented herein are based on pertinent information available to management as of December 31, 2013 and 2012. Although management is not aware of any factors that would significantly affect the estimated fair value amounts, such amounts have not been comprehensively revalued for purposes of these consolidated financial statements since December 31, 2013 and 2012 and, therefore, current estimates of fair value may differ significantly from the amounts presented herein.

22. EMPLOYEE SEVERANCE CHARGES AND OTHER RESTRUCTURING COSTS

During the first quarter of 2011, Beneficial's management completed a comprehensive review of the Bank's operating cost structure and finalized an expense management reduction program. As a result of this review, the Bank reduced approximately 4% of its workforce. Additionally, the Bank made the decision to consolidate 5 of its branch locations into other existing branches. These actions resulted in a \$4.1 million restructuring charge, which consisted of \$2.5 million of severance, \$672 thousand of payments due under employment contract and other costs, and \$947 thousand of fixed asset retirement expense. During the second quarter of 2011, \$978 thousand of severance expense was accrued relating to the departure of an executive officer. During the second quarter of 2012, the Company accrued for merger and restructuring charges related to the acquisition of SE Financial, as well as the restructuring of a department and the departure of an officer of the Bank that totaled \$2.8 million. During the year ended December 31, 2013, management determined that the remaining severance accrual and lease termination charge were no longer needed and reversed the \$189 thousand accrual. These charges are included in merger and restructuring charges, a component of non-interest expense, within the consolidated statements of income.

(Dollars in thousands)	<u>Severance</u>	<u>Contract termination, merger and other costs</u>	<u>Total</u>
Accrued at December 31, 2012	\$1,018	\$659	\$1,677
Accrual reversal during the year	(159)	(30)	(189)
Paid during the year	(675)	(270)	(945)
Accrued at December 31, 2013	<u>\$184</u>	<u>\$359</u>	<u>\$543</u>

23. RELATED PARTY TRANSACTIONS

At December 31, 2013 and 2012, certain directors, executive officers, principal holders of the Company's common stock, associates of such persons, and affiliated companies of such persons were indebted, including undrawn commitments to lend, to the Bank in the aggregate amount of \$463 thousand and \$386 thousand, respectively.

Commitments to lend to related parties as of December 31, 2013 and 2012 were comprised of \$4 thousand and \$2 thousand, respectively to directors and none to executive officers. The commitments are in the form of loans and guarantees for various business and personal interests. This indebtedness was incurred in the ordinary course of business on substantially the same terms, including interest rate and collateral, as those prevailing at the time of comparable transactions with unrelated parties. This indebtedness does not involve more than the normal risk of repayment or present other unfavorable features.

None of the Company's affiliates, officers, directors or employees have an interest in or receive remuneration from any special purpose entities or qualified special purpose entities which the Company transacts business.

The Company maintains a written policy and procedures covering related party transactions. These procedures cover transactions such as employee-stock purchase loans, personal lines of credit, residential secured loans, overdrafts, letter of credit and increases in indebtedness. Such transactions are subject to the Bank's normal underwriting and approval policies and procedures.

24. MORTGAGE SERVICING RIGHTS

The Company follows the authoritative guidance under *ASC 860-50 - Servicing Assets and Liabilities* to account for its MSR's. The Company has elected the fair value measurement method to value its existing mortgage servicing assets at fair value in accordance with ASC 860-50. Under the fair value measurement method, the Company records its MSR's on its consolidated statements of financial condition as a component of other assets at fair value with changes in fair value recorded as a component of service charges and other income in the Company's consolidated statements of income for each period. As of December 31, 2013 and December 31, 2012, the Company serviced \$158.0 million and \$169.2 million of residential mortgage loans, respectively. During the years ended December 31, 2013, 2012 and 2011, the Company recognized \$410 thousand, \$324 thousand, and \$107 thousand of servicing fee income, respectively.

The following is an analysis of the activity in the Company's residential MSR's for the years ended December 31, 2013, 2012 and 2011:

(Dollars in thousands)	Residential Mortgage Servicing Rights For the Year Ended December 31,		
	2013	2012	2011
Balance, January 1,	\$1,302	\$ 647	\$ 268
Additions	150	948	507
Increase/(decrease) in fair value due to changes in valuation input or assumptions	270	(215)	(73)
Paydowns	(198)	(78)	(55)
Balance, December 31,	<u>\$1,524</u>	<u>\$1,302</u>	<u>\$647</u>

The Company uses assumptions and estimates in determining the fair value of MSR's. These assumptions include prepayment speeds, discount rates, escrow earnings rates and other assumptions. The assumptions used in the valuation were based on input from buyers, brokers and other qualified personnel, as well as market knowledge. At December 31, 2013, the key assumptions used to determine the fair value of the Company's MSR's included a lifetime constant prepayment rate equal to 9.71%, a discount rate equal to 10.00% and an escrow earnings credit rate equal to 1.54%. At December 31, 2012, the key assumptions used to determine the fair value of the Company's MSR's included a lifetime constant prepayment rate equal to 16.28%, a discount rate equal to 8.50% and an escrow earnings credit rate equal to 0.81%.

At December 31, 2013, the sensitivity of the current fair value of the residential mortgage servicing rights to immediate 10% and 20% favorable and unfavorable changes in key economic assumptions are included in the following table.

(Dollars in thousands)	Residential Mortgage Servicing Rights December 31, 2013
Fair value of residential mortgage servicing rights	\$1,524
Weighted average life (years)	6
Prepayment speed	
Effect on fair value of a 20% increase	(\$101)
Effect on fair value of a 10% increase	(52)
Effect on fair value of a 10% decrease	57
Effect on fair value of a 20% decrease	117
Discount rate	
Effect on fair value of a 20% increase	(\$106)
Effect on fair value of a 10% increase	(54)
Effect on fair value of a 10% decrease	59
Effect on fair value of a 20% decrease	122
Escrow earnings credit	
Effect on fair value of a 20% increase	\$32
Effect on fair value of a 10% increase	16
Effect on fair value of a 10% decrease	(14)
Effect on fair value of a 20% decrease	(32)

The sensitivity calculations above are hypothetical and should not be considered to be predictive of future performance. As indicated, changes in fair value based on adverse changes in assumptions generally cannot be extrapolated because the relationship of the change in assumption to the change in fair value may not be linear. Also, in this table, the effect of an adverse variation in a particular assumption on the fair value of the mortgage servicing rights is calculated without changing any other assumption; while in reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which may magnify or counteract the effect of the change.

25. DERIVATIVE FINANCIAL INSTRUMENTS

The Company is a party to derivative financial instruments in the normal course of business to meet the needs of commercial banking customers. These financial instruments have been limited to interest rate swap agreements, which are entered into with counterparties that meet established credit standards and, where appropriate, contain master netting and collateral provisions protecting the party at risk. The Company believes that the credit risk inherent in all of the derivative contracts is minimal based on the credit standards and the netting and collateral provisions of the interest rate swap agreements.

The Company executes interest rate swaps with commercial banking customers to facilitate their respective risk management strategies. Those interest rate swaps are simultaneously hedged by offsetting interest rate swaps that the Company executes with a third party, such that the Company minimizes its net risk exposure resulting from such transactions. These derivatives are not designated as hedges and are not speculative. Rather, these derivatives result from a service the Company provides to certain customers, which the Company implemented during the first quarter of 2012. As the interest rate swaps associated with this program do not meet the hedge accounting

requirements, changes in the fair value of both the customer swaps and the offsetting swaps are recognized directly in earnings. As of December 31, 2013, the Company had six interest rate swaps with an aggregate notional amount of \$26.3 million related to this program. During the years ended December 31, 2013 and 2012, the Company recognized a net gain of \$98 thousand and \$156 thousand, respectively, related to interest rate swap agreements that are included as a component of services charges and other non-interest income in the Company's consolidated statements of income.

The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the consolidated statements of condition as of December 31, 2013 and 2012:

As of December 31, 2013	<u>Asset derivatives</u>		<u>Liability derivatives</u>	
	<u>Notional amount</u>	<u>Fair value (1)</u>	<u>Notional amount</u>	<u>Fair value (2)</u>
(dollars in thousands)				
Interest rate swap agreements	<u>\$13,151</u>	<u>\$294</u>	<u>\$13,151</u>	<u>\$270</u>
Total derivatives	<u>\$13,151</u>	<u>\$294</u>	<u>\$13,151</u>	<u>\$270</u>

(1) Included in other assets in our Consolidated Statements of Financial Condition.

(2) Included in other liabilities in our Consolidated Statements of Financial Condition.

As of December 31, 2012	<u>Asset derivatives</u>		<u>Liability derivatives</u>	
	<u>Notional amount</u>	<u>Fair value (1)</u>	<u>Notional amount</u>	<u>Fair value (2)</u>
(dollars in thousands)				
Interest rate swap agreements	<u>\$10,248</u>	<u>\$395</u>	<u>\$10,248</u>	<u>\$418</u>
Total derivatives	<u>\$10,248</u>	<u>\$395</u>	<u>\$10,248</u>	<u>\$418</u>

(1) Included in other assets in our Consolidated Statements of Financial Condition.

(2) Included in other liabilities in our Consolidated Statements of Financial Condition.

The following displays offsetting interest rate swap assets and liabilities for the dates presented:

Offsetting of Derivative Assets

As of December 31, 2013

	Gross Amounts of Recognized Assets *	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Assets presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		Net Amount
				Financial Instruments	Collateral Received	
Interest rate swaps	\$ 313	\$ -	\$ 313	\$ -	\$ 51	\$ 262

Offsetting of Derivative Liabilities

As of December 31, 2013

	Gross Amounts of Recognized Liabilities *	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Liabilities presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		Net Amount
				Financial Instruments	Collateral Posted	
Interest rate swaps	\$ 288	\$ -	\$ 288	\$ -	\$ -	\$ 288

* - Balance includes accrued interest receivable/payable and credit valuation adjustments.

Offsetting of Derivative Assets

As of December 31, 2012

	Gross Amounts of Recognized Assets *	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Assets presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		Net Amount
				Financial Instruments	Collateral Received	
Interest rate swaps	\$ 409	\$ -	\$ 409	\$ -	\$ -	\$ 409

Offsetting of Derivative Liabilities

As of December 31, 2012

	Gross Amounts of Recognized Liabilities *	Gross Amounts Offset in the Statement of Financial Condition	Net Amounts of Liabilities presented in the Statement of Financial Condition	Gross Amounts Not Offset in the Statement of Financial Condition		Net Amount
				Financial Instruments	Collateral Posted	
Interest rate swaps	\$ 432	\$ -	\$ 432	\$ -	\$ (503)	\$ (71)

* - Balance includes accrued interest receivable/payable and credit valuation adjustments.

The Company has agreements with certain of its derivative counterparties that provide that if the Company defaults on any of its indebtedness, including default where repayment of the indebtedness has not been accelerated by the lender, then the Company could also be declared in default on its derivative obligations. The Company also has agreements with certain of its derivative counterparties that provide that if the Company fails to maintain its status as a well or adequately capitalized institution, then the counterparty could terminate the derivative positions and the Company would be required to settle its obligations under the agreements.

As of December 31, 2013, the termination value of the interest rate swaps in a liability position was \$288 thousand compared to \$432 thousand at December 31, 2012. The Company has minimum collateral posting thresholds with its counterparty. As of December 31, 2013, the Company was not required to post collateral, and at December 31, 2012, the Company posted collateral of \$503 thousand. The counterparty posted collateral in the amount of \$51 thousand as of December 31, 2013 and was not required to post collateral as of December 31, 2012. If the Company had breached any of these provisions at December 31, 2013 it would have been required to settle its obligation under the agreement at the termination value and could have been required to pay any additional amounts due in excess of amounts previously posted as collateral with the counterparty. The Company had not breached any provisions at December 31, 2013.

Investor and Corporate Information

Market for Common Equity and Related Stockholder Matters

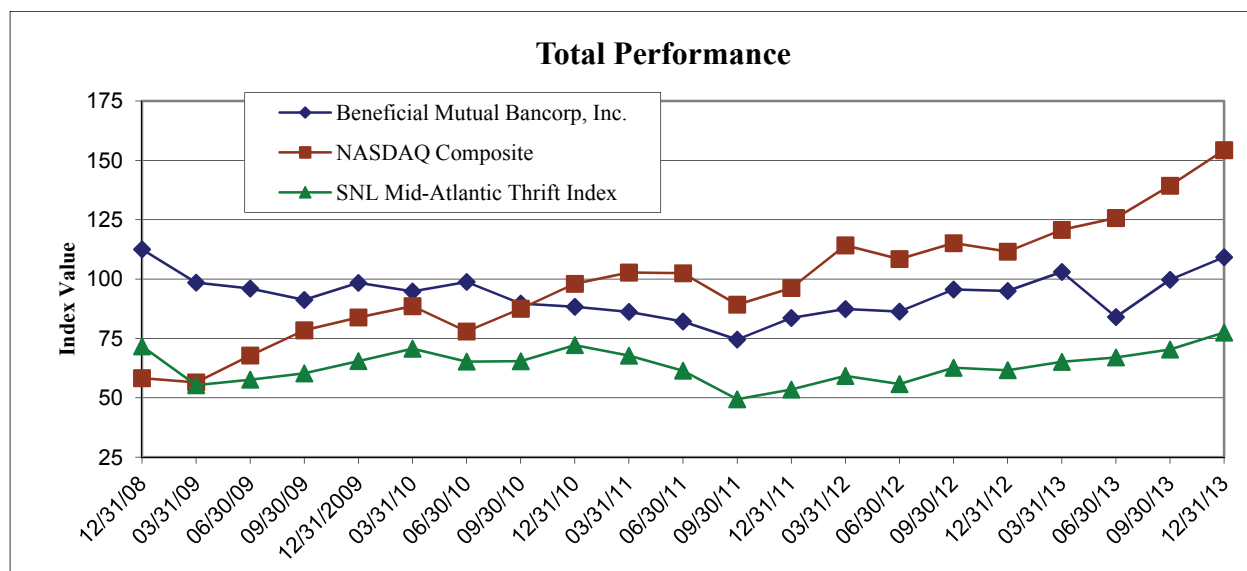

The Company's common stock is listed on the Nasdaq Global Select Market ("Nasdaq") under the trading symbol "BNCL." The following table sets forth the high and low quarterly sales prices of the Company's common stock for the four quarters in fiscal 2013 and 2012, as reported by Nasdaq. The Company has not paid any dividends to its stockholders to date. As of March 10, 2014, the Company had approximately 2,198 holders of record of common stock.

<u>2013:</u>	<u>High</u>	<u>Low</u>
First Quarter	\$10.30	\$9.23
Second Quarter	\$10.11	\$8.40
Third Quarter	\$10.00	\$8.40
Fourth Quarter	\$11.15	\$9.75

<u>2012:</u>	<u>High</u>	<u>Low</u>
First Quarter	\$9.23	\$8.53
Second Quarter	\$8.97	\$8.39
Third Quarter	\$9.90	\$8.36
Fourth Quarter	\$10.14	\$8.88

Stock Performance Graph

The following graph compares the cumulative total return of the Company's common stock with the cumulative total return of the SNL Mid-Atlantic Thrift Index and the Index for the Nasdaq Stock Market (U.S. Companies, all Standard Industrial Classification, ("SIC")). The graph assumes \$100 was invested on December 31, 2008, the first day of trading of the Company's common stock. Cumulative total return assumes reinvestment of all dividends. The performance graph is being furnished solely to accompany this report pursuant to Item 201(e) of Regulation S-K, and is not being filed for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, and is not to be incorporated by reference into any filing of the Company, whether made before or after the date hereof, regardless of any general incorporation language in such filing.
